

UK Trade in Goods by Classification of Product by Activity CPA(08), Quarter 1 (January to March) 2015

Coverage: **UK**

Date: **12 June 2015**

Geographical Area: **UK**

Theme: **Economy**

Introduction

- This publication presents a quarterly analysis of UK exports and imports of goods grouped according to the activity of which those goods are principal products. Data are presented according to the classes of the 2008 Classification of Product by Activity (CPA(08)).
- All data are shown on a seasonally adjusted, balance of payments basis at current prices, and provides a comprehensive set of CPA(08) trade in goods figures fully compatible with our balance of payments and national accounts outputs.
- The quarter 1 January to March 2015 issue of UK trade in goods by CPA is consistent with the figures published in the UK Trade, April 2015 release of 9 June 2015.

UK trade in goods, quarter 1 (January to March) 2015

In quarter 1 January to March 2015, the deficit on trade in goods widened by £0.3 billion to £30.4 billion, compared with a deficit of £30.1 billion in quarter 4 October to December 2014.

Table 1: UK trade in goods, quarter 4 (October to December) 2013 to quarter 1 (January to March) 2015

£ billion, seasonally adjusted

		Exports	Imports	Balance
2013	Q4	74.7	103.6	-28.9
2014	Q1	74.0	102.6	-28.6
	Q2	73.2	103.3	-30.1
	Q3	71.3	103.7	-32.4
	Q4	73.7	103.8	-30.1
2015	Q1	71.5	101.9	-30.4

Change in value by industry, quarter 1 (January to March) 2015

In quarter 1 January to March 2015, total exports decreased by £2.2 billion (3.0%) to £71.5 billion, and total imports decreased by £1.9 billion (1.8%) to £101.9 billion. At the industry level the data is shown in Tables 2 and 3.

Table 2: Exports: change in value by industry grouping, quarter 1 (January to March) 2015 compared with quarter 4 (October to December) 2014

Background notes**1. What's new?**

The UK Statistics Authority [suspended the National Statistics designation of UK Trade](#) on 14 November 2014. The Authority's [re-assessment of UK Trade](#) against the Code of Practice for Official Statistics has been completed. There are 13 requirements to fully comply with the Code of Practice for Official Statistics, and to enable designation as National Statistics. In line with UK Trade, the Authority has de-designated the UK Trade in Goods by CPA as National Statistics until they can comply fully with the Code of Practice.

We recently carried out a user consultation on UK trade statistics, the results of this consultation and actions will be published on 10 July 2015 alongside UK Trade, May 2015.

Revisions

Trade in goods figures are revised to take in adjustments to the overseas trade statistics (OTS) data and changes in the seasonal adjustment factors. There is a need to revise the EU estimates over a longer period of time because of the Intrastat system. Most revisions are small in relation to the variability of the series.

In this release, periods from quarter 1 (January to March 2015) have been revised based on improved methodology. This is in line with the UK Trade and [National Accounts revisions policy \(43.3 Kb Pdf\)](#).

2. **Special events**

An article outlining the [ONS policy on special events](#) can be found on our website.

3. **Code of Practice for Official Statistics**

National Statistics are produced to high professional standards set out in the [Code of Practice for Official Statistics](#). They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

4. **Understanding the data**

The statistics of trade in goods compiled by the Office for National Statistics (ONS) are derived principally from data provided by Her Majesty's Revenue & Customs (HMRC).

5. **Overseas Trade Statistics compiled by HMRC**

Since 1993 statistics of the UK's overseas trade in goods comprise:

- statistics of UK imports from and exports to countries outside the EU, which have been compiled from declarations made to HM Revenue & Customs (HMRC), previously Customs & Excise
- statistics of UK arrivals (imports) from and dispatches (exports) to other member states of the EU, compiled from Intrastat returns sent to HMRC

The Intrastat system is linked to Value Added Tax (VAT) and has applied since 1993 in all EU member states. Prior to 1993, statistics of UK trade with all countries were compiled from declarations made to HM Revenue & Customs.

6. For statistical purposes, the UK adopts the valuation bases recommended in the International Merchandise Trade Statistics Concepts and Definitions published by the United Nations. This means the valuation of exports (dispatches) is on a free on board (FOB) basis, that is, the cost of goods to the purchaser abroad, and the valuation of imports (arrivals) is on a cost, insurance and freight (CIF) basis. This includes all expenses incurred moving the goods to the point of entry into the UK, but excludes any duty or tax chargeable in the UK.

7. **Our balance of payments statistics**

To conform to the International Monetary Fund (IMF) balance of payments (BoP) definition, the value of imports required is the value of goods at the point of export (that is, the customs border of the exporting country) rather than the value of goods as they arrive in the UK. The freight and insurance costs of transporting the goods to the UK needs to be deducted from the values recorded by HMRC.

8. In addition, we have had to make various other adjustments to include transactions which are not reported to HMRC and to exclude transactions reported to HMRC but where there is no change of ownership. Table 2.4 by our annual publication [United Kingdom Balance of Payments](#) summarises the transition from trade in goods statistics on an overseas trade statistics (OTS) basis (compiled by HMRC) to a BoP basis (compiled by us) for each of the last 11 years.
9. Following a change in the pattern of trading associated with Missing Trader Intra-Community (MTIC) fraud, identified by HMRC, interpretation of the breakdown between EU and non-EU trade is more difficult. Some VAT MTIC fraud has affected non-EU exports from 2004 onwards. However, the MTIC trade adjustments are added to the EU import estimates derived from Intrastat returns as it is this part of the chain that is generally not recorded. Changes to the pattern of MTIC can therefore make it difficult to analyse trade by commodity group and by country as increases inflate both imports and exports. In particular, adjustments affect trade in capital goods and intermediate goods – these categories include mobile phones and computer components.
10. The CPA is the classification of products at the level of the European Union. Product classifications are designed to categorise products that have common characteristics. They provide the basis for collecting and calculating statistics on the production, distributive trade, consumption, foreign trade and transport of such products. A major revision of the CPA was adopted in April 2008. New concepts, such as originals and intellectual property products, have been introduced, and further detail has been added to reflect new products. A correspondence table between the [CPA02 and CPA08 classifications](#) can be found on the Eurostat website.
11. Not all exports allocated to an industry were necessarily produced in establishments classified to that industry. However, the exports attributed to an industry are broadly comparable with sales figures for principal products of that industry. Imports refer to the industry by which the commodity was produced, rather than by the importing industry.

12. Seasonal adjustment

Our quarterly trade in goods figures are published on a seasonally adjusted basis. The seasonally adjusted series for total trade in goods are derived by summing or weighting together major commodity components. In common with our other outputs, the seasonal adjustment package used is X12ARIMA, developed by Stats Canada.

13. Rounding

Figures on a balance of payments basis are adjusted to ensure arithmetical consistency, in line with conventions used in the national accounts.

14. Related data

Equivalent information at constant prices is available from our Customer Contact Centre (see the reverse title page of this publication). We can also supply comparable information for UK trade with the EU and non-EU countries. As a result of the methodological changes which could not be carried through to world totals, a few EU and non-EU series may have negative values.

15. Further information

[Statistics on Trade in Goods \(GSS Methodological Series No. 36\) \(384.4 Kb Pdf\)](#) gives comprehensive explanations of the bases on which trade in goods statistics are compiled and is available on our website.

16. Publication policy

Details of the policy governing the release of new data are available from our [Media Relations Office](#).

17. Accessing data

The complete run of data in the tables of this statistical bulletin are also available to view and download in other electronic formats free of charge, using the [UK Trade in goods by CPA\(08\), quarter 1 \(January to March\) 2015 dataset](#) website service. Users can download the complete statistical bulletin in a choice of zipped formats, or view and download their own selections of individual series.

We are constantly aiming to improve this release and its associated commentary. We would welcome any feedback you might have and would be particularly interested in knowing how you make use of these data to inform your work. To provide feedback on the bulletin or to request further information, please contact us via email on trade.in.goods@ons.gsi.gov.uk

18. Follow us on [Twitter](#) and receive up to date information about our statistical releases.

19. Like us on [Facebook](#) to receive our updates in your newsfeed and to post comments on our page.

20. Watch our videos at [YouTube](#).

21. Details of the policy governing the release of new data are available by visiting www.statisticsauthority.gov.uk/assessment/code-of-practice/index.html or from the Media Relations Office email: media.relations@ons.gsi.gov.uk
