5. [House price index, by English region](#)
6. [House price index, by UK local authority district](#)
7. [Quality and methodology](#)

# 1 . Introduction

This is a high-level summary of the UK House Price Index (HPI). For full details, including commentary, historical data tables and analytical tools, please see the [main publication of the House Price Index](#), published today (14 November 2017) by HM Land Registry on the GOV.UK website.

## 2 . Things you need to know about this release

On 15 June 2017, the [National Statistician announced](#) that pre-release access to ONS statistics would stop with effect from 1 July 2017.

The UK House Price Index (HPI) is a joint production by HM Land Registry, Land and Property Services Northern Ireland, Office for National Statistics and Registers of Scotland. These departments will continue to work together to produce the release but ministers and those officials not directly involved in the production and release of statistics will not have access to them in advance of publication.

The UK HPI, introduced in June 2016, includes all residential properties purchased for market value in the UK. However, as sales only appear in the UK HPI once the purchases have been registered, there can be a delay before transactions feed into the index. As such, caution is advised when interpreting price changes in the most recent periods as they are liable to be revised. Since 13 June 2017, we have extended our revision period to 12 months. Further information is provided in our [revision policy](#).

The UK HPI has been published initially as an [experimental official statistic](#) to:

- allow for users to acclimatise to the format of the new HPI
- evaluate user reaction to the new data
- continue evolution of data publication to meet user requirements
- further develop the data sources used in the production

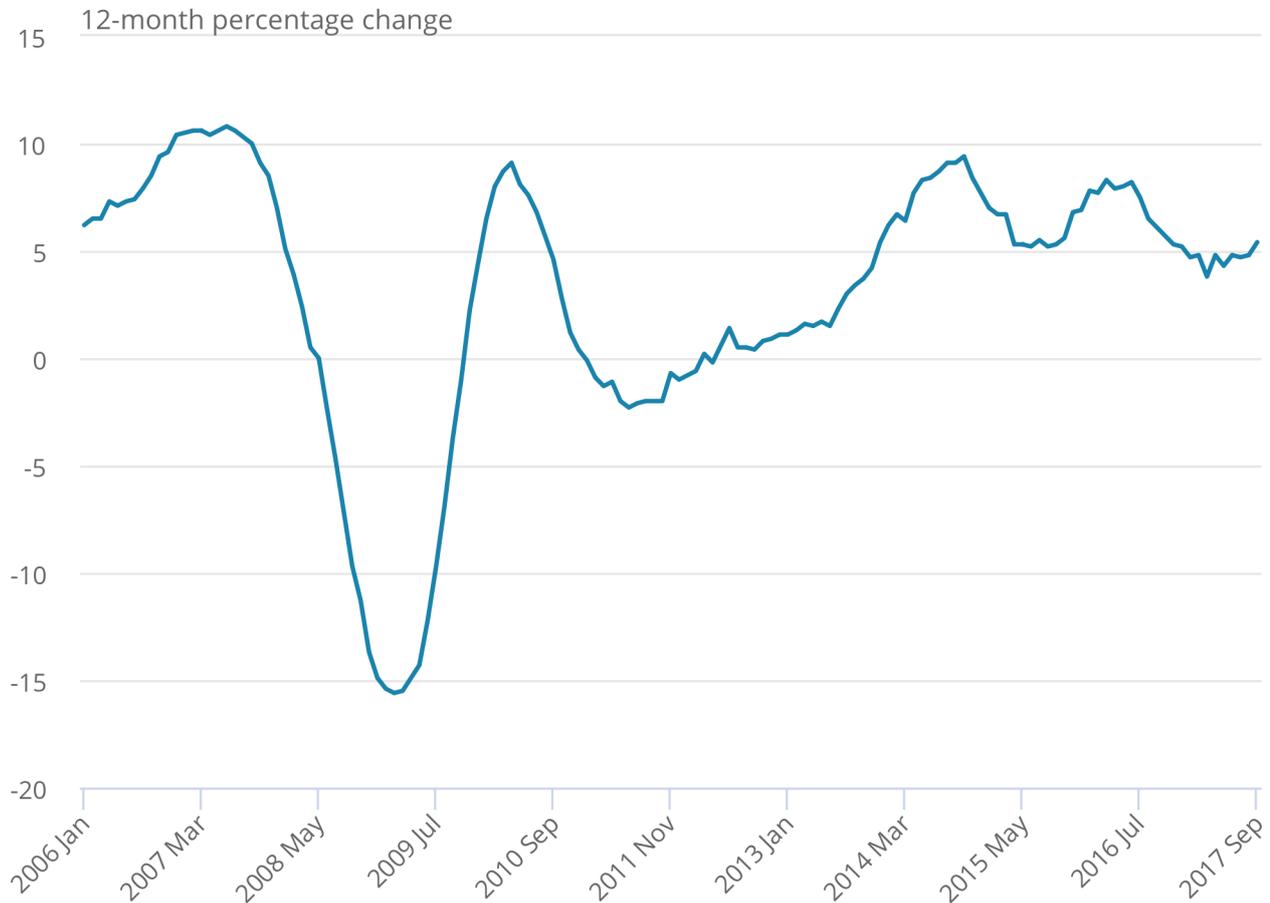

Further information on the process we're following to remove the Experimental Statistics status can be found in [About the UK House Price Index](#).

## 3 . UK all dwellings

Average house prices in the UK have increased by 5.4% in the year to September 2017 (up from 4.8% in August 2017). The annual growth rate has slowed since mid-2016 but has remained broadly around 5% during 2017.

## 4 . House price index, by UK country

The main contribution to the increase in UK house prices came from England, where house prices increased by 5.7% over the year to September 2017, with the average price in England now £244,000. Wales saw house prices increase by 5.3% over the last 12 months to stand at £153,000. In Scotland, the average price increased by 3.1% over the year to stand at £145,000. The average price in Northern Ireland currently stands at £132,000, an increase of 6.0% over the year to Quarter 3 (July to Sept) 2017.

## 6 . House price index, by UK local authority district

The local authority showing the largest annual growth in the year to September 2017 was Hinckley and Bosworth, where prices increased by 15.9% to stand at £215,000. The lowest annual growth was recorded in Halton, where prices fell by 5.2% to stand at £127,000.

In September 2017, the most expensive borough to live in was Kensington and Chelsea, where the cost of an average house was £1.2 million. In contrast, the cheapest area to purchase a property was Blaenau Gwent, where an average house cost £85,000.

**Table 1: Top five and bottom five UK Local Authorities, by annual growth in the year to September 2017**

<b>Top 5 Local Authorities</b>	<b>% change</b>	<b>Average price (£)</b>
Hinckley and Bosworth	15.9	215,137
Camden	14.1	897,536
Burnley	14.0	91,465
Mid Suffolk	12.3	274,283
Stratford-on-Avon	11.9	328,551

<b>Bottom 5 Local Authorities</b>	<b>% change</b>	<b>Average price (£)</b>
Halton	-5.2	126,704
City of Aberdeen	-3.5	165,275
East Staffordshire	-2.3	168,169
Carmarthenshire	-2.0	133,157
Aberdeenshire	-2.0	192,292

Full details on data at the local authority level can be found in the [main publication of the House Price Index](#).

## 7 . Quality and methodology

Details of the methodology used to calculate the UK House Price Index (HPI) can be found in the article [Development of a single Official House Price Index](#).

Further information on how the new UK HPI compares with the previous Office for National Statistics and HM Land Registry House Price Indices can be found in the article [Explaining the impact of the new UK House Price Index](#).

The [UK House Price Index \(HPI\) Quality and Methodology Information report](#) contains important information on:

- the strengths and limitations of the data and how it compares with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data
