3. [CPIH 12-month rate up slightly in August 2018](#)
4. [Inflation rate for recreation and culture highest since January 2010](#)
5. [Largest contributions to change in the rate from recreation and culture, and transport services](#)
6. [Owner occupiers' housing costs' contribution to the CPIH 12-month rate has eased since October 2016](#)
7. [Links to related statistics](#)
8. [Quality and methodology](#)

1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) 12-month inflation rate was 2.4% in August 2018, up from 2.3% in July 2018.
- Rising prices for a range of recreational and cultural goods and services, transport services and clothing produced the largest upward contributions to the change in the rate between July and August 2018.
- Partially offsetting downward contributions came from furniture and household goods, and telecommunications; prices for these rose between July and August 2018 but by less than a year ago.
- The Consumer Prices Index (CPI) 12-month rate was 2.7% in August 2018, up from 2.5% in July 2018.

2 . Things you need to know about this release

The [National Statistics](#) status of the Consumer Prices Index including owner occupiers' housing costs (CPIH) was reinstated on 31 July 2017. A [letter](#) from the Director General for Regulation to the National Statistician detailed the actions that were taken to meet the requirements as set out in the [CPIH assessment report](#).

We have illustrated our [future approach to measuring changing prices and costs faced by consumers and households](#) using three “use cases”, along with how they relate to the measures that we currently publish and those that are under development. Specifically, they refer to the CPIH as our lead measure of inflation based on economic principles; the Household Costs Indices (HCIs, currently under development with [preliminary estimates](#) published for the first time on 19 December 2017) as a set of measures to reflect the change in costs as experienced by households; and the Retail Prices Index (RPI) as a legacy measure that is required to meet existing user needs. [Shortcomings of the Retail Prices Index as a measure of inflation](#), released on 8 March 2018, describes the issues with the RPI.

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. One way to understand this is to think of a shopping basket containing all the goods and services bought by households. Movements in price indices represent the changing cost of this basket. [Consumer price indices – a brief guide](#) gives an overview of the indices and their uses.

The most common approach to measuring inflation is the 12-month inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the 12-month rate is determined by the balance between upward and downward price movements of the range of goods and services included in the index.

This release also examines how the various types of goods and services contribute to the change in the 12-month inflation rate between the latest two months. The size and direction of these contributions depends on how prices changed between both the latest two months this year and the same two months last year. For example, the price of a product could make an upward contribution to the change in the rate even if it fell, provided that it fell by less than it did between the same two months a year ago. [Explaining the contribution to change in the 12-month rate \(2013\)](#) covers this concept in more detail.

The CPIH is the most comprehensive measure of inflation. It extends the CPI to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing costs (OOH), along with Council Tax. Both of these are significant expenses for many households and are not included in the CPI.

Aside from including OOH and Council Tax, CPIH is otherwise identical to CPI. This means that, aside from these two components, the factors contributing to the CPI rate are the same as those contributing to the CPIH. For example, if food is reported as increasing the CPIH rate, it is also acting to increase the CPI rate. The size of the contributions for components other than OOH and Council Tax are exaggerated in the CPI compared with the CPIH because they account for a larger proportion of the overall index.

The CPI is produced at the same level of detail as CPIH, in the accompanying [dataset](#) and [time series](#).

The Retail Prices Index (RPI) does not meet the required standard for designation as National Statistics. In recognition that it continues to be widely used in contracts, we continue to publish the RPI, its sub-components and RPIX. To view the all-items RPI and 12-month inflation rate and an at-a-glance comparison with other measures, please see the [time series](#) section of the inflation and price indices area of our website. The accompanying [dataset](#) and [time series](#) provide more detailed information.

The figures in this publication use data collected on or around 14 August 2018.

3 . CPIH 12-month rate up slightly in August 2018

The Consumer Prices Index including owner occupiers' housing costs (CPIH) 12-month rate was 2.4% in August 2018, up from 2.3% in July. The August figure is slightly above the rate observed in the previous five months when it fluctuated between 2.2% and 2.3%.

Figure 1 compares the 12-month inflation rates for CPIH and the Consumer Prices Index (CPI), along with the rate for the owner occupiers' housing costs (OOH) component of CPIH. Given that OOH accounts for around 17% of CPIH, it is the main driver for differences between the CPIH and CPI inflation rates.

4 . Inflation rate for recreation and culture highest since January 2010

Figure 2 shows that price movements for most of the broad categories of goods and services had an upward effect on the Consumer Prices Index including owner occupiers' housing costs (CPIH) 12-month rate in August 2018. The exception was miscellaneous goods and services, which had a small downward pull on the rate, with prices falling by 0.7% in the year to August 2018. Within this category, the main downward effect was from financial services, where prices fell by 6.3% on the year.

Transport continues to make the largest upward contribution to the rate, with prices rising by 6.0% in the year to August 2018, the highest 12-month rate since April 2017. The largest contribution within the transport group continues to come from motor fuels.

Other large upward contributions came from housing and household services (principally from owner occupiers' housing costs and domestic utilities) and recreation and culture. Prices for recreation and culture rose by 3.6% between August 2017 and August 2018, the highest 12-month rate since January 2010 when it was also 3.6%. Within this category, the contribution came from a wide range of goods and services, with the single largest contribution from package holidays.

Figure 2: Contributions to the CPIH 12-month rate: August 2017 and August 2018

UK

Figure 2: Contributions to the CPIH 12-month rate: August 2017 and August 2018

Source: Office for National Statistics

Notes:

1. Individual contributions may not sum to the total due to rounding.
2. More information on the contents of each group can be found in Table 3 in the accompanying [Consumer price inflation dataset](#).

Figure 3 shows the extent to which the different categories of goods and services have contributed to the overall CPIH 12-month rate over the last two years. Transport, and food and non-alcoholic beverages prices have been important factors in driving the changes in the rate. As the overall CPIH rate began to level off from April 2017, the contribution from food and non-alcoholic beverages continued to increase, being offset by a fall in the contribution from transport, particularly motor fuels.

From early 2018, the contributions from most of the categories began to fall back, leading to a fall in the 12-month rate. This was true of transport between January and April. However, its contribution has more than doubled between April and August. Similarly the contribution from recreation and culture fell between January and June but has since risen.

Figure 3: Contributions to the CPIH 12-month rate: August 2016 to August 2018

UK

Figure 3: Contributions to the CPIH 12-month rate: August 2016 to August 2018

UK

Source: Office for National Statistics

Notes:

1. Individual contributions may not sum to the total due to rounding.
2. More information on the contents of each group can be found in Table 3 in the accompanying [Consumer price inflation dataset](#).

5. Largest contributions to change in the rate from recreation and culture, and transport services

Figure 4 shows how each of the main groups of goods and services contributed to the change in the Consumer Prices Index including owner occupiers' housing costs (CPIH) 12-month rate between July and August 2018. The corresponding figures for the Consumer Prices Index (CPI) can be found in column F of Table 26 in the [Consumer price inflation dataset](#).

The largest upward contribution to the change in the CPIH 12-month rate came from the recreation and culture category, where prices rose by 0.6% between July and August 2018 compared with a smaller rise of 0.1% between the same two months a year ago. The main effects came from cultural services, where theatre admission prices rose by more than a year ago, and games, toys and hobbies, where prices for computer games rose this year but fell a year ago. These games are heavily dependent on the composition of bestseller charts, often resulting in large overall price changes from month to month.

Transport also had an upward effect, with passenger transport fares showing larger price rises between July and August 2018 than between the same two months a year ago. The effect came from a combination of sea and air fares. Within transport, these effects were partially offset by a small downward contribution from motor fuels. Petrol prices rose by 1.4 pence per litre between July and August 2018 compared with a larger rise of 1.8 pence per litre between July and August 2017. Similarly, diesel rose by 1.2 pence this year compared with 2.0 pence a year ago.

The final, large upward effect came from clothing and footwear, with average prices rising by 3.1% between July and August 2018 compared with a smaller rise of 2.4% between the same two months a year ago. Prices of clothing and footwear usually rise between July and August as autumn ranges start to enter the shops following the summer sales season. The rise was larger this year than in 2017 and may have been influenced by the proportion of items on sale, which fell by more between July and August this year than between the same two months a year ago. The upward effect came principally from women's and children's clothing.

The largest downward contribution to the change in the 12-month rate came from furniture, household equipment and maintenance, where prices rose by 1.2% between July and August 2018 compared with 1.8% in 2017. The effect was widespread across most subcategories.

Communication also had a downward effect, with prices rising by less than a year ago. The main downward contributions came from mobile phone charges and bundled telecommunication services.

Figure 4: Contributions to change in the CPIH 12-month rate between July 2018 and August 2018

UK

Figure 4: Contributions to change in the CPIH 12-month rate between July 2018 and August 2018

UK

Notes:

1. Individual contributions may not sum to the total due to rounding.
2. More information on the contents of each group can be found in Table 3 in the accompanying [Consumer price inflation dataset](#).

6 . Owner occupiers' housing costs' contribution to the CPIH 12-month rate has eased since October 2016

Figure 5 shows the contribution of owner occupiers' housing costs (OOH) and Council Tax to the Consumer Prices Index including owner occupiers' housing costs (CPIH) inflation rate in the context of wider housing-related costs. OOH has consistently been the largest contributor to the rate in recent years, though it has fallen back from a high in October 2016 and is now similar in size to electricity, gas and other fuels. The contribution from other components has varied.

Utility bills made a negative contribution during 2015 and 2016 but more recent rises, most notably in electricity prices, have seen its contribution turn positive through 2017 into 2018. Increases in Council Tax starting in 2016 mean that its contribution has also increased over this period.

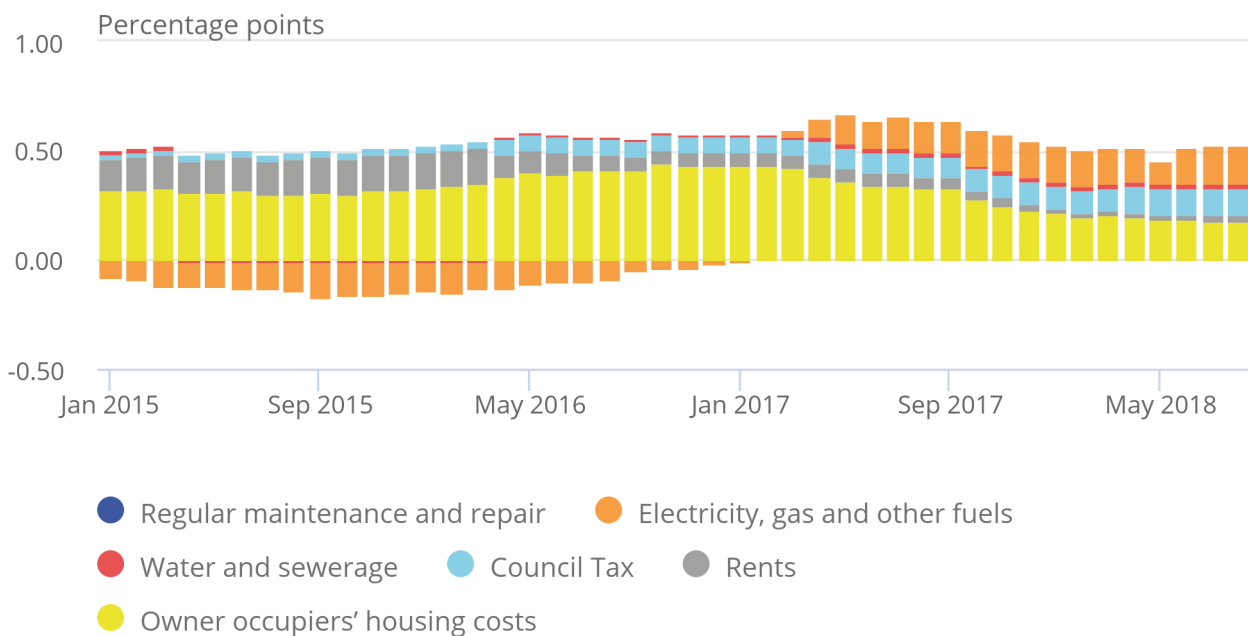

The reduction in the contribution from rents is likely to be a result of a policy to reduce social housing rent starting from April 2016, whilst other housing costs (namely regular maintenance and repair, along with water and sewerage services) tend to make a very small contribution to the 12-month rate.

Figure 5: Contributions of housing components to the CPIH 12-month rate: January 2015 to August 2018

UK

Notes:

1. Individual contributions may not sum to the total due to rounding.

7. Links to related statistics

Data relating to the Retail Prices Index (RPI) are available in the accompanying [dataset](#) and [time series](#). To view the all-items RPI and 12-month inflation rate and an at-a-glance comparison with other measures, please see the [time series](#) section of the inflation and price indices area of our website.

Other important measures of inflation and prices include [Producer price indices](#), the [House Price Index](#) and the [Index of Private Housing Rental Prices \(IPHRP\)](#). [Prices economic commentary](#) presents further analysis of these in addition to the Consumer Prices Index including owner occupiers' housing costs (CPIH).

The [individual price quotes \(for locally-collected items only\) and item indices](#) that underpin the consumer price inflation statistics are available.

The [Harmonised Index of Consumer Prices](#) (HICP) provides a comparable measure of inflation for each member state of the EU. The UK HICP is identical to the UK Consumer Prices Index (CPI). Further information is available on the [Eurostat website](#).

8 . Quality and methodology

The [Consumer Price Inflation Quality and Methodology Information report](#) contains important information on:

- the strengths and limitations of the data and how it compares with related data
- users and uses of the data
- how the output was created
- the quality of the output including the accuracy of the data

The [Consumer Price Indices Technical Manual](#) covers the concepts and methodologies underpinning the indices in more detail.

The [CPIH Compendium](#) provides a comprehensive source of information on the Consumer Prices Index including owner occupiers' housing costs (CPIH), with a focus on the approach to measuring owner occupiers' housing costs (OOH).

The [Consumer price inflation basket of goods and services: 2018](#) article details the annual review process for the items making up the inflation basket used to calculate the UK consumer price inflation indices and describes the changes in the latest year.

[Consumer price inflation, updating weights: 2018](#) describes the latest changes to the relative weights of items in the inflation basket to ensure they remain representative of current consumer spending patterns.

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

3 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

Key: - zero or negligible

Source: Office for National Statistics

1 From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gsi.gov.uk>.

Key: - zero or negligible

¹ For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

² The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001.

³ Energy includes electricity, gas and other fuels, and fuels and lubricants.

Key: - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004, 25 member states from May 2004, and 27 members from Jan 2007, the new member states being integrated using a chain index formula.

The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia from 1 May 2004 and Bulgaria and Romania from 1 Jan 2007.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.
