1. Other pages in this release

Other commentary from the latest labour market data can be found on the following pages:

- Employment in the UK
- Average weekly earnings in Great Britain
- Vacancies and jobs

2. Main points for February to April 2019

- The UK employment rate was estimated at 76.1%, higher than a year earlier (75.6%) and the joint-highest on record.
- The UK unemployment rate was estimated at 3.8%; it has not been lower since October to December 1974.
- The UK economic inactivity rate was estimated at 20.8%, lower than a year earlier (21.0%) and close to a record low.
- Excluding bonuses, average weekly earnings for employees in Great Britain were estimated to have increased by 3.4%, before adjusting for inflation, and by 1.5%, after adjusting for inflation, compared with a year earlier.
- Including bonuses, average weekly earnings for employees in Great Britain were estimated to have increased by 3.1%, before adjusting for inflation, and by 1.2%, after adjusting for inflation, compared with a year earlier.

The data in this bulletin come from surveys of households and businesses. It is not possible to survey every household and business each month, so these statistics are estimates based on samples.

3. Analysis

Employment

Figure 1: Employment rate for women was 72.0%, the highest on record

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Figure 1: Employment rate for women was 72.0%, the highest on record

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

<u>Employment</u> measures the number of people aged 16 years and over in paid work. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work.

Estimated employment rates for men and women aged between 16 and 64 years have been generally increasing since early 2012. For February to April 2019, the estimated employment rate:

- for all people was 76.1%, the joint-highest since comparable records began in 1971
- for men was 80.3%; slightly higher than a year earlier (80.0%)
- for women was 72.0%, the highest since comparable records began in 1971

The increase in the employment rate for women in recent years is due partly to changes to the State Pension age for women, resulting in fewer women retiring between the ages of 60 and 65 years.

Estimates for February to April 2019 show 32.75 million people aged 16 years and over in employment, 357,000 more than for a year earlier. This annual increase of 357,000 was due entirely to more people working full-time (up 402,000 on the year to reach 24.15 million). Part-time working showed a fall of 45,000 on the year to reach 8.60 million.

More information about employment can be found in the <u>Employment in the UK bulletin</u>, published alongside this release.

Unemployment

Figure 2: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to February to April 2019

Figure 2: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is the proportion of all employed and unemployed people (not the proportion of the total population) who are unemployed.

Estimated unemployment rates for both men and women aged 16 years and over have been generally falling since late 2013.

For February to April 2019, the estimated unemployment rate:

- for everyone was 3.8%; it has not been lower since October to December 1974
- for men was 4.0%, slightly lower than a year earlier (4.3%)
- for women was 3.7%, the joint-lowest since comparable records began in 1971

For February to April 2019, an estimated 1.30 million people were unemployed, 112,000 fewer than a year earlier and 857,000 fewer than five years earlier. Looking in more detail at this fall of 857,000 unemployed people over the last five years:

- people unemployed for up to 6 months fell by 249,000 to 779,000
- people out of work for between 6 and 12 months fell by 162,000 to 178,000
- the largest fall was for people unemployed for over one year (down 446,000 to 347,000)

More information about unemployment can be found in the <u>Employment in the UK bulletin</u>, published alongside this release.

Economic inactivity

Figure 3: Economic inactivity rate for women has fallen to a record low of 25.2%

UK economic inactivity rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Figure 3: Economic inactivity rate for women has fallen to a record low of 25.2%

UK economic inactivity rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics – Labour Force Survey

<u>Economic inactivity</u> measures people without a job but who are not classed as unemployed because they have not been actively seeking work within the last four weeks and/or they are unable to start work within the next two weeks. Our headline measure of economic inactivity is for those aged from 16 to 64 years.

Since comparable records began in 1971, the economic inactivity rate for all people aged from 16 to 64 years has been generally falling (although it increased during recessions). This is due to a gradual fall in the economic inactivity rate for women.

For people aged from 16 to 64 years, for February to April 2019, the estimated economic inactivity rate:

- for all people was 20.8%, close to a record low
- for men was 16.3%
- for women was 25.2%, the lowest since comparable records began in 1971

Estimates for February to April 2019 showed 8.58 million people aged from 16 to 64 years not in the labour force (economically inactive). This was:

- 87,000 fewer than a year earlier
- 381,000 fewer than five years earlier

More information about economic inactivity can be found in the <u>Employment in the UK bulletin</u>, published alongside this release.

Earnings growth

Figure 4: Pay for employees (including bonuses) increased by 1.2% on the year when adjusted for inflation

Great Britain average weekly earnings annual growth rates, seasonally adjusted, January to March 2001 to February to April 2019

Figure 4: Pay for employees (including bonuses) increased by 1.2% on the year when adjusted for inflation

Great Britain average weekly earnings annual growth rates, seasonally adjusted, January to March 2001 to February to April 2019

Source: Office for National Statistics - Monthly Wages and Salaries Survey

The <u>earnings estimates</u> are not just a measure of pay rises as they also reflect changes in the number of paid hours worked and changes in the structure of the workforce; for example, more high-paid jobs would have an upward effect on earnings growth rates.

Pay in real terms is calculated as nominal average weekly earnings, deflated by the <u>Consumer Prices Indexincluding owner occupiers' housing costs (CPIH)</u>.

Between February to April 2018 and February to April 2019 for employees in Great Britain:

- regular pay was estimated to have increased by 3.4% in nominal terms and by 1.5% in real terms
- total pay was estimated to have increased by 3.1% in nominal terms and by 1.2% in real terms

More information about earnings growth can be found in the <u>Average weekly earnings in Great Britain</u> bulletin, published alongside this release.

Vacancies

Figure 5: The number of vacancies in the UK has been generally increasing since 2012 although it has been falling since early 2019

Number of vacancies in the UK, seasonally adjusted, April to June 2001 to March to May 2019

Figure 5: The number of vacancies in the UK has been generally increasing since 2012 although it has been falling since early 2019

Number of vacancies in the UK, seasonally adjusted, April to June 2001 to March to May 2019

Source: Office for National Statistics - Vacancy Survey

The estimated <u>number of vacancies</u> in the UK fell sharply during the recession of 2008 to 2009. Since 2012, it has generally increased although it has been falling since early 2019. For March to May 2019, there were an estimated 837,000 vacancies in the UK, 11,000 more than a year earlier but 12,000 fewer than for the previous quarter (December 2018 to February 2019).

More information about vacancies can be found in the <u>Vacancies and jobs in the UK bulletin</u>, published alongside this release.

4. Data

Summary of labour market statistics

Dataset A01 | Released 11 June 2019

Estimates of employment, unemployment and other employment-related statistics for the UK.

Employment, unemployment and economic inactivity

Dataset A02 SA | Released 11 June 2019

Estimates of UK employment, unemployment and inactivity for people aged 16 years and over and people aged from 16 to 64 years based on the Labour Force Survey.

Average weekly earnings

Dataset EARN01 | Released 11 June 2019

Estimates of Great Britain earnings growth based on the Monthly Wages and Salaries Survey.

Vacancies by industry

Dataset VACS02 | Released 11 June 2019

Estimates of the number of UK job vacancies for each industry based on a survey of businesses.

Table 1: Summary of UK employment estimates for February to April 2019, seasonally adjusted

	Estimate (seasonally adjusted)	Sampling variability of estimate (1)	Change on quarter	Sampling variability of change on quarter (1)	Change on year	Sampling variability of change on year (1)
Employment (thousands of people aged 16 years and over)	32,746	± 174	32	± 149	357	± 235
Employment rate (%, aged 16 to 64 years)	76.1%	± 0.4	0.0	± 0.3	0.5	± 0.5
Unemployment (thousands of people aged 16 years and over)	1,304	± 67	-34	± 73	-112	± 95
Unemployment rate (%, aged 16 years and over)	3.8%	± 0.2	-0.1	± 0.2	-0.4	± 0.3
Economically inactive (thousands of people aged 16 to 64 years)	8,581	± 153	32	± 133	-87	± 206
Economic inactivity rate (%, aged 16 to 64 years)	20.8%	± 0.4	0.1	± 0.3	-0.3	± 0.5

Source: Office for National Statistics - Labour Force Survey

Notes

1. The sampling variability estimates are for 95% confidence intervals and are calculated on data that are not seasonally adjusted. Back to table

Table 2: Summary of employee earnings, Great Britain, February to April 2019, seasonally adjusted

	Annual growth rate (estimate)	Sampling variability of growth rate (1)
Total pay (nominal)	3.1	± 0.5
Total pay (real)	1.2	
Regular pay (nominal)	3.4	± 0.5
Regular pay (real)	1.5	

Source: Office for National Statistics - Monthly Wages and Salaries Survey

Notes

1. The sampling variability estimates are for 95% confidence intervals (where we are 95% certain the true value lies within the specified range) and are calculated on not seasonally adjusted data for single month growth rates for the 12 months from January to December 2014. It is not possible to calculate confidence intervals for growth rates in real terms. Back to table

5. Glossary

Average weekly earnings

<u>Average weekly earnings</u> measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises as they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged from 16 to 64 years who are not in the labour force.

Employment

<u>Employment</u> measures the number of people in paid work and differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work.

Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Vacancies

<u>Vacancies</u> are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey – a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

A more detailed Glossary is available.

6. Measuring the data

The employment, unemployment and economic inactivity estimates rely on data collected from the Labour Force Survey (a survey run by field interviewers with people across the UK every month).

The <u>Labour Force Survey performance and quality monitoring reports</u> provide data on response rates and other quality-related issues for the Labour Force Survey (LFS), including breakdowns of response by LFS wave, region and by question-specific response issues.

The average weekly earnings and vacancies estimates rely on data collected from surveys of employers.

The following Quality and Methodology Information (QMI) reports pull together important qualitative information on the various dimensions of data quality, as well as providing a summary of the methods used to compile the output:

- Labour Force Survey Quality and Methodology Information
- Average weekly earnings (AWE) Quality and Methodology Information
- Vacancy Survey Quality and Methodology Information

7. Strengths and limitations

Accuracy of the statistics: estimating and reporting uncertainty

The figures in this bulletin come from surveys, which gather information from a sample rather than from the whole population. The sample is designed to be as accurate as possible given practical limitations such as time and cost constraints. Results from sample surveys are always estimates, not precise figures. This can have an impact on how changes in the estimates should be interpreted, especially for short-term comparisons.

As the number of people available in the sample gets smaller, the variability of the estimates that we can make from that sample size gets larger. Estimates for small groups (for example, unemployed people aged from 16 to 17 years), which are based on quite small subsets of the Labour Force Survey sample, are less reliable and tend to be more volatile than for larger aggregated groups (for example, the total number of unemployed people).

In general, changes in the numbers (and especially the rates) reported in this bulletin between three-month periods are small, and are not usually greater than the level that can be explained by sampling variability. Short-term movements in reported rates should be considered alongside longer-term patterns in the series and corresponding movements in other sources to give a fuller picture.

Further information is available in A guide to labour market statistics.

Where to find data about uncertainty and reliability

<u>Dataset A11</u> shows sampling variabilities for estimates derived from the Labour Force Survey.

Sampling variability information for average weekly earnings growth rates is available from the "Sampling Variability" worksheets within <u>datasets EARN01</u> and <u>EARN03</u>.

The sampling variability of the three-month average vacancies level is around plus or minus 1.5% of that level. Information on revisions is available in the <u>labour market statistics revisions policy</u>.

8. More about the labour market

Trends in self-employment in the UK

Article | Released 7 February 2018

Analysing the characteristics, income and wealth of the self-employed.

Sickness absence in the labour market

Article | Released 30 July 2018

The latest figures for 2017 show that the average number of sickness absence days that UK workers take has almost halved since 1993.

People who have never worked

Article | Released 28 February 2019

Analysis of the number of people who have never done paid work, their reasons for not working and some of their personal characteristics.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

^{1.} The Labour Force Survey (LFS) is a survey of households in the UK.

^{2.} The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

^{3.} The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

^{4.} The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

 $1. \ The \ split \ between \ full-time \ and \ part-time \ employment \ is \ based \ on \ respondents' \ self-classification.$ This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
 These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.
 The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.

Source: returns from public sector organisations

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods. Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods. Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector back to the start of the time series in March 1999.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- 1. Estimated as the difference between LFS total employment and the data from public sector organisations.
- 2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
- 3. This series excludes locally engaged staff stationed outside the United Kingdom.
- 4. This series excludes the Northern Ireland Civil Service.
- 5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

Workforce jobs enquiries 01633 456776

Sources: Employer surveys, Labour Force Survey and administrative sources

^{1.} Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

^{2.} This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

Source: Labour Force Surve

Labour market statistics enquiries: labour.market@ons.gov.uk

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

^{1.} The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

^{2.} This series consists of all 27 EU member states excluding the UK. This series equals the sum of EU14, EU8, EU2 and Other EU.

^{3.} Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

^{4.} Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.

^{5.} Romania and Bulgaria.

^{6.} Cyprus, Malta and Croatia

^{7.} Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania

^{1.} The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

^{2.} This series consists of all 27 EU member states excluding the UK.

^{3.} This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

UNEMPLOYMENT 9(1) Unemployment by age and duration

Source: Labour Force Survey

^{1.} Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:
https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest

^{2.} People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

^{3.} Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Estimates of total pay include bonuses but exclude arrears of pay.
 The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period.

^{3.} The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

Earnings enquiries: 01633 456120 Email: earnings@ons.gov.uk

^{1.} Estimates of total pay include bonuses but exclude arrears of pay.

^{2.} The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

^{3.} Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Sources: EUROSTAT, OECD, national statistical offices. Labour market statistics enquiries: labour.market@ons.gov.uk

(*) Note: The UK rates shown in this table are as published by EUROSTAT (the EUs statistical office). See Table 1 for the latest rates for the UK as published by ONS.

- 1. All employment rates shown in this table are for those aged from 15 to 64 except for the rate for the United States published by OECD which are for those aged from 16 to 64.
- 2. The employment rates for the EU are published by EUROSTAT and are not seasonally adjusted. EUROSTAT do not publish seasonally adjusted (SA) employment rates but SA rates for some EU countries are published by OECD. These OECD employment rates are available on our website at dataset A10.
- 3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data. A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates shown in this table are seasonally adjusted.
- 4. The "Total EU" series consist of all 28 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia and Spain.
- 5. The EU unemployment rates are as published on the EUROSTAT database. For Sweden the rates on the database differ from those shown in the EUROSTAT News Release published on 04 June 2019. This is because the figures for Sweden on the database are seasonally adjusted estimates but the figures for Sweden shown in the News Release are the trend component.

Labour disputes enquiries 01633 455400

- 1. Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
- 2. Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.
- 3. The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace. HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.
