Next release:  
9 August 2019

## Table of contents

1. [Main points](#)
2. [Things you need to know about this release](#)
3. [Three-month on three-month services growth](#)
4. [Month-on-month services growth](#)
5. [Three-month on a year ago services growth](#)
6. [Links to related statistics](#)
7. [Upcoming releases](#)
8. [Quality and methodology](#)

# 1 . Main points

- In the three months to May 2019, services output increased by 0.3% compared with the three months ending February 2019.
- The wholesale, retail and motor trade sector made the largest contribution to this growth, contributing 0.14 percentage points, with the retail trade industry the main driver behind this.
- The Index of Services was flat between April 2019 and May 2019.
- Month-on-month growth of 0.2% in the real estate activities sector was offset by a fall of 0.4% in the information and communication activities sector.
- In the three months to May 2019, services output increased by 1.9% compared with the three months ending May 2018.

## 2 . Things you need to know about this release

The monthly Index of Services (IoS) provides a timely indicator of growth in the output of the services industries. It is the largest contributor to the output approach to the measurement of gross domestic product (GDP), accounting for 79.6% of UK GDP in 2016. Also published today (10 July 2019) is the [GDP monthly estimate, UK: May 2019](#).

This May 2019 release contains revisions from January 2019 onwards and is consistent with the [National Accounts Revisions Policy](#). The revisions up to March 2019 are consistent with those published in the [Quarterly national accounts](#) on 28 June 2019.

Please take the time to complete our [survey on the new GDP publication model](#), which was introduced in July 2018.

The current price non-seasonally adjusted estimates of industries collected by the Monthly Business Survey (MBS) can be found in the [Monthly Business Survey turnover of services industries dataset](#), which was published alongside this release. Note that the MBS turnover of services industries dataset does not contain data from Value Added Tax (VAT) returns, which have been included in the IoS.

Care should be taken when using the month-on-month growth rates as data can be volatile; longer-term growth rates and examination of the time series allow for better interpretation of the statistics.

The IoS is an important economic indicator and one of the earliest short-term measures of economic activity. It is used in the compilation of the national accounts and widely used by private and public sector institutions, particularly by the Bank of England and Her Majesty's Treasury to assist in informed decision- and policy-making.

The UK Index of Services has been designated by the [UK Statistics Authority](#) as [National Statistics](#), in accordance with the [Statistics and Registration Service Act 2007](#) and signifying compliance with the [Code of Practice for Statistics](#).

## 3 . Three-month on three-month services growth

In the three months to May 2019, services output increased by 0.3% compared with the three months ending February 2019.

Wholesale, retail and motor trade was the largest contributing sector to growth in the latest three months. It increased by 1.1% and contributed 0.14 percentage points. Figure 1 shows the three-month on three-month Index of Services (IoS) and the wholesale, retail and motor trade sector seasonally adjusted index from January 2015 to May 2019.

Growth in the wholesale, retail and motor trade sector has outperformed total IoS from January 2015 but slowed from the start of 2017 until the three months to May 2018. From that point it saw large increases over the summer months in 2018, due mainly to retail and wholesale trade. In the latest three months, the retail trade industry contributed to nearly all the growth within the sector.

**Figure 1: Services output increased by 0.3% in the three months to May 2019**

Three-month Index of Services and wholesale, retail and motor trade sector, seasonally adjusted, UK, January 2015 to May 2019

Figure 1: Services output increased by 0.3% in the three months to May 2019

Three-month Index of Services and wholesale, retail and motor trade sector, seasonally adjusted, UK, January 2015 to May 2019

Source: Office for National Statistics – Index of Services

Figure 2 shows the three-month on three-month contribution of the wholesale, retail and motor trade sector along with the other IoS sectors for the three months to May 2019.

**Figure 2: Wholesale, retail and motor trade sector contributed most to growth in the latest three months**

Contributions<sup>1</sup> to growth, seasonally adjusted, UK, three months to May 2019

Figure 2: Wholesale, retail and motor trade sector contributed most to growth in the latest three months

Contributions<sup>1</sup> to growth, seasonally adjusted, UK, three months to May 2019

Source: Office for National Statistics – Index of Services

Notes:

1. Individual contributions may not sum to the total due to rounding.
2. Percentage change.

The retail trade industry contributed to most of the growth in the wholesale, retail and motor trade sector, increasing by 1.7% and contributing 0.11 percentage points (of the 0.14 percentage points sector increase). There was growth across all stores except department stores and household goods stores; for more information please see [Retail sales, Great Britain: May 2019](#).

The information and communication sector also saw a large rise in the latest three months. The sector increased by 1.1% and contributed 0.09 percentage points. There was widespread growth within the sector, with the motion pictures, information services activities and computer programming industries all contributing to the rise.

Services growth has weakened since the three months to August 2018, which grew by 0.8%. This weakening is widespread with most of the services sectors contributing less than they did in the second half of 2018.

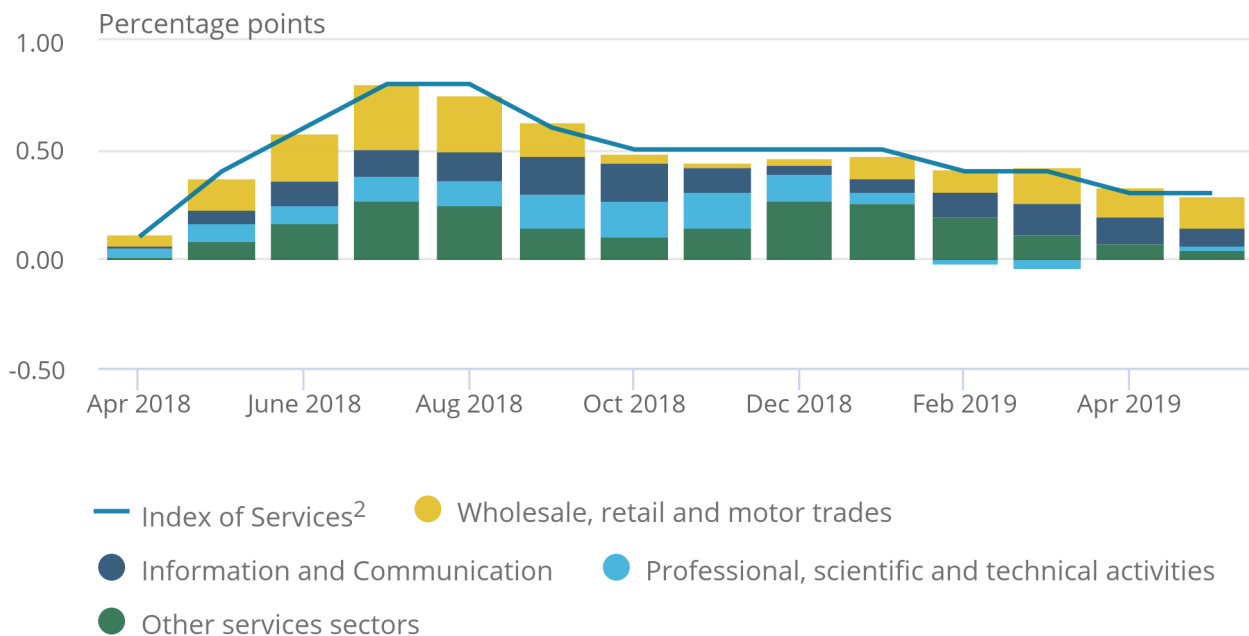

The professional, scientific and technical activities sector is one of the sectors responsible for this (Figure 3). After consistent large contributions to services growth throughout 2018, the sector weakened in January 2019 and fell in February 2019, the first time since the three months to April 2017. Several industries within the sector saw strong growth at the end of 2018 and have now seen a fallback at the start of 2019, with growth from fewer industries offsetting these falls.

**Figure 3: Services has weakened since the three months to August 2018**

Three-month Index of Services growth and sector contributions<sup>1</sup> to growth, seasonally adjusted, UK, April 2018 to May 2019

### Figure 3: Services has weakened since the three months to August 2018

Three-month Index of Services growth and sector contributions<sup>1</sup> to growth, seasonally adjusted, UK, April 2018 to May 2019

Source: Office for National Statistics – Index of Services

Notes:

1. Individual contributions may not sum to the total due to rounding.
2. Percentage change.

There has also been weakening in the other services sectors from the start of 2019. The sectors mainly responsible for this are:

- human health activities, after a large rise in Quarter 4 (Oct to Dec) 2018
- education, which saw stronger growth between December 2018 and February 2019
- real estate activities, which saw stronger growth between December 2018 and February 2019

The financial and insurance activities sector fell again in the latest three months; it decreased by 0.7% and contributed negative 0.06 percentage points. This sector has not seen positive growth since the three months to April 2017, the longest period on record without a rise.

## **4 . Month-on-month services growth**

Services output showed no growth to one decimal place in May 2019, following a rise of 0.1% in April 2019.

Figure 4 shows the month-on-month Index of Services (IoS) growth rates since January 2012 and Figure 5 shows the month-on-month contributions of each of the IoS sectors for May 2019.

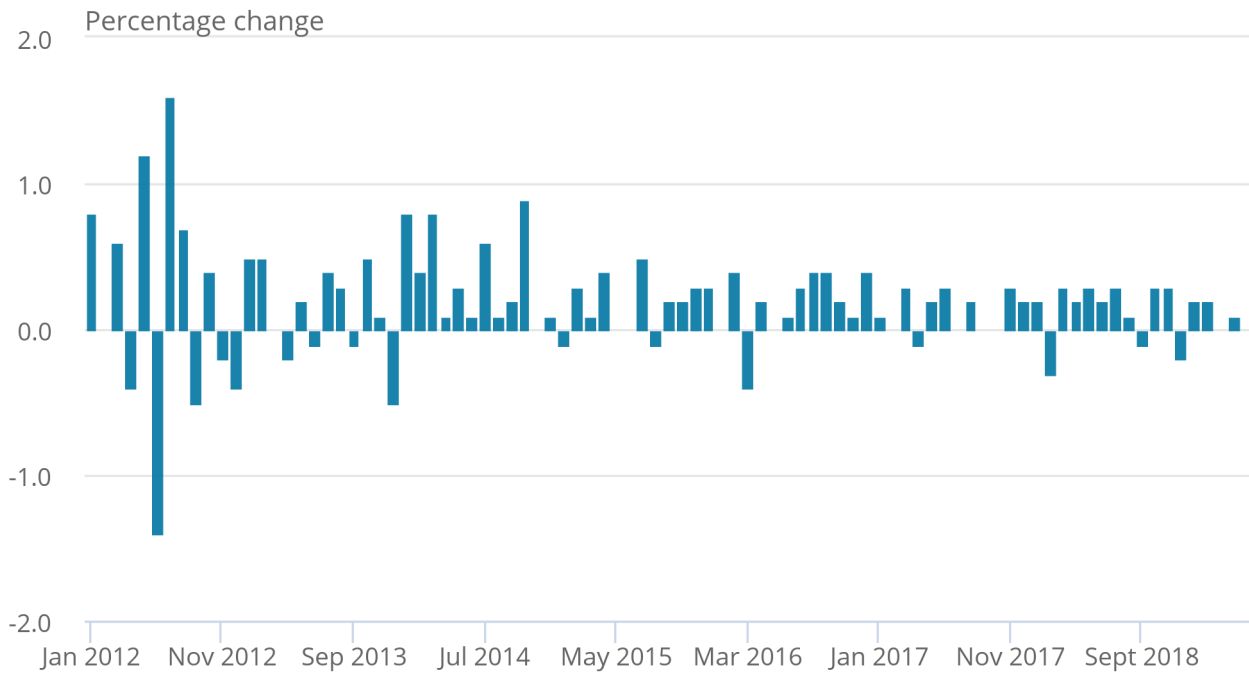

IoS growth has been muted more recently and has not seen monthly growth larger than 0.3% since December 2016 (Figure 4). Care should be taken when using the month-on-month growth rates as data can be volatile.

**Figure 4: Services has not seen monthly growth larger than 0.3% since December 2016**

Monthly Index of Services growth, seasonally adjusted, UK, January 2012 to May 2019

Figure 4: Services has not seen monthly growth larger than 0.3% since December 2016

Source: Office for National Statistics – Index of Services

## Figure 5: Growth in the real estate sector was offset by a fall in the information and communication sector

Contributions<sup>1</sup> to growth, seasonally adjusted, UK, May 2019

### Figure 5: Growth in the real estate sector was offset by a fall in the information and communication sector

Contributions<sup>1</sup> to growth, seasonally adjusted, UK, May 2019

Source: Office for National Statistics – Index of Services

#### Notes:

1. Individual contributions may not sum to the total due to rounding.
2. Percentage change.

There were more sector decreases in May 2019, with falls in 8 out of 14 sectors, while there were increases in five sectors and one sector showed no growth.

The real estate activities sector was the largest positive contributing sector. It increased by 0.2% and contributed 0.04 percentage points. The industries responsible for this rise were:

- owned and leased real estate, which increased by 0.5%, contributing 0.02 percentage points
- real estate on a fee or contract, which increased by 3.4%, contributing 0.02 percentage points

Offsetting this growth was the information and communication activities sector, which decreased by 0.4%, contributing negative 0.03 percentage points. Two industries were largely responsible for this fall and they were:

- computer programming, which decreased by 0.9%, contributing negative 0.03 percentage points
- telecommunications, which decreased by 1.5%, contributing negative 0.03 percentage points

The largest industry contribution in May 2019 came from wholesale trade, which increased by 1.2% and contributed 0.05 percentage points. Large businesses within the wholesale of fuel and wholesale on a fee or contract components were the main reason for this rise.

The other notable industry movement was a fall in advertising and market research, which followed a strong April 2019. The industry decreased by 3.9%, contributing negative 0.04 percentage points.

## 5 . Three-month on a year ago services growth

Figure 6 shows the three-month on a year ago Index of Services (IoS) growth rates since January 2015.

**Figure 6: Services output increased by 1.9% in the three months to May 2019 compared with the same period a year ago**

Three-month on a year Index of Services growth, seasonally adjusted, UK, January 2015 to May 2019

Figure 6: Services output increased by 1.9% in the three months to May 2019 compared with the same period a year ago

Three-month on a year Index of Services growth, seasonally adjusted, UK, January 2015 to May 2019

Source: Office for National Statistics – Index of Services

In the three months to May 2019, services output increased by 1.9% compared with the three months ending May 2018. This was a weakening from the three months to April 2019, which grew by 2.1%. The three-month on a year growth rate has seen little change recently, after weakening from 2.5% in the three months to July 2017.

## 6 . Links to related statistics

Alongside this publication we publish the [Index of Production \(IoP\)](#) and [Construction output in Great Britain](#), allowing for an estimate of [monthly gross domestic product \(GDP\)](#), which is also published today (10 July 2019)

On 26 March 2019, we published [Services sector performance, UK: 2008 to 2018](#). The article details the changes that have taken place in the UK services sector from 2008 to 2018. It also looks at the differences between public sector-dominated sectors and the rest of the Index of Services (IoS) and compares the growth of individual IoS sectors in more detail.

## International comparisons

International comparison with the Index of Services (IoS) is difficult, as most comparable economies do not produce equivalent estimates. [Eurostat turnover in services estimates](#) are not comparable with the IoS, as they exclude the wholesale and retail trade; furthermore, most of the estimates are only available quarterly. The [US Bureau of Economic Analysis](#) also produces services output estimates, but only on a quarterly basis, with a four-month lag time. [Japan has a direct equivalent of the IoS](#), but the estimates are not seasonally adjusted. The [closest equivalent estimates are from Canada](#), which produces a monthly output estimate of GDP with a breakdown by industry (including an aggregate for services). There are also comparable [quarterly estimates from Sweden](#) and [Ireland](#).

## 7 . Upcoming releases

### Blue Book 2019

Each year we produce an annual update to the UK National Accounts in the Blue Book and Pink Book and the associated releases. As already announced, the Blue Book and Pink Book 2019 consistent datasets will be published on 30 September 2019.

Details have already been provided on the scope in the article [Latest developments and changes to be implemented in Blue Book and Pink Book 2019](#). Indicative impacts on headline gross domestic product (GDP) components for the years 1997 to 2016 were published on 27 June 2019 in the article [Blue Book 2019 indicative impacts on GDP current price and chained volume measure estimates: 1997 to 2016](#).

This year, due to the very demanding set of changes being put through in the annual update, we are not going to fully reconcile 2017 annual data, instead producing an indicative balance to allow further time for final quality assurance of the data.

Consequently, the reference year and last base year for all chained volume measure series will remain as 2016.

## 8 . Quality and methodology

The monthly Index of Services (IoS) was developed to provide a timely indicator of growth in the output of services industries, at constant prices for the UK. The IoS is an important component of monthly output (gross domestic product output approach (GDP(O))), representing about 79.6% of UK gross domestic product (GDP) as of 2016. The IoS shares the exact same industry coverage as the corresponding quarterly series within GDP(O).

These data are used to produce seasonally adjusted estimates of output at chained volume measures (removing the effect of price changes). Unless otherwise stated, all estimates included in this release are based on seasonally adjusted data.

The IoS is compiled using data from several different sources (Table 1); this is detailed further in the [GDP\(O\) source catalogue](#). In addition, we include Value Added Tax (VAT) data across 42 Standard Industrial Classifications (SICs) for small- and medium-sized businesses. These have been used to supplement data from the Monthly Business Survey (MBS) for the period January 2016 to September 2018.

Further information on the use of [VAT data was published in the VAT turnover data in National Accounts: background and methodology](#).

The [GDP\(O\) methods and sources pages](#) provide more information on the data that underpin these statistics; of particular note is the [GDP\(O\) source catalogue](#).

Table 1: Percentage of each data source based on their gross value added weight, UK, 2016 to 2019

	Percentage
Index of Services	100.0
Monthly Business Survey <sup>1</sup> (ONS)	42.4
Retail Sales Inquiry <sup>2</sup> (ONS)	6.7
Government Expenditure (ONS)	20.1
Households Expenditure (ONS)	16.0
Finance Expenditure (ONS)	8.3
Other <sup>3</sup>	6.5

Source: Office for National Statistics – GDP(O) source catalogue

### Notes:

1. The Monthly Business Survey (MBS) data are published alongside this release in the [MBS turnover of services industries dataset](#).
2. Data relating to the retail industry are broadly comparable with [Retail sales, Great Britain: May 2019](#), published on 20 June 2019.
3. For further information on what is included within Other, please see the [GDP\(O\) source catalogue](#).

This May 2019 release contains revisions from January 2019 and is consistent with the [National Accounts Revisions Policy](#). Revisions can be made for a variety of reasons. The most common include:

- late responses to surveys and administrative sources
- forecasts being replaced by actual data
- revisions to seasonal adjustment factors, which are re-estimated every month and reviewed annually
- Her Majesty's Revenue and Customs (HMRC) VAT returns replacing MBS data for small- and medium-sized businesses when VAT estimates become available every quarter

Published alongside this release, the Index of Services [datasets](#) contain additional material, including:

- MBS response rates (current and historic)
- IoS and main component and sector indices to four decimal places
- publication tables
- revisions triangles
- lower-level time series data
- MBS turnover of services industries

The [Index of Services Quality and Methodology Information report](#) contains important information on:

- the strengths and limitations of the data and how it compares with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data
