### 2. Main points

The latest figures suggest that the jobs market is showing signs of recovery.

The number of payrolled employees has increased for the sixth consecutive month, up by 197,000 in May 2021 to 28.5 million. It is however 553,000 below levels seen before the coronavirus (COVID-19) pandemic. Since February 2020, the largest falls in payrolled employment have been in the accommodation and food services sector, people aged under 25 years, and people living in London.

These three groups have also seen the largest monthly increases but are still well below pre-pandemic levels.

Following a period of employment growth and low unemployment since the start of the pandemic, employment had generally been decreasing and unemployment increasing. However, the latest estimates (February to April 2021) continue to show signs of recovery. There was a quarterly increase in the employment rate of 0.2 percentage points to 75.2% and a quarterly decrease in the unemployment rate of 0.3 percentage points to 4.7%. The economic inactivity rate was largely unchanged on the previous quarter at 21.0%.

With the relaxation of many coronavirus restrictions, total hours worked increased on the quarter, however it is still below pre-pandemic levels. The redundancy rate decreased on the quarter and is now similar to pre-pandemic levels.

The number of job vacancies in March to May 2021 was 758,000, only 27,000 below the level before the coronavirus (COVID-19) pandemic in January to March 2020; most industries have recovered to show vacancies above pre-pandemic levels. The strongest quarterly increase was in accommodation and food services. In May 2021, the experimental monthly vacancies data, and the experimental Adzuna online vacancies data both surpassed pre-pandemic levels.

Annual growth in average employee pay has continued to increase, however this is driven by compositional effects of a fall in the number and proportion of lower-paid employee jobs and because the latest month is now compared with April 2020 when earnings were first affected by the coronavirus (COVID-19) pandemic (the base effect). Growth in average total pay (including bonuses) and regular pay (excluding bonuses) among employees was 5.6% for the three months February to April 2021.

### 3. Latest indicators at a glance

### 4. Labour market data

### Summary of labour market statistics

Dataset A01 | Released 15 June 2021

Estimates of employment, unemployment and other employment-related statistics for the UK.

### Real Time Information statistics

Dataset Real Time Information statistics | Released 15 June 2021

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (Experimental Statistics) seasonally adjusted.

### Labour Force Survey single month estimates

Dataset X01 | Released 15 June 2021

Labour Force Survey (LFS) experimental single-month estimates of employment, unemployment and economic inactivity.

### Labour Force Survey weekly estimates

Dataset X07 | Released 15 June 2021

Labour Force Survey (LFS) experimental weekly estimates of employment, unemployment, economic inactivity and hours in the UK.

View all related data on the related data page.

Alternatively, NOMIS provides free access to the most detailed and up-to-date UK labour market statistics from official sources.

### 5. Glossary

### Average weekly earnings

<u>Average weekly earnings</u> measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises as they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

### **Economic inactivity**

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

### **Employment**

<u>Employment</u> measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. A more detailed explanation is available in <u>A guide to labour market statistics</u>.

### Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

### **Vacancies**

<u>Vacancies</u> are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey; this is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

### Pay As You Earn (PAYE) Real Time Information (RTI)

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as <a href="Experimental Statistics">Experimental Statistics</a> as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

A more detailed glossary is available.

### 6. Measuring the data

Our bulletins will be shorter and more focused on the main messages and most important trends in response to user feedback. Read more on this and how to send us feedback on how our publications are evolving.

### Office for Statistics Regulation (OSR) publishing review

The Office for Statistics Regulation (OSR) is <u>undertaking a review</u> into whether the 9:30am release time stated in the Code of Practice for Statistics meets the needs of users. During the pandemic, exemptions were granted to allow the release of market sensitive statistics at 7:00am. The OSR welcomes views about the release time of official statistics by Friday 25 June 2021. Please send comments to: <u>regulation@statistics.gov.uk</u>.

### Coronavirus

For more information on how labour market data sources are affected by the coronavirus (COVID-19) pandemic, see the article published on 6 May 2020, which details some of the challenges that we have faced in producing estimates at this time.

An article published 11 December 2020 <u>compares our labour market data sources</u> and discusses some of the main differences.

Labour Force Survey (LFS) responses are weighted to official 2018-based population projections on demographic trends that pre-date the coronavirus pandemic. In our Coronavirus and the impact on payroll employment article, we analyse the population totals used in the LFS weighting process and state our intention to make adjustments. Rates published from the LFS remain robust, however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity, and disability. Consequently, recent level estimates for these measures have been temporarily suspended until they are reweighted to better account for recent population movements.

An article published on 17 May 2021 describes the <u>new LFS weighting methodology</u>, which will be applied to results from July 2021.

Our latest data and analysis on the impact of the coronavirus on the UK economy and population are available on our dedicated <u>coronavirus web page</u>. This is the hub for all special coronavirus-related publications, drawing on all available data. In response to the coronavirus pandemic, we are working to ensure that we continue to publish economic statistics. For more information, please see <u>COVID-19</u> and the production of statistics.

More information on measuring the data is available in our previous release.

### 7. Strengths and limitations

The estimates presented in this bulletin contain <u>uncertainty</u>.

Further information is available in A guide to labour market statistics.

Information on revisions is available in the Labour market statistics revisions policy.

Information on the strengths and limitations of this bulletin is available in our previous release.

Web page | Updated as and when data become available

Latest data and analysis on the coronavirus (COVID-19) in the UK and its effect on the economy and society.

### Economic activity and social change in the UK, real-time indicators

Bulletin | Released 10 June 2021

Early experimental data and analysis on economic activity and social change in the UK. These faster indicators are created using rapid response surveys, novel data sources and experimental methods.

### Business insights and impact on the UK economy

Bulletin | Released 3 June 2021

The impact of the coronavirus pandemic and EU transition period on UK businesses and the economy. Based on responses from the voluntary fortnightly business survey (BICS) about financial performance, workforce, prices, trade, and business resilience.

### Coronavirus and key workers in the UK

Article | Released 15 May 2020

Estimates of the numbers and characteristics of those who could be considered as potential key workers in the response to the coronavirus.

## Summary of labour market statistics published on 15 June 2021

Series	Reference period	Latest estimate	Last time higher	Last time lower	Comparable data begins in
Employment level (aged 16 and over)	Feb-Apr 2021	32.487 million	Sep-Nov 2020 (32.503 million)	Jan-Mar 2021 (32.476 million)	Jan-Mar 1971
Employment rate (aged 16 to 64)	Feb-Apr 2021	75.2%	Jul-Sep 2020 (75.3%)	Dec-Feb 2021 (75.1%)	Jan-Mar 1971
Unemployment level (aged 16 and over)	Feb-Apr 2021	1.613 million	Jan-Mar 2021 (1.623 million)	Jun-Aug 2020 (1.522 million)	Jan-Mar 1971
Unemployment rate (aged 16 and over)	Feb-Apr 2021	4.7%	Jan-Mar 2021 (4.8%)	Jun-Aug 2020 (4.5%)	Jan-Mar 1971
Inactivity level (aged 16 to 64)	Feb-Apr 2021	8.726 million	Jun-Aug 2018 (8.74 million)	Jan-Mar 2021 (8.712 million)	Jan-Mar 1971
Inactivity rate (aged 16 to 64)	Feb-Apr 2021	21.0%	Jul-Sep 2018 (21.1%)	Dec-Feb 2021 (20.9%)	Jan-Mar 1971
Average Earnings (total pay - nominal)	Feb-Apr 2021	5.6%	Jan-Mar 2007 (6.4%)	Jan-Mar 2021 (4.3%)	Jan-Mar 2001
Average Earnings (regular pay - nominal)	Feb-Apr 2021	5.6%	Never	Jan-Mar 2021 (4.6%)	Jan-Mar 2001
Average Earnings (total pay - real)	Feb-Apr 2021	4.4%	Feb-Apr 2001 (4.9%)	Jan-Mar 2021 (3.3%)	Jan-Mar 2001
Average Earnings (regular pay - real)	Feb-Apr 2021	4.4%	Never	Jan-Mar 2021 (3.6%)	Jan-Mar 2001
Vacancies level	Mar-May 2021	758,000	Jan-Mar 2020 (785,000)	Feb-Apr 2021 (662,000)	Apr-Jun 2001

## **Index of Tables**

The table below provides an index of the tables appearing in this Statistical Bulletin and it shows how these table numbers match up with the Excel spreadsheet datasets which are available on the website at:

https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/bulletins/uklabourmarket/June2021/relateddata

Table 17 (International comparisons of employment and unemployment) is temporarily suspended, the data presented is the latest data available on the ONS website however all the data can be found on the Eurostat, OECD, Statistics Canada and US Bureau of Statistics Table 18 (Labour Disputes) is also temporarily suspended as data collection has ceased for the foreseeable future. The data presented is the latest available.

### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

† - Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

<sup>1.</sup> The Labour Force Survey (LFS) is a survey of households in the UK.

<sup>2.</sup> The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

<sup>3.</sup> The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

<sup>4.</sup> The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

## SUMMARY

Source: Labour Force Survey

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

† - Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

Source: returns from public sector organisations

**Explanatory Note:** The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in England are included in the public sector form September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- 1. Estimated as the difference between LFS total employment and the data from public sector organisations.
- 2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
- 3. This series excludes locally engaged staff stationed outside the United Kingdom.

Source: Labour Force Survey

<sup>1</sup> Main and second job

<sup>2</sup> Total actual weekly hours worked including paid and unpaid overtime.3 Main job only. The split between full-time and part-time employment is based on respondents' self-classification.

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

Jan-Mar 2021†

Change on year

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

-1.2

† - Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability. Consequently recent level estimates for these measures have been temporarily suspended until they are reweighted to better account for recent population movements.

<sup>1.</sup> The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

<sup>2.</sup> This series consists of all 27 EU member states excluding the UK. This series equals the sum of EU14, EU8, EU2 and Other EU. Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.
 Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.
 Romania and Bulgaria.

<sup>6.</sup> Cyprus, Malta and Croatia

<sup>7.</sup> Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania

## **NON-UK WORKERS**

† - Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability. Consequently recent level estimates for these measures have been temporarily suspended until they are reweighted to better account for recent population movements.

<sup>1.</sup> The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

This series consists of all 27 EU member states excluding the UK.

<sup>3.</sup> This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Source: Labour Force Survey  $Labour\ market\ statistics\ enquiries: labour.market @ons.gov.uk$ 

† - Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

Source: Labour Force Survey

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

Data source: Labour Force Survey

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

## ECONOMIC ACTIVITY AND INACTIVITY

Data Source: Labour Force Survey.

<sup>1.</sup> Discouraged workers are those who are not looking for work because they believe no jobs are available.

<sup>2.</sup> Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

Earnings enquiries: 01633 456120 Email: earnings@ons.gov.uk

<sup>1.</sup> Estimates of total pay include bonuses but exclude arrears of pay.

<sup>2.</sup> The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

<sup>3.</sup> Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Sources: EUROSTAT, OECD, national statistical offices. Labour market statistics enquiries: labour.market@ons.gov.uk

(\*) Note: The UK rates shown in this table are as published by EUROSTAT (the EUs statistical office). See Table 1 for the latest rates for the UK as published by ONS.

Caution should be taken with international comparisons of labour markets during the COVID-19 pandemic, since definitions of economic measures, such as furloughing, will vary between countries.

- 1. All employment rates shown in this table are for those aged from 15 to 64 except for the united States published by OECD which are for those aged from 16 to 64.
- 2. The employment rates for the EU are published by EUROSTAT and are not seasonally adjusted. EUROSTAT do not publish seasonally adjusted (SA) employment rates but SA rates for some EU countries are published by OECD. These OECD employment rates are available on our website at dataset A10.
- 3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data. A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates shown in this table are seasonally adjusted.
- 4. The "Total EU" series consist of all 27 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia and Spain.
- 5. The EU unemployment rates are as published on the EUROSTAT database. For Sweden the rates on the database differ from those shown in the EUROSTAT News Release published on 8 December 2020. This is because the figures for Sweden on the database are seasonally adjusted estimates but the figures for Sweden shown in the News Release are the trend component.

Relationship between columns 1=2+3: 4=5+6

Data source: ONS Labour Disputes Survey

Labour disputes enquiries 01633 455400

- 1. Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
- 2. Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.
- 3. The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

Vacancy Survey enquiries: vacancy.survey@ons.gov.uk, 01633 456777

<sup>\*</sup> Change on previous non-overlapping three month rolling average time period.

<sup>1.</sup> Excludes Agriculture, Forestry and Fishing.

<sup>2.</sup> Unemployment estimates are produced from the Labour Force Survey (LFS) and are always one period behind the ONS Vacancy Survey estimates. This table therefore shows estimates for the same periods as shown in table 1 (which shows LFS estimates).

<sup>3.</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution.

Data source: Labour Force Survey

<sup>1.</sup> The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted

<sup>2.</sup> The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

<sup>† -</sup> Labour Force Survey (LFS) responses are weighted to official population projections. As the current projections are 2018-based they are based on demographic trends that pre-date the COVID-19 pandemic. We are analysing the population totals used in the weighting process and intend to make adjustments where appropriate. Rates published from the LFS remain robust; however, levels and changes in levels should be used with caution. This will particularly affect estimates for country of birth, nationality, ethnicity and disability.

The Labour Force Survey is tabulated by region of residence.

Source: Labour Force Survey

<sup>1.</sup> Economically active = Employment plus Unemployment.

<sup>2.</sup> Denominator = all persons aged 16 to 64.

<sup>3.</sup> Denominator = total economically active

### **REGIONAL SUMMARY**

## 23(2) Regional summary of Workforce Jobs

Thousands, seasonally adjusted

			Change on December
Area Codes	Area Names	March 2021	2020
K02000001	United Kingdom	34,564	151
K03000001	Great Britain	33,684	159
E92000001	England	29,571	172
E12000001	North East	1,183	4
E12000002	North West	3,722	13
E12000003	Yorkshire and The Humber	2,729	20
E12000004	East Midlands	2,354	-20
E12000005	West Midlands	2,893	38
E12000006	East	3,110	-18
E12000007	London	5,841	59
E12000008	South East	4,845	63
E12000009	South West	2,893	14
W92000004	Wales	1,438	0
S92000003	Scotland	2,675	-14
N92000002	Northern Ireland	874	-8

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.
