2. Main points

The latest Labour Force Survey (LFS) estimates for March to May 2022 show that over the quarter, there was an increase in the employment rate, while unemployment and economic inactivity rates decreased.

The UK employment rate increased by 0.4 percentage points on the quarter to 75.9%, but is still below precoronavirus (COVID-19) pandemic levels. The number of full-time employees increased during the latest three-month period to a record high. Part-time employees also increased during the latest three-month period, continuing to show a recovery from the large falls in the early stages of the coronavirus pandemic. The number of self-employed workers fell during the coronavirus pandemic and has remained low, although the number has increased during the latest three-month period. The increase was driven by part-time self-employed, and was largely offset by a decrease in the number of full-time self-employed.

The most timely estimate of payrolled employees for June 2022 shows a monthly increase, up 31,000 on the revised May 2022 figures, to a record 29.6 million.

The unemployment rate for March to May 2022 decreased by 0.1 percentage points on the quarter to 3.8%. Those unemployed for up to six months increased over the latest three-month period at the fastest rate since late 2020.

The economic inactivity rate decreased by 0.4 percentage points to 21.1% in March to May 2022. Since the start of the coronavirus pandemic, the increases in economic inactivity were driven by those who were economically inactive and who did not want a job. This group have now also driven the quarterly decrease during the latest period.

The number of job vacancies in April to June 2022 rose to 1,294,000. However, the rate of growth in vacancies continued to slow down.

Growth in employees' average total pay (including bonuses) was 6.2% and growth in regular pay (excluding bonuses) was 4.3% in March to May 2022. In real terms (adjusted for inflation), over the year, total pay fell by 0.9% and regular pay fell by 2.8%. Note, we are comparing the latest period with a period where certain sectors (accommodation and food service activities, and wholesale and retail) had employees on furlough as a result of the winter 2020 to 2021 lockdown. Therefore, a small amount of base effect will be present for these sectors, but not to the degree we saw when comparing with periods at the start of the coronavirus (COVID-19) pandemic.

4. Labour market data

Summary of labour market statistics

Dataset A01 | Released 19 July 2022

Estimates of employment, unemployment and other employment-related statistics for the UK.

Real Time Information statistics

Dataset | Released 19 July 2022

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (Experimental Statistics), seasonally adjusted.

Labour Force Survey single-month estimates

Dataset X01 | Released 19 July 2022

LFS experimental single-month estimates of employment, unemployment and economic inactivity.

A guide to labour market data

Methodology | Released 15 December 2021

Summary of labour market datasets providing estimates of employment, unemployment, average weekly earnings and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on our related data page.

Alternatively, Nomis provides free access to the most detailed and up-to-date UK labour market statistics.

5. Glossary

Average weekly earnings

<u>Average weekly earnings</u> measure money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises because they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment.

Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Vacancies

<u>Vacancies</u> are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey; this is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

Pay As You Earn (PAYE) Real Time Information (RTI)

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as Experimental Statistics as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

A more detailed glossary is available in our Guide to labour market statistics.

6. Measuring the data

Our <u>Comparison of labour market data sources article</u> compares data sources and discusses some of the main differences.

Coronavirus

For more information on how labour market data sources are affected by the coronavirus (COVID-19) pandemic, see our Coronavirus and the effects on UK labour market statistics article.

Our latest data and analysis on the impact of coronavirus on the UK economy and population are available on our dedicated <u>Coronavirus web page</u>. This is a hub for all special coronavirus-related publications, drawing on all available data. In response to the developing coronavirus pandemic, we are working to ensure that we continue to publish economic statistics. For more information, please see our <u>COVID-19 and the production of statistics</u> webpage.

Labour Force Survey reweighting

Labour Force Survey (LFS) estimates published on 14 June 2022 have been reweighted for periods from January to March 2020, using updated Pay As You Earn (PAYE) Real Time Information (RTI) data. This uses the same method of applying growth rates from PAYE RTI data as that implemented in July 2021. The non-response bias adjustment, previously implemented for England, Wales and Scotland data, has now also been applied to Northern Ireland data. Our Impact of reweighting on Labour Force Survey key indicators: 2022 article explains the impact and gives a more detailed reweighting timeline.

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments, and labour market statistics.

Further information about NSCASE is available.

Making our published spreadsheets accessible

Following the <u>Government Statistical Service (GSS)</u> guidance on releasing statistics in <u>spreadsheets</u>, we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing sample versions of a selection of our tables, and where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email <u>labour.market@ons.gov.uk</u>.

Consultation on release practices

The Office for Statistics Regulation (OSR) has finalised its consultation on release practices. The Office for National Statistics (ONS) has welcomed the findings in a statement on the ONS's response to the OSR's proposal s, specifically noting that the release-time exemptions, which were granted during the coronavirus pandemic, are now incorporated into the revised Code of Practice. As such, the monthly labour market bulletin will continue to be published at 7am.

Occupational data in ONS surveys

The Office for National Statistics (ONS) has identified an issue with the collection of some occupational data in a number of our surveys, including the Labour Force Survey (LFS) and Annual Population Survey (APS), which are used in the production of the Labour Market publication. While we estimate any impacts will be small overall, this will affect the accuracy of the breakdowns of some detailed (4-digit Standard Occupational Classification (SOC)) occupations, and data derived from them. Although the majority are unaffected, we are urging caution in the interpretation of these detailed data as we resolve the issue.

None of our headline statistics, other than those directly sourced from occupational data, are affected and you can continue to rely on their accuracy. This issue does not affect Census 2021 or the Coronavirus (COVID-19) Infection Survey in any way. For more information , see our <u>statement on occupational data in ONS social surveys</u>

7. Strengths and limitations

The estimates presented in this bulletin contain uncertainty.

Further information is available in our Guide to labour market statistics.

Information on revisions is available in our Labour market statistics revisions policy.

Information on the strengths and limitations of this bulletin is available in our previous bulletin.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

^{1.} The Labour Force Survey (LFS) is a survey of households in the UK.

^{2.} The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

^{3.} The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

^{4.} The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Labour market statistics enquines: below market statistics enquines: below market@ons.gov.uk
non-overlapping 3-month average time period (eg., compare Apr-Jun with Jan-Mar, not with
Mar-May).

1. The spit between full-time and part-time employment is based on respondents' self-classification.

2. This series does not include all people on these programmes; it only includes those engaging in any form
of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the
sum of the other columns in this section of the table.

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods. Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland pic is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to

March 2004, when it is included in the private sector). Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods. Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods. Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods. Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- Estimated as the difference between LFS total employment and the data from public sector organisations.
 LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
 This series excludes locally engaged staff stationed outside the United Kingdom.
 This series excludes the Northern Ireland Civil Service.
 This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.
 Labour Force Survey (LFS) responses have been reweighted for periods from January to March 2020 using updated HM Revenue and Customs (HMRC) Real Time Information (RTI) data. The non-response bias adjustment, previously implemented for England, Wales and Scotland data, has now also been applied to Northern Ireland data. Our Impact of reweighting on Labour Force Survey key indicators: 2022 article gives more information on the reweighting exercise.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at:

Workforce jobs enquiries 01633 456776 Sources: Employer surveys, Labour Force Survey and administrative sources

^{1.} On 14 June 2022, data from our Labour Force Survey (LFS) was reweighted. The Workforce Jobs estimates, which include some data from LFS, published on 14 June 2022 are based on previous weights. Workforce Jobs estimates will be revised on 13 September 2022.

^{2.} Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

3. The employee jobs data relate to the March 2020 period before reported cases of the coronavirus (COVID-19) in the UK. Self-employment jobs relate to the period February-April 2020 which includes self-employment jobs before and after COVID-19 measures were implemented.

^{4.} This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

^{1.} The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

() Labour Force Survey (LFS) responses have been reweighted for periods from January to March 2020 using updated MM Revenue and Customs (MMRC) Real Time Information (RTI) data. The non-response bias adjustment, previously implemented for England, Wales and Scotland data, has now also been applied to Northern Indiand data. Our Impact of wassigned and Labour Force Survey by reference 2022 adds gives now information on his newlighting exercise.

This series consists of all 27 EU member states. This series equals the sum of EU14, EU8, EU2 and Other EU.

^{1.} The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series

This series consists of all 27 EU member states.

This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included an employment and unemployment estimates.

[[]I Labour Force Survey (ES) responses have been reveighted for periods from January to March 2020 using updated HM Revenue and Customs (HMRI Real Time Information (RTI) data. Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg,compare Apr-Jun with Jan-Mar,not with Mar-May)

¹ Denominator = economically active for that age group.

^{*} Sample size too small for reliable estimate.

Labour market statistics enquiries: labour.market@ons.gov.uk

Discouraged workers are those who are not looking for work because they believe no jobs are available.
 Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

^{1.} Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

^{2.} People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

^{3.} Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Earnings enquiries: 01633 456120 Email: earnings@ons.gov.uk

^{1.} Estimates of total pay include bonuses but exclude arrears of pay.

^{2.} The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

^{3.} Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Relationship between columns 1=2+3: 4=5+6

Data source: ONS Labour Disputes Survey Labour disputes enquiries 01633 455400

Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
 Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.
 The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

Vacancy Survey enquiries: vacancy.survey@ons.gov.uk, 01633 456777

^{*} Change on previous non-overlapping three month rolling average time period.

^{1.} Excludes Agriculture, Forestry and Fishing.

^{2.} Unemployment estimates are produced from the Labour Force Survey (LFS) and are always one period behind the ONS Vacancy Survey estimates. This table therefore shows estimates for the same periods as shown in table 1 (which shows LFS estimates).

Data source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

^{1.} The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

^{2.} The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

Change on quarter (change since December - February 2022)

Note: Changes on quarter at regional level are particularly subject to sampling variability and should be interpreted in the context of changes over several quarters rather than in isolation.

Labour market statistics enquiries: labour.supply

Denominator = all persons aged 16 to 64.

Denominator = total economically active

The non-response bias adjustment, previously implemented for England, Wales and Scotland data, has now also been applied to Northern Ireland data.

REGIONAL SUMMARY Not yet updated with new LFS weights

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.

^{1.} The LFS components of the Workforce Jobs estimates for Northern Ireland have not had the non-response bias adjustment from the recent reweighting fully applied. Workforce Jobs estimates will be revised on 13 September 2022.
