1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 9.2% in the 12 months to December 2022, down from 9.3% in November.
- The largest upward contributions to the annual CPIH inflation rate in December 2022 came from housing and household services (principally from electricity, gas, and other fuels), and food and non-alcoholic beverages.
- On a monthly basis, CPIH rose by 0.4% in December 2022, compared with a rise of 0.5% in December 2021.
- The Consumer Prices Index (CPI) rose by 10.5% in the 12 months to December 2022, down from 10.7% in November.
- On a monthly basis, CPI rose by 0.4% in December 2022, compared with a rise of 0.5% in December 2021.
- The largest downward contribution to the change in both the CPIH and CPI annual inflation rates between November and December 2022 came from transport (particularly motor fuels), clothing and footwear, and recreation and culture, with rising prices in restaurants and hotels, and food and non-alcoholic beverages making the largest partially offsetting upward contributions.

2 . Consumer price inflation rates

Table 1: CPIH, OOH component and CPI index values, and annual and monthly rates
UK, December 2021 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.
2. OOH is owner occupiers' housing costs.,CPI is the Consumer Prices Index.

Figure 1: Annual CPIH and CPI inflation rates ease slightly in December 2022

CPIH, OOH component and CPI annual inflation rates for the last 10 years, UK, December 2012 to December 2022

Figure 1: Annual CPIH and CPI inflation rates ease slightly in December 2022

CPIH, OOH component and CPI annual inflation rates for the last 10 years, UK, December 2012 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.
2. OOH is owner occupiers' housing costs.
3. CPI is Consumer Prices Index.

The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 9.2% in the 12 months to December 2022, down from 9.3% in November and 9.6% in October. [Indicative modelled consumer price inflation estimates](#) suggest that the October rate was the highest rate in over 40 years (the CPIH National Statistic series begins in January 2006). In the most recent month however, the CPIH annual rate was equal to the rate recorded just over 30 years earlier, between September and December 1990. The 0.1 percentage point fall in the annual rate between November and December 2022 came as a result of prices rising by less on the month than they did a year earlier: 0.4% in the month to December 2022, compared with 0.5% a year earlier.

The Consumer Prices Index (CPI) rose by 10.5% in the 12 months to December 2022, down from 10.7% in November and 11.1% in October. [Indicative modelled consumer price inflation estimates](#) suggest that the CPI rate would have last been higher than the October 2022 figure in 1981 (the CPI National Statistic series begins in January 1989). The slowing in the CPI rate between November and December came as a result of CPI prices rising 0.4% in the month to December 2022, compared with a larger rise of 0.5% a year earlier.

The main drivers of the annual inflation rate for CPIH and CPI are the same where they are common to both measures. However, the owner occupiers' housing costs (OOH) component accounts for around 17% of the CPIH and is the main driver for differences between the CPIH and CPI inflation rates. This makes CPIH our most comprehensive measure of inflation, and it is covered in more detail in [Section 4](#) in this bulletin, while [Section 5](#) provides commentary on the CPI. [Section 3](#) covers both CPIH and CPI, though the figures reflect CPIH.

3 . Notable movements in prices

The easing in the annual inflation rate in December 2022 principally reflected price changes in the transport division, particularly for motor fuels. There were also downward effects from clothing and footwear, and recreation and culture. The largest, partially offsetting, upward effects came from restaurants and hotels, and food and non-alcoholic beverages.

Table 2: CPIH annual and monthly inflation rates by division
UK, December 2021, November 2022, and December 2022

	CPIH 12-month rate		CPIH 1-month rate	
	November 2022	December 2022	December 2021	December 2022
CPIH All items	9.3	9.2	0.5	0.4
Food and non-alcoholic beverages	16.5	16.9	1.3	1.6
Alcohol and tobacco	4.2	3.8	-0.7	-1.1
Clothing and footwear	7.5	6.4	0.7	-0.3
Housing and household services	11.7	11.7	0.2	0.3
of which owner occupiers' housing costs	3.7	3.8	0.4	0.4

Source: Office for National Statistics – Consumer price inflation

Notes

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

Transport

The annual inflation rate for transport was 6.9% in December 2022, down for a sixth consecutive month from a peak of 15.2% in June 2022, and the lowest rate since May 2021. The main driver behind the easing in the rate between November and December 2022 came from motor fuels, which was partially offset by rising transport services prices.

Figure 2: Transport inflation rate eases in December 2022

CPIH, transport and motor fuels annual inflation rates, UK, December 2012 to December 2022

Figure 2: Transport inflation rate eases in December 2022

CPIH, transport and motor fuels annual inflation rates, UK, December 2012 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

Overall, fuel prices rose by 11.5% in the year to December 2022, down from 17.2% in the year to November. Average petrol prices were unchanged between November and December last year, but fell by 8.3 pence per litre between the same two months of 2022. Diesel prices also contributed to the change in the rate, falling by 8.8 pence per litre this year, compared with a smaller fall of 0.1 pence per litre a year ago. Average petrol and diesel prices stood at 155.3 and 179.1 pence per litre in December 2022, and were last lower in February 2022 when petrol stood at 147.6 pence per litre, and in April 2022 when diesel stood at 176.1 pence per litre.

Within the transport category, the easing in motor fuels in December 2022 was partially offset by transport services with annual price rises of 11.3% for passenger transport by road (largely because of coach fares) and 44.1% for passenger transport by air. The annual rate of 44.1% is the largest recorded rate for this class since at least January 1989, when our constructed series begins. Earlier in the year, price inflation for passenger transport by air reached an annual rate of 40.3% in August 2022 and had subsequently been falling. However, the annual rate for December 2022 is an increase of 19.8 percentage points from the previous month.

Clothing and footwear

Prices of clothing and footwear rose, overall, by 6.4% in the year to December 2022, down from 7.5% in November. On a monthly basis, prices fell by 0.3% between November and December 2022. However, in the previous year, the increase in the proportion of our clothing sample that was on sale was smaller than is usually observed, and overall prices rose by 0.7% in the month to December 2021. This is therefore primarily a base effect, as prices usually fall into December each year. Prior to the coronavirus (COVID-19) pandemic, clothing and footwear prices on average fell by 1.3% in the month to December (between 2017 and 2019). The downward effect in 2022 was principally from garments.

Recreation and culture

The annual rate for recreation and culture was 4.8% in December 2022, down from 5.3% in November. The easing in the rate came largely from games, toys and hobbies, where prices were down by 4.8% in the year to December, compared with a fall of 0.5% in the year to November. The movements in this category mostly reflect price changes for computer games, which can sometimes be large, in part depending on the composition of bestseller charts. Short-term movements in the annual rate should therefore be interpreted with a degree of caution. There was a partially offsetting effect from audio-visual equipment (for receiving and reproducing sound and picture), where prices were largely unchanged in the year to December 2022, compared with a fall of 5.3% in the year to November. Typically, prices in this spending category fall on the month to December; 1.8% on average between 2017 and 2019. In 2022, however, prices rose 3.1% on the month.

Restaurants and hotels

Partially offsetting some of the easing inflation rates previously noted, the annual rate for restaurants and hotels was 11.4% in December 2022, up from 10.2% in November. The December annual rate was the highest since the constructed historical estimate of 11.4% in September 1991, and was last higher in August 1991, when it was 11.8%.

Figure 3: Annual inflation rate for restaurants and hotels highest since September 1991

CPIH, and restaurants and hotels annual inflation rates, UK, December 2012 to December 2022

Figure 3: Annual inflation rate for restaurants and hotels
highest since September 1991

CPIH, and restaurants and hotels annual inflation rates, UK, December 2012 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

The increase in the annual rate reflects price rises of 0.9% between November and December this year, compared with price falls of 0.1% between the same two months in 2021.

The effect came primarily from accommodation services, where prices rose on the month, compared with a fall in the same month a year earlier, particularly for overnight hotel accommodation. Fairly broad-based rises in restaurant and cafe prices averaging 0.7% also contributed to this effect, compared with a smaller rise of 0.5% in the previous year.

Food and non-alcoholic beverages

Food and non-alcoholic beverage prices rose by 16.9% in the 12 months to December 2022, up from 16.5% in November. The annual rate of inflation for this category has risen for 17 consecutive months, from minus 0.6% in July 2021. [Indicative modelled estimates](#) suggest that the rate would have last been higher in September 1977, when it was estimated to be 17.6%.

Figure 4: Food and non-alcoholic beverages annual inflation has risen for 17 consecutive months

CPIH, and food and non-alcoholic beverages annual inflation rates, UK, December 2012 to December 2022

Figure 4: Food and non-alcoholic beverages annual inflation has risen for 17 consecutive months

CPIH, and food and non-alcoholic beverages annual inflation rates, UK, December 2012 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

The increase in the annual rate for food and non-alcoholic beverages between November and December 2022 was driven by price movements from 4 of the 11 detailed classes. The largest upward effect came from milk, cheese and eggs, where prices overall rose 4.1% between November and December 2022 compared with a smaller rise of 1.5% between the same two months in 2021. There were further upward effects from sugar, jam, honey, syrups, chocolate and confectionery, and mineral waters, soft drinks and juices that were offset by a small downward effect from bread and cereals. Prices rose in the month to December 2022 for all three categories; however, in the case of bread and cereals, they rose more slowly than in the same month of the previous year.

4 . Latest movements in CPIH inflation

Figure 5: Annual goods inflation rate eases but services and core inflation rise in December 2022

CPIH goods, services, and core annual inflation rates for the last 10 years, UK, December 2012 to December 2022

Figure 5: Annual goods inflation rate eases but services and core inflation rise in December 2022

CPIH goods, services, and core annual inflation rates for the last 10 years, UK, December 2012 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

Figure 5 shows the annual inflation rates for the Consumer Prices Index including owner occupiers' housing costs (CPIH) all goods and all services series, together with CPIH excluding energy, food, alcohol and tobacco (often referred to as core CPIH). The CPIH inflation rate is added for comparison.

The CPIH all goods index rose by 13.4% in the 12 months to December 2022, down from 14.1% in November. The easing in the rate has been led by a downward contribution to the change from motor fuels, with other downward contributions from clothing and footwear, and games, toys and hobbies.

The CPIH all services index rose by 5.8% in the 12 months to December 2022, up from 5.4% in November. It was last equal in September 1992, and is the highest rate since 6.0% was observed in August 1992. The largest upward contribution to the change in the rate between November and December 2022 was from price rises for transport services, and restaurants and hotels.

The core CPIH annual rate increased from 5.7% to 5.8% between November and December 2022. The rate was also at 5.8% in September and October 2022, but was last higher in March 1992, when it was 6.0%.

Figure 6: Downward contributions to the change in the annual CPIH inflation rate were led by transport, particularly motor fuels

Contributions to change in the annual CPIH inflation rate, UK, between November and December 2022

Figure 6: Downward contributions to the change in the annual CPIH inflation rate were led by transport, particularly motor fuels

Contributions to change in the annual CPIH inflation rate, UK, between November and December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each group can be found in Table 3 in the accompanying [Consumer price inflation dataset](#).
3. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

Figure 6 shows how each of the main groups of goods and services contributed to the change in the annual CPIH inflation rate between November and December 2022. To understand what has changed the inflation rate between these months, we can look at the differences between the contributions each of the 12 divisions made to the rate in November 2022 and to the rate in December 2022. These differences sum to the change to the annual CPIH rate between the latest two months, that is, the easing from 9.3% to 9.2%.

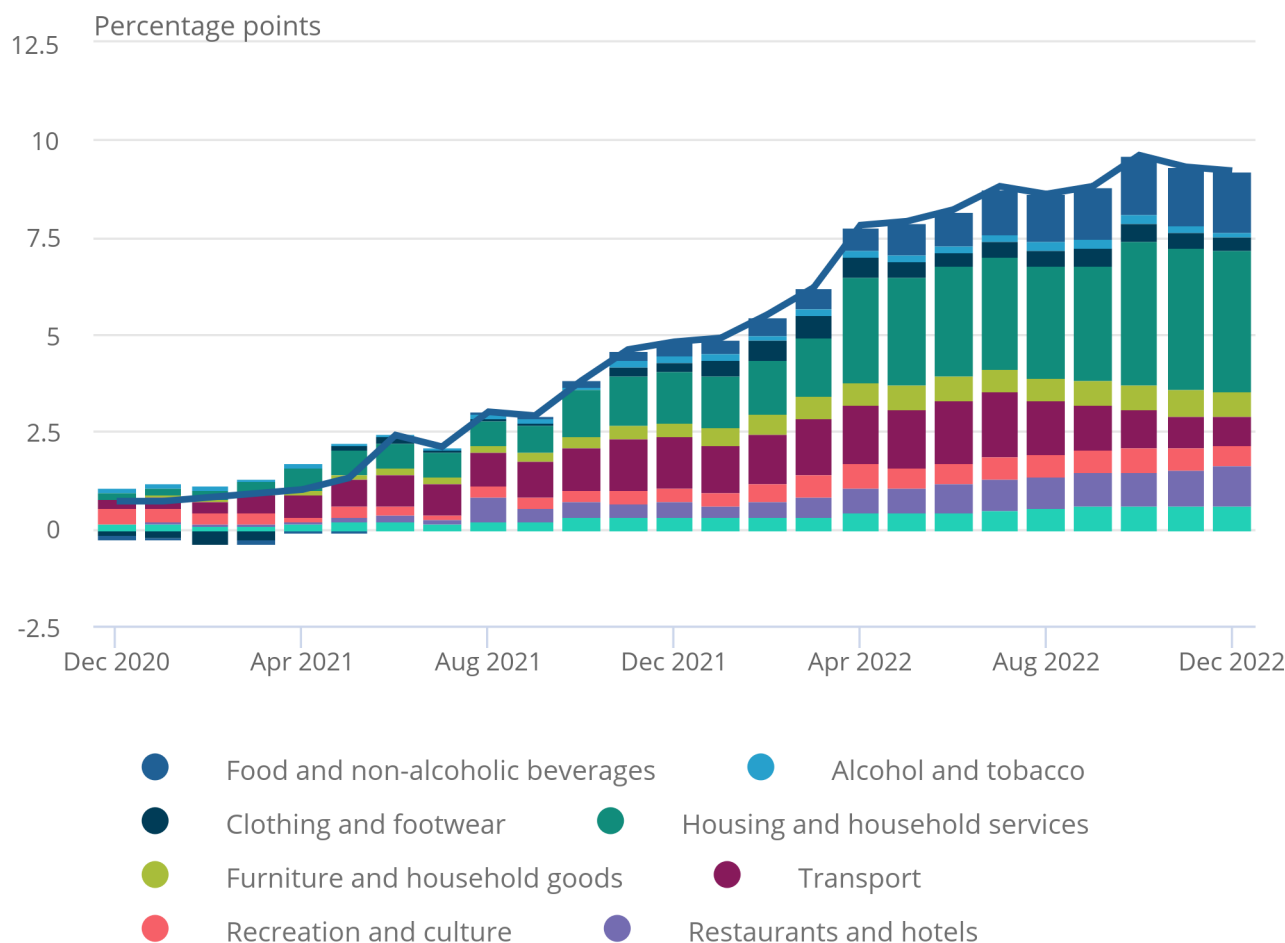

The easing in the annual CPIH rate into December 2022 was driven by downward contributions from 6 of the 12 divisions, led by a notable downward contribution (of 0.07 percentage points) from transport. The majority of this (0.15 percentage points) came from motor fuels, with a partially offsetting upward effect from transport services (0.09 percentage points). There were further large downward contributions from clothing and footwear (0.06 percentage points), and recreation and culture (0.05 percentage points). The largest, partially offsetting, upward contributions came from restaurants and hotels (0.09 percentage points), and food and non-alcoholic beverages (0.05 percentage points).

Figure 7: Contributions to the CPIH annual rate from 4 of the 12 divisions largest since start of National Statistics series in 2006

Contributions to the annual CPIH inflation rate, UK, December 2020 to December 2022

Figure 7: Contributions to the CPIH annual rate from 4 of the 12 divisions largest since start of National Statistics series in 2006

Contributions to the annual CPIH inflation rate, UK, December 2020 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each group can be found in Table 3 in the accompanying [Consumer price inflation dataset](#).
3. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

Figure 7 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPIH inflation rate over the last two years. The contribution of each category to the annual rate depends on both the price movement in that category as well as its weight. Contributions help to understand what is driving the inflation rate by expressing it as the additive sum of its parts. For any one month, when added together, the contributions from the 12 divisions sum to the overall CPIH inflation rate, for example, 9.2% in December 2022.

The largest upward contributions to the annual CPIH inflation rate in December 2022 came from housing and household services (principally from electricity, gas, and other fuels), and food and non-alcoholic beverages. Contributions from these two divisions accounted for 5.23 percentage points – over half – of the annual CPIH inflation rate. Their combined weight comprises around 41% of the CPIH basket.

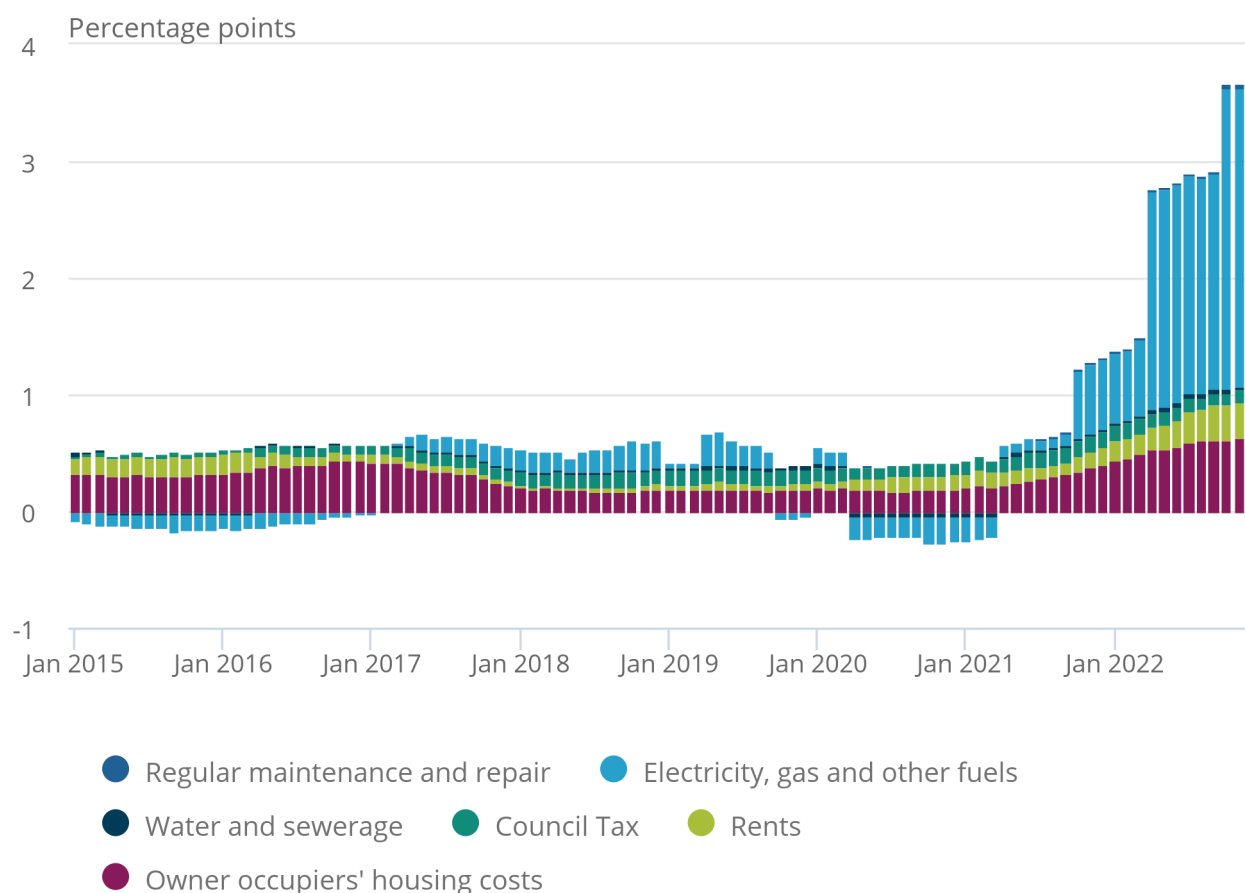

The contributions from four of the divisions were the largest since the start of the National Statistics series in 2006. These were food and non-alcoholic beverages (1.56 percentage points), restaurants and hotels (1.03 percentage points), miscellaneous goods and services (0.40 percentage points), and health (0.09 percentage points).

Figure 8: Contribution from housing components little changed between November and December 2022

Contributions of housing components to the annual CPIH inflation rate, UK, January 2015 to December 2022

Figure 8: Contribution from housing components little changed between November and December 2022

Contributions of housing components to the annual CPIH inflation rate, UK, January 2015 to December 2022

Source: Office for National Statistics – Consumer price inflation

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. CPIH is the Consumer Prices Index including owner occupiers' housing costs.

The Consumer Prices Index (CPI) differs from the CPIH in that it does not include owner occupiers' housing costs (OOH) and Council Tax. Figure 8 shows the contribution of these components to the annual CPIH inflation rate in the context of wider housing-related costs. In December 2022, the contribution of housing and household services in total to the annual CPIH inflation rate was 3.67 percentage points, slightly down from 3.68 percentage points in November 2022.

The relatively high contribution to the rate since April 2022 came mainly from electricity, gas, and other fuels (2.53 percentage points in December 2022). This reflects price rises for gas and electricity following the increase in the Office of Gas and Electricity Markets (Ofgem) cap on energy prices on 1 April 2022 and follows an earlier rise in the price cap on 1 October 2021.

From 1 October 2022, the Ofgem energy price cap was replaced with the government's [Energy Price Guarantee \(EPG\)](#). Under the EPG, energy prices increased. However, the rate of increase was reduced by limiting the unit cost of electricity and gas so that a typical household in Great Britain pays, on average, around £2,500 a year on their energy bill.

OOH's contribution to the CPIH annual inflation rate rose slightly from 0.64 to 0.65 percentage points between November and December 2022. Costs increased 3.8% in the year to December 2022, compared with 3.7% in the previous month. There was also a 0.32 percentage point contribution from actual rentals.

The contribution to the annual rate from Council Tax remains unchanged at 0.10 percentage points in December 2022. This reflects an annual rate of 3.4%.

5 . Latest movements in CPI inflation

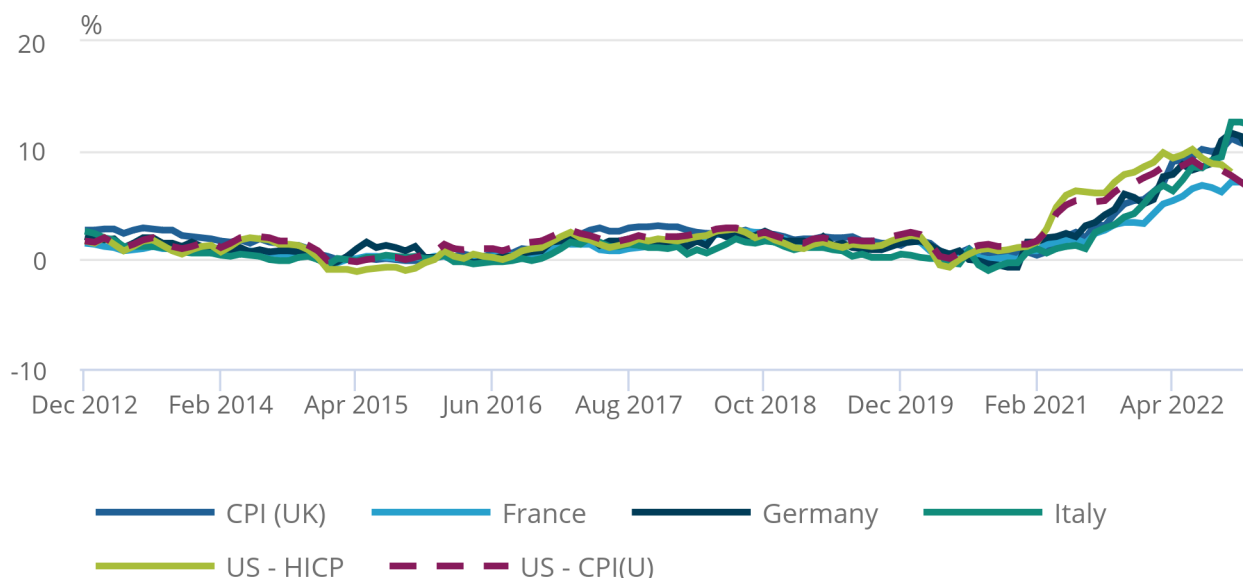

While the Consumer Prices Index including owner occupiers' housing costs (CPIH) is our lead and most comprehensive measure of consumer price inflation, the Consumer Prices Index (CPI) is based on a harmonised methodology developed by Eurostat and allows for international comparisons to be drawn. For more information on the use cases for our consumer price inflation statistics, please refer to our [Measuring changing prices and costs for consumers and households, proposed updates: March 2020 article](#). Figure 9 illustrates CPI inflation against the Group of Seven (G7) countries that produce a comparable measure.

Figure 9: Annual inflation rates have eased in December 2022 across G7 countries

CPI compared with selected G7 annual inflation rates, November 2012 to December 2022

Figure 9: Annual inflation rates have eased in December 2022 across G7 countries

CPI compared with selected G7 annual inflation rates, November 2012 to December 2022

Source: Office for National Statistics – Consumer price inflation, Eurostat – Harmonised Index of Consumer Prices (HICP)

Notes:

1. December 2022 estimates for France, Germany and Italy are flash estimates and are not final; the final HICP data for December 2022 are published on Wednesday 18 January 2023.
2. There are some differences in the definition of the US HICP that may limit comparison; for more information, please refer to [Comparing US and European inflation: the CPI and the HICP \(PDF, 74.2KB\)](#).
3. The US [CPI for All Urban Consumers \(CPI-U\)](#) provides a monthly measure of US inflation although its coverage is notably different from the HICP methodology.
4. The international data in this figure are sometimes revised.
5. CPI is the Consumer Prices Index.
6. G7 is the Group of Seven.

Table 3: CPI annual and monthly inflation rates by division
UK, December 2021, November 2022, and December 2022

	CPI 12-month rate		CPI 1-month rate

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each group can be found in Table 4 in the accompanying [Consumer price inflation dataset](#).
3. CPI is the Consumer Prices Index.

Figure 11 shows how each of the main groups of goods and services contributed to the change in the annual CPI inflation rate between November and December 2022.

The easing in the annual CPI rate into December 2022 was driven by contributions from 7 of the 12 divisions. The largest downward contribution to the change of 0.10 percentage points came from transport, with further large downward contributions from clothing and footwear (0.07 percentage points), and recreation and culture (0.06 percentage points). The largest, partially offsetting, upward contributions to the change in the annual rate came from restaurants and hotels (0.12 percentage points), and food and non-alcoholic beverages (0.06 percentage points). Although the sizes of the contributions differ from CPIH, the main drivers to the change are the same where they are common to both measures.

2. More information on the contents of each group can be found in Table 4 in the accompanying [Consumer price inflation dataset](#).
3. CPI is the Consumer Prices Index.

Figure 12 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPI inflation rate over the last two years.

While the CPIH includes extra housing components not included in the CPI, the largest contributions to the annual CPI inflation rate were from the same divisions that made the largest contributions to the annual CPIH rate, namely housing and household services (primarily because of electricity, gas and other fuels), and food and non-alcoholic beverages.

6 . Consumer price inflation data

[Consumer price inflation tables](#)

Dataset | Released 18 January 2023

Measures of monthly UK inflation data including the Consumer Prices Index including owner occupiers' housing costs (CPIH), Consumer Prices Index (CPI) and Retail Prices Index (RPI). These tables complement the consumer price inflation time series dataset.

[Consumer price inflation time series](#)

Dataset MM23 | Released 18 January 2023

Comprehensive database of time series covering measures of inflation data for the UK including the CPIH, CPI and RPI.

[Consumer price inflation detailed briefing note](#)

Dataset | Released 18 January 2023

The consumer price inflation detailed briefing note contains details of the items contributing to the changes in the CPIH (and RPI), details of any notable movements, a summary of the reconciliation of CPIH and RPI, and the outlook, which looks ahead to next month's release.

7 . Glossary

Annual inflation rate

The most common approach to measuring inflation is the 12-month or annual inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the annual rate is determined by the balance between upward and downward price movements of the range of goods and services included in the index.

Consumer price inflation

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. For an overview of the indices and their uses, please see our [Consumer price indices, a brief guide: 2017 article](#).

Consumer Prices Index including owner occupiers' housing costs (CPIH)

CPIH is the most comprehensive measure of inflation. It extends the Consumer Prices Index (CPI) to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing costs (OOH), along with Council Tax. Both are significant expenses for many households and are not included in the CPI.

Consumer Prices Index

The CPI is a measure of consumer price inflation produced to international standards and is based on European regulations for the [Harmonised Index of Consumer Prices](#). The CPI is the inflation measure used in the government's target for inflation.

The CPI is produced at the same level of detail as the CPIH in the [accompanying dataset](#) and accompanying [data time series](#).

Retail Prices Index (RPI)

RPI does not meet the required standard for designation as a [National Statistic](#). In recognition that it continues to be widely used in contracts, we continue to publish the RPI, its subcomponents and RPI excluding mortgage interest payments (RPIX). To view the all-items RPI, please see the [data time series section of the inflation and price indices area of our website](#). The annual RPI inflation rate was 13.4% in December 2022.

The UK Statistics Authority and HM Treasury launched a consultation in 2020 on the authority's proposal to address the shortcomings of the RPI. From 2030 (at the earliest), as outlined in [the UK Statistics Authority response to the consultation](#), the CPIH methods and data sources will be introduced into the RPI. Additionally, the supplementary and lower-level indices of the RPI will be discontinued.

8 . Measuring the data

Weights for consumer price inflation statistics

In line with usual practice, the expenditure weights used in compiling the Consumer Prices Index including owner occupiers' housing costs (CPIH) and the Consumer Prices index (CPI) will be updated at the start of 2023. Normally, the weights would be updated using the latest Blue Book-consistent household final consumption expenditure (HHFCE) dataset, which is lagged by two years (that is, 2021). The unprecedented events of the last few years have meant we have adjusted expenditure feeding into the weights update to incorporate some of the larger changes seen in spending patterns, so they are more reflective of the year immediately prior to use in consumer price inflation. More information on these adjustments can be found in [Section 2 of our Consumer price inflation, updating weights: 2022 article](#).

Since consumers' expenditure was affected by the lockdowns that were in place at the start of 2021, we have decided to use the same broad approach for the forthcoming 2023 update of expenditure weights. We estimated a 2022 dataset by taking the most up-to-date HHFCE data available ([Quarter 1 \(Jan to Mar\) to Quarter 3 \(July to Sept\) 2022, second estimate](#)) and imputing the fourth quarter based on the 2021 seasonal growth, given that this is the most recent period with no national movement restrictions in place. We used the same threshold as in the previous year (25%, and also considering cases that fall in the range from 20% to 25%) to identify Classification of Individual Consumption by Purpose (COICOP) classes where there were large changes in spending levels between 2021 and 2022. For these classes, we replaced the usual 2021 data with the 2022 estimate. For some of these classes, we also made some additional changes:

- for energy classes that had experienced high inflation over the year, we adjusted our imputed estimate for Quarter 4 (Oct to Dec) 2022 to account for the general change in prices
- for some passenger transport and cultural services classes, we imputed Quarter 4 2022 using the 2019 growth rather than 2021; this was where 2021 spending may have been affected by ongoing movement restrictions in other countries or where consumer confidence was slower to recover following the end of national movement restrictions across the UK

Our approach is consistent with [international guidance \(PDF, 135KB\)](#).

The COICOP classes that have been adjusted will be detailed in the upcoming 2023 edition of [our Consumer price inflation, updating weights article](#), alongside an explanation of the latest movements. The weights data for CPIH and CPI in January 2023 will be published on 15 February 2023 in Tables 11 and 25 of the [Consumer price inflation dataset](#). As with last year, we have made no changes to the weighting scheme for the Retail Prices Index.

Alternative data sources for rail fares and second-hand cars

We have published an [impact analysis of including new alternative data and methods in our headline consumer price statistics](#) for rail fares and second-hand cars.

We are intending to introduce these changes from February 2023 (published in March 2023). As our highest priorities are improving the quality and upholding the integrity of our statistics, we are currently completing final quality assurance and testing of our systems and processes and, by early February 2023, we will publish an update to our timelines for incorporation of these data.

Although the headline impact is small, with these new data we can produce more granular statistics that offer important insights into the components driving inflation in the UK. We will be publishing six new item-level indices for rail fares by ticket type, and two new item-level indices for second-hand cars by fuel type, detailed in our publication.

For our longer-term plans, please see our article on the [Transformation of consumer price statistics: April 2022](#).

Treatment of the Council Tax rebate, Energy Bills Support Scheme (EBSS) and Energy Price Guarantee in consumer price inflation

On 3 February 2022, the UK government announced an [Energy Bills Rebate](#) package to help households to manage rising energy bills. On 26 May 2022, the UK government announced an additional [cost of living support package](#). These packages included:

- a £150 non-repayable Council Tax rebate payment for all households that are liable for Council Tax in Bands A to D in England
- a £400 payment to support households with their energy bills through the Energy Bills Support Scheme (EBSS)

Subsequently, on 8 September 2022, the government announced the Energy Price Guarantee that would limit the unit cost of electricity and gas for households.

Decisions on whether to include rebates, subsidies and discounts in our consumer price inflation statistics are not clear cut and are taken on a case-by-case basis. We aim to be consistent with the national accounts, the public sector finances and other economic statistics. Decisions are based on international statistical guidance and practical considerations. More information on this is provided in Section 9.2 of our [Consumer Price Indices Technical Manual](#).

We have previously announced that the Council Tax rebate and EBSS are out of scope of the consumer price indices. The formal [Economic Statistics Classification decisions](#) were that they were both current transfers paid by central government to the households sector. As such, both increased household income rather than reduced expenditure. The implication of the decisions was that they were not part of household expenditure and, as a result, out of scope of the consumer price indices.

On 31 October 2022, the Office for National Statistics (ONS) published the conclusion of its [classification review of the Energy Price Guarantee \(EPG\) for domestic consumers](#). The payments under this scheme have been classified as subsidies on products, paid by central government to the energy suppliers in the non-financial corporations sector in the UK. The implication for consumer price inflation of the classification decision is that the EPG influences the prices that domestic consumers are charged for a unit of gas or electricity. It is these reduced unit prices that are being used in compiling the CPIH, CPI and RPI, which are hence lower while the schemes are in operation than if the EPG had not been introduced.

CPIH-consistent inflation rate estimates for UK household groups: July to October 2022

Every quarter, we publish experimental estimates of inflation rates for different types of households on a CPIH basis, including for example inflation rates for households in different income deciles, different types of tenure, and retirement status. On 16 November 2022, we published [monthly data for Quarter 3 \(July to Sept\) 2022](#). For this publication, we additionally extended the time period to incorporate the latest October estimates, as well as producing subgroup estimates on a CPI basis, which brought our [analysis from January 2022](#) up to date. The data release is supported by the [Inflation and cost of living for household groups: October 2022 article](#).

Analysis of lowest-cost grocery items

On 25 October 2022, we published [our experimental analysis of price changes for a sample of lowest-cost grocery items](#), which provided an update to analysis previously published in May 2022. The analysis uses in-house web-scraped data to investigate the price movements for a sample of 30 everyday grocery items (including pasta, rice, milk, and so on), which are commonly bought by households on low incomes.

For each item, we have investigated the change in price of the cheapest product available in online shops up to September 2022.

Personal inflation calculator

To assist individuals in understanding how the rise in inflation affects their expenditure, we have produced a [personal inflation calculator](#). The calculator allows users to enter the amount they spend across either a reduced or a wide range of categories, to produce an estimate of their personal inflation based on those spending patterns.

If you have any questions or comments on the inflation calculator, please email cpi@ons.gov.uk.

Consumer price inflation historical estimates, UK, 1950 to 1988

On 18 May 2022, we published the [Consumer price inflation, historical estimates, UK, 1950 to 1988 – methodology](#). This includes new estimates of CPIH over the period and improved estimates of CPI. These estimates (published in response to user need for a longer series) are indicative and are for analytical purposes only. They are not intended for official use and do not constitute part of the National Statistic series.

Previously, in December 2018, we published a CPIH historical series covering the period from 1989 to 2005 in the [Consumer Prices Index including owner occupiers' housing costs \(CPIH\) historical series: 1988 to 2004 article](#). This series is an official statistic rather than a National Statistic, reflecting the historical uncertainty around the back casts.

Methodology information

The consumer price indices are normally based on prices collected from outlets around the country, supplemented by information collected centrally over the internet and by phone. The figures in this publication use data collected on or around 13 December 2022.

Our [Consumer price indices, a brief guide](#) gives an overview of consumer price statistics, while our [Consumer Prices Indices Technical Manual](#) covers the concepts and methodologies underpinning the indices in more detail.

Our [CPIH Compendium](#) provides a comprehensive source of information on the CPIH, focusing on the approach to measuring owner occupiers' housing costs.

Our [Users and uses of consumer price inflation statistics: July 2018 methodology](#) includes information on the users and uses of these statistics, and the characteristics of the different measures of inflation in relation to potential use.

9 . Strengths and limitations

We have illustrated our [future approach to measuring changing prices and costs faced by consumers and households](#) using three "use cases", along with how they relate to the measures currently published and those under development. We have also published proposed updates in our [Measuring changing prices and costs for consumers and households, proposed updates: March 2020 article](#).

The three cases refer firstly to the Consumer Prices Index including owner occupiers' housing costs (CPIH) as our lead measure of inflation based on economic principles. They also refer to the Household Costs Indices (HCIs) as a set of measures to reflect the change in costs as experienced by different households and the Retail Prices Index (RPI) as a legacy measure that is required to meet existing user needs. Our [Shortcomings of the RPI as a measure of inflation article](#) describes the issues with the RPI.

10 . Related links

[Producer Price Inflation, UK](#)

Bulletin | Released monthly

Changes in the prices of goods bought and sold by UK manufacturers, including price indices of materials and fuels purchased (input prices) and factory gate prices (output prices). Also including quarterly estimates monitoring the changes in prices charged for services provided to UK-based customers for a range of industries.

[UK House Price Index: November 2022](#)

Bulletin | Released 18 January 2023

Monthly house price inflation in the UK, calculated using data from HM Land Registry, Registers of Scotland, and Land and Property Services Northern Ireland.

[Index of Private Housing Rental Prices, UK: December 2022](#)

Bulletin | Released 18 January 2023

An experimental price index tracking the prices paid for renting property from private landlords in the UK. Also includes measures of owner occupiers' housing costs.

[Consumer price inflation item indices and price quotes](#)

Dataset | Released 18 January 2023

Price quote data and item indices that underpin consumer price inflation statistics are now published, giving users unprecedented access to the detailed data that are used in the construction of the UK's inflation figures. With effect from the January 2017 consumer price inflation publication, these data are published on a monthly basis showing the latest month.

[Inflation and the cost of living for UK households, overview: June 2022](#)

Article | Released 22 June 2022

Inflation and cost of living article collating and updating analysis of different price measures.

[Consumer price inflation, historical estimates, UK, 1950 to 1988 – methodology](#)

Methodology | Last revised 18 May 2022

A historical series of our lead measure of inflation, the Consumer Prices Index including owner occupier's housing costs (CPIH), which extends the series back to 1950. Definitive historical division-level indices for both Consumer Prices Index (CPI) and CPIH from 1950 to 1988 are available. Data in this release are not a National Statistic and are provided for indicative purposes only.

[Harmonised Index of Consumer Prices](#)

Dataset | Released 18 January 2023

The Harmonised Index of Consumer Prices (HICP) on the Eurostat website provides a comparable measure of inflation for each member state of the EU. The UK Consumer Prices Index (CPI) is produced on a consistent basis to the HICP. Further information is available in [Eurostat's overview of Harmonised Index of Consumer Prices \(HICP\)](#).

[Contributions to the 12-month rate of CPI\(H\) by import intensity](#)

Dataset | Released 18 January 2023

A time series of the contributions to the Consumer Prices Index including owner occupiers' housing costs (CPIH) and Consumer Prices Index (CPI), UK, monthly.

[Advisory Panels for Consumer Price Statistics](#)

Webpage | Released 2015 to 2023

Reports, papers and minutes of the two independent advisory panels on consumer price statistics: a technical panel to advise the National Statistician on technical aspects of the statistics and a stakeholder panel to provide advice on the uses and applications of price indices.

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

3 The series CPIY, CPI-CT and CPIHY were discontinued in January 2022, with the final estimates referring to price change in the period December 2021.

¹ As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected please consult

the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

¹ As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal'

collection). To identify which series are affected, please consult the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

¹ For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

² The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001.

³ Energy includes electricity, gas and other fuels, and fuels and lubricants.

Key: - zero or negligible

1 Comprises 'Electricity, gas and other fuels' (group 04.5) and 'Fuels and lubricants' (class 07.2.2).

2 Comprises all other goods elements of the CPI.

3 For further information on all of these services components, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

Key: - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 Aggregate for European Union with 27 Member States.

Following user requests, on 10 April 2018 Eurostat began to publish in its database an aggregate for the EU with 27 Member States for around 50 most in-demand indicators, such as population, GDP growth rate and unemployment.

3 Data for the former EU28 aggregate.

For reference periods February 2020 or later, Eurostat no longer calculates or publishes the former EU 28 aggregate. This means that the final time periods for which the EU28 aggregate is published are January 2020, fourth quarter 2019 or the year 2019 depending on the frequency of the dataset. Eurostat will maintain historic data for EU28 in the database and will update as revisions are received.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.

5 Following the end of the transition period, we have ceased to publish the Harmonised Index of Consumer Prices (HICP) international comparisons for EU countries in this table. The international comparisons will continue to be available on the Eurostat website. <https://ec.europa.eu/eurostat/web/main/data/database>

Key: - zero or negligible

1 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk>.

3 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of price quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected, please the latest Consumer price inflation tables which can be found here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

4 Index date for December: 13 December 2022

Key: - zero or negligible

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

7 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at: <http://www.statisticsauthority.gov.uk/>.

8 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.
