1 . Main points

- The value of goods imports increased by £0.8 billion (1.7%) in August 2023, with a rise in imports from non-EU countries and a decrease in imports from EU countries.
- The rise in imports from non-EU countries was mainly the result of higher imports of oil and gas.
- The value of goods exports decreased by £0.7 billion (2.2%) because of a fall in exports to non-EU countries, while exports to EU countries remained stable in August 2023.
- The total trade in goods and services deficit narrowed by £3.5 billion to £10.4 billion in the three months to August 2023, as imports fell by more than exports.
- The trade in goods deficit narrowed by £5.9 billion to £47.9 billion in the three months to August 2023, while the trade in services surplus narrowed by £2.5 billion to £37.5 billion.

Please note that all trade figures exclude non-monetary gold and other precious metals unless otherwise stated. This is because movements in non-monetary gold, an important component of precious metals, can be large and highly volatile, distorting underlying trends in goods exports and imports.

2 . Data collection changes affecting UK trade statistics

EU imports and exports

[HM Revenue and Customs \(HMRC\) implemented a data collection change](#) affecting data on goods exports from Great Britain to the EU in January 2021, and data on goods imports from the EU to Great Britain in January 2022. We have [applied adjustments to our estimates of goods imports from the EU for 2021](#) to reflect this data collection change, which brought imports and exports statistics onto a like-for-like basis in 2021.

Separately, Staged Customs Controls (SCC) have affected data on imports of non-controlled goods from the EU to Great Britain in the first six months of 2022.

Staged Customs Controls

In 2021, the use of SCC allowed customs declarations to be reported up to 175 days after the date of import for imports of non-controlled goods from the EU to Great Britain. The [UK government introduced full customs controls in January 2022](#), while July 2022 marked the first full month of data where delayed customs declarations submitted under SCC could not be included. Temporary arrangements still apply for imports of goods from Ireland to Great Britain.

In our [Impact of trade in goods data collection changes on UK trade statistics: further update on Staged Customs Controls article](#) published on 3 July 2023, we analysed the impact of SCC on trade in goods data for imports from the EU to Great Britain in 2022.

To account for the impact of SCC, which led to some double counting, we have now applied a downward adjustment of £6.0 billion to our estimates of goods imports from the EU for the period January to June 2022. These revised estimates were included in our [GDP quarterly national accounts, UK: April to June 2023](#) and [Balance of payments, UK: April to June 2023](#) releases published on 29 September 2023, and will now be published across all releases in the trade in goods series.

We have published an article, [Impact of trade in goods data collection changes on UK trade statistics: adjustments to 2022 EU imports estimates](#) alongside this bulletin, summarising these adjustments to our estimates of goods imports from the EU in the first six months of 2022.

Imports from and exports to the EU pre-2021

The full time series for goods imports from and exports to the EU contains a discontinuity from January 2021 resulting from the move from Intrastat to customs declarations, as detailed in our [Impact of trade in goods data collection changes on UK trade statistics: adjustments to 2021 EU imports estimates article](#). We are exploring available data sources to assess whether it is possible to make similar adjustments for the period prior to 2021.

3 . Monthly trade in goods

Total imports of goods in "current prices", which are not adjusted for inflation (explained in [Section 10: Glossary](#)), increased by £0.8 billion (1.7%) in August 2023. Imports from EU countries fell by £0.2 billion, while imports from non-EU countries rose by £1.0 billion (Table 1 and Figure 1).

Total exports of goods decreased by £0.7 billion (2.2%) in August 2023, because of a £0.7 billion fall in exports to non-EU countries, while exports to EU countries remained stable. Therefore, the monthly balance of trade in goods widened by £1.5 billion in August to a deficit of £16.7 billion.

Imports from the EU were £5.2 billion higher than from non-EU countries in August 2023, while exports to the EU were £0.2 billion lower than exports to non-EU countries.

Table 1: Imports from non-EU countries rose in August 2023, while exports to non-EU countries fell
Monthly UK trade in goods, excluding precious metals, current prices, seasonally adjusted, EU and non-EU

		Exports	Imports	Balance
Total trade in goods:	Value (£bn)	30.9	47.6	-16.7
	August 2023 vs July 2023			
	Change (£bn)	-0.7	0.8	-1.5
	% Change	-2.2	1.7	
EU:	Value (£bn)	15.3	26.4	-11.1
	August 2023 vs July 2023			
	Change (£bn)	0.0	-0.2	0.2
	% Change	0.2	-0.7	
Non-EU:	Value (£bn)	15.6	21.2	-5.7
	August 2023 vs July 2023			
	Change (£bn)	-0.7	1.0	-1.7
	% Change	-4.5	4.9

[.xlsx](#)

Notes:

1. HM Revenue and Customs (HMRC) data collection changes following EU exit have affected statistics on UK trade in goods with the EU. Our [Impact of trade in goods data collection changes on UK trade statistics articles](#) provide more detail.

After removing the effect of inflation by calculating "chained volume measures" (explained in [Section 10: Glossary](#)), total goods imports decreased by £0.4 billion (1.1%) in August 2023 (Figure 2). This was because imports from the EU fell by £0.7 billion (3.2%), while imports from non-EU countries rose by £0.3 billion (1.7%).

Total goods exports fell by £1.3 billion (4.6%) in August 2023, after the effect of inflation is removed. Exports to non-EU countries decreased by £1.0 billion (7.2%) and exports to EU countries fell by £0.2 billion (1.8%).

Figure 2: Non-EU imports rose in August 2023 in both current prices and inflation-adjusted terms

Imports and exports of goods, excluding precious metals, current prices and chained volume measures, seasonally adjusted, EU and non-EU, January 2020 to August 2023

[.xlsx](#)

Notes:

1. HM Revenue and Customs (HMRC) data collection changes following EU exit have affected statistics on UK trade in goods with the EU. Our [Impact of trade in goods data collection changes on UK trade statistics articles](#) provide more detail.

4 . Monthly trade in goods by commodity

Goods imports

Imports from the EU decreased by £0.2 billion (0.7%) in August 2023. This was because of a £0.2 billion fall in chemical imports (Figure 3), with lower imports of organic chemicals from Ireland. Imports of machinery and transport equipment and material manufactures also fell in August, each by £0.1 billion. These falls were partially offset by a £0.3 billion increase in fuel imports.

Imports from non-EU countries increased by £1.0 billion (4.9%) in August 2023 because of a £1.0 billion rise in fuel imports, resulting from increased imports of gas from Norway. Additionally, imports of miscellaneous manufactures rose by £0.2 billion, attributed to higher imports of other manufactures from China.

Figure 3: Imports of goods from non-EU countries rose in August 2023, with an increase in fuel imports

EU and non-EU goods imports by commodity, current prices, seasonally adjusted, August 2021 to August 2023

Download the data

[.xlsx](#)

Notes:

1. HM Revenue and Customs (HMRC) data collection changes following EU exit have affected statistics on UK trade in goods with the EU. Our [Impact of trade in goods data collection changes on UK trade statistics articles](#) provide more detail.

Volatile fuel prices have influenced trends in the value of fuel imports since autumn 2021. After a substantial fall in June, the total value of fuel imported from non-EU countries increased by £1.0 billion (25.2%) in August 2023 because of higher imports of oil and gas (Figure 4). While there has been a slight increase in the price of oil and gas in August 2023, this is minor when compared with the scale of price fluctuations observed throughout 2022. In inflation-adjusted terms, imports of fuels from non-EU countries increased slightly by a lesser £0.1 billion (2.7%).

Figure 4: Imports of fuel from non-EU countries increased more in value terms than in inflation-adjusted terms in August 2023

Non-EU fuel imports, current prices and chained volume measures, seasonally adjusted, January 2020 to August 2023

Figure 4: Imports of fuel from non-EU countries increased more in value terms than in inflation-adjusted terms in August 2023

Non-EU fuel imports, current prices and chained volume measures, seasonally adjusted, January 2020 to August 2023

Source: UK trade statistics from the Office for National Statistics

Goods exports

Exports to the EU remained stable in August 2023, with small movements across all commodities (Figure 5). There were slight increases in exports of machinery and transport equipment and fuels. However, these were offset by slight decreases in exports of beverages and tobacco and miscellaneous manufactures.

Exports to non-EU countries decreased by £0.7 billion (4.5%) in August 2023. This decrease was mainly because of falls of £0.4 billion in chemicals exports, £0.2 billion in machinery and transport equipment exports and £0.1 billion in exports of fuels. The decrease in exports of chemicals was the result of lower exports of organic chemicals to the United States. The fall in machinery and transport equipment can be attributed to lower exports of cars to the United States and China, and mechanical machinery to Turkey and Hong Kong.

Figure 5: Exports of goods to non-EU countries fell in August 2023, resulting from a decrease in exports of chemicals, machinery and transport equipment and fuels

EU and non-EU goods exports by commodity, current prices, seasonally adjusted, August 2021 to August 2023

Download the data

[.xlsx](#)

Notes:

1. HM Revenue and Customs (HMRC) data collection changes following EU exit have affected statistics on UK trade in goods with the EU. Our [Impact of trade in goods data collection changes on UK trade statistics articles](#) provide more detail.

5 . Monthly trade in services

Early estimates suggest imports of services remained stable in value terms in August 2023, while exports increased by £0.1 billion (0.2%) (Figure 6). Although price rises have affected trade in services in recent months, in August 2023 there was little difference between trade in services trends in value and inflation-adjusted terms. Monthly figures for trade in services for August 2023 are estimated from Quarter 2 (Apr to June) 2023 data, using additional data sources. View our [UK Trade Quality and Methodology Information \(QMI\)](#) for more detail on how our trade in services statistics are compiled.

[The S&P Global's Purchasing Managers' Index for August](#) reported lower levels of activity in the service sector. Previous high levels in financial services and consumer facing services started to fade and there was a decrease in demand reported for business services.

Figure 6: Exports of services are estimated to have increased slightly in both value and inflation-adjusted terms in August 2023, while imports remained stable

Imports and exports of services, current prices and chained volume measures, seasonally adjusted, January 2020 to August 2023

Download the data

[.xlsx](#)

In value terms, trade in services is at a higher level than before the coronavirus (COVID-19) pandemic. Imports of services have increased by £7.6 billion (41.0%) compared with February 2020, while exports of services have risen by £9.4 billion (32.0%). After the effect of inflation has been removed, imports of services are £3.3 billion (17.4%) above February 2020, and exports of services are £2.5 billion (8.8%) above February 2020.

6 . Three-monthly trade in goods and services

Total imports of goods decreased by £6.4 billion (4.3%) in the three months to August 2023, compared with the three months to May 2023 (Table 2). Goods imports from the EU rose slightly over this period while imports from non-EU countries fell substantially. Exports of goods decreased by £0.5 billion (0.5%) in the three months to August 2023, with a fall in exports to the EU slightly offset by a rise in exports to non-EU countries.

Imports of services increased by an estimated £1.8 billion (2.3%) in the three months to August 2023 compared with the three months to May 2023, while exports of services fell by £0.7 billion (0.6%).

Table 2: Imports of goods from non-EU countries decreased substantially in the three months to August 2023
Three monthly UK trade, excluding precious metals, current prices, seasonally adjusted, EU and non-EU

		Exports	Imports	Balance
Total trade: three months to August 2023 vs three months to May 2023	Value (£bn)	210.6	221.1	-10.4
	Change (£bn)	-1.1	-4.6	3.5
	% Change	-0.5	-2.1	
Total trade in goods: three months to August 2023 vs three months to May 2023	Value (£bn)	94.6	142.5	-47.9
	Change (£bn)	-0.5	-6.4	5.9
	% Change	-0.5	-4.3	
Trade in goods, EU: three months to August 2023 vs three months to May 2023	Value (£bn)	45.8	80.9	-35.1
	Change (£bn)	-0.6	0.1	-0.7
	% Change	-1.3	0.1	
Trade in goods, non-EU: three months to August 2023 vs three months to May 2023	Value (£bn)	48.8	61.6	-12.8
	Change (£bn)	0.1	-6.5	6.6
	% Change	0.3	-9.5	
Total trade in services: three months to August 2023 vs three months to May 2023	Value (£bn)	116.0	78.6	37.5
	Change (£bn)	-0.7	1.8	-2.5
	% Change	-0.6	2.3	

Source: UK trade statistics from Office for National Statistics

The total goods and services trade balance, excluding precious metals, narrowed by £3.5 billion to a deficit of £10.4 billion in the three months to August 2023 (Figure 7). Imports fell by £4.6 billion over this period, whereas exports fell by a lesser £1.1 billion. When removing the effect of inflation, the total trade deficit, excluding precious metals, widened by £0.3 billion to £12.7 billion.

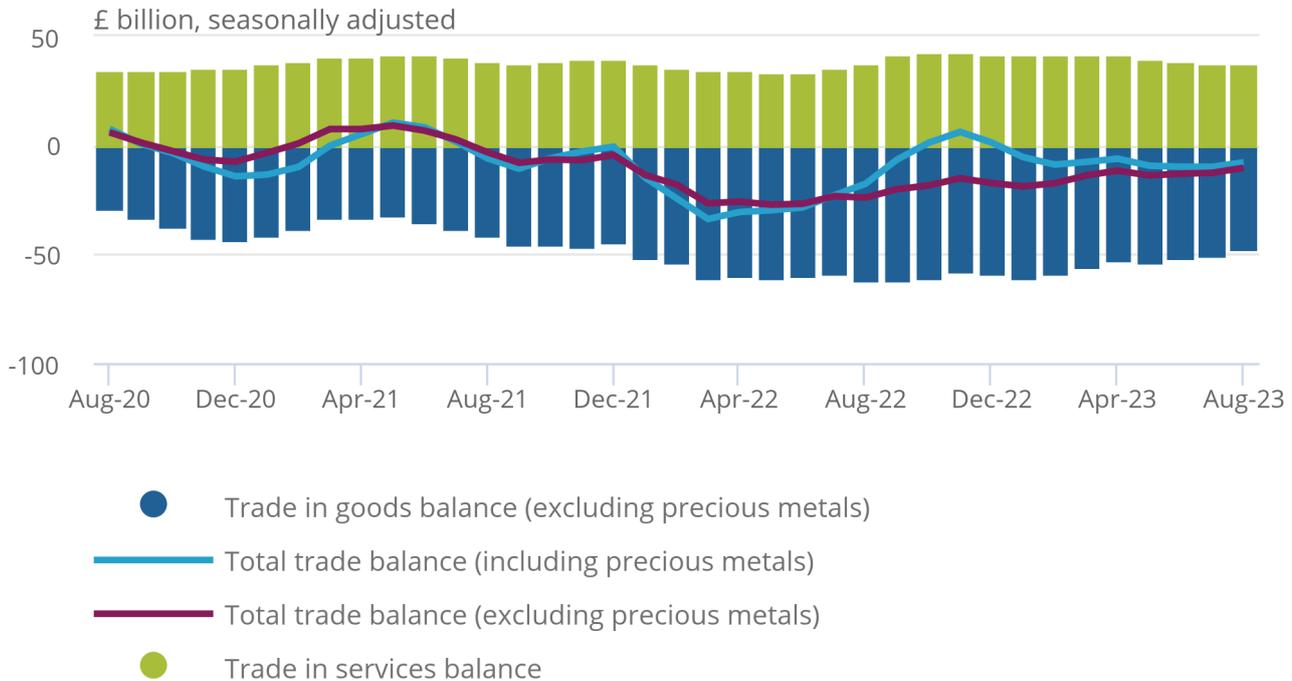

The trade in goods deficit in value terms, excluding precious metals, narrowed by £5.9 billion to £47.9 billion in the three months to August 2023. The trade in services surplus narrowed by £2.5 billion to £37.5 billion.

Figure 7: The trade in goods and services deficit, excluding precious metals, narrowed in the three months to August 2023 as imports fell by more than exports

UK trade balances, current prices, seasonally adjusted, three-monthly periods, August 2020 to August 2023

Figure 7: The trade in goods and services deficit, excluding precious metals, narrowed in the three months to August 2023 as imports fell by more than exports

2. These data are our best estimate of these bilateral UK trade flows. Users should note that alternative estimates are available, in some cases, via the statistical agencies for bilateral countries or through central databases, such as [UN Comtrade](#).
3. These interactive charts denote country boundaries in accordance with statistical classifications set out within Appendix 4 of the [Balance of Payments \(BoP\) Vademecum \(PDF, 2.9MB\)](#) and does not represent the UK policy on disputed territories.

8 . Revisions

In accordance with the [National Accounts Revisions Policy](#), the data in this release have been revised back to January 1997 when compared with trade figures published in our [previous bulletin](#) on 13 September 2023. Data in this release are consistent with estimates published in our [Quarterly gross domestic product \(GDP\)](#), [Sector accounts](#) and [Balance of payments](#) releases published on 29 September 2023. These data are consistent with Blue Book and Pink Book 2023, which will be published 31 October 2023.

We have applied a downward adjustment of £6.0 billion to our estimates of goods imports from the EU for January to June 2022 to account for the impact of Staged Customs Controls (SCC). We have published an article, [Impact of trade in goods data collection changes on UK trade statistics: adjustments to 2022 EU imports estimates](#), summarising these adjustments. Additionally, revisions have been made to improve the measurement of globalisation and improve estimates of smuggled tobacco, among other methodological improvements.

9 . UK trade data

[UK trade: goods and services publication tables](#)

Dataset | Released 12 October 2023

Monthly data on the UK's trade in goods and services, including trade inside and outside the EU.

[UK trade time series](#)

Dataset MRET | Released 12 October 2023

Monthly value of UK exports and imports of goods and services by current price, chained volume measures (CVMs) and implied deflators (IDEFs).

[UK trade in goods by classification of product by activity time series](#)

Dataset MQ10 | Released 12 October 2023

Quarterly and annual time series of the value of UK imports and exports of goods grouped by product. Goods are attributed to the activity of which they are the principal products.

[Customise my dataset: country by commodity](#)

Dataset | Released 12 October 2023

Customisable version of country by commodity data on the UK's trade in goods, including trade by all countries and selected commodities, exports and imports, non-seasonally adjusted.

[Other related trade data](#)

Dataset web page | Released 12 October 2023

Other UK trade data related to this publication. These include trade in goods for all countries with the UK, monthly export and import country-by-commodity trade in goods data, and revisions triangles for monthly trade data.

10 . Glossary

Chained volume measures (CVMs)

CVM estimates are a "real" measure in that they have had the effect of inflation removed to measure the change in volume between consecutive periods, fixing the prices of goods and services in one period (known as the base year, which is 2019 for trade).

Current price measures (CPs)

These estimates measure the actual price paid for goods or services and are not adjusted for inflation. Unless otherwise stated, all current price data are provided in £ million and are seasonally adjusted.

Inflation

Inflation is the change in the average price level of goods and services over a period of time.

Implied deflators (IDEFs)

An IDEF shows the implied change in average prices for the respective components of the trade balance, for example, the IDEF for imports will show the average price movement for imports.

Precious metals and non-monetary gold

Precious metals include precious metals, silver, platinum and palladium, and it forms part of the commodity group "unspecified goods". Non-monetary gold comprises the majority of this group and is the technical term for gold bullion not owned by central banks.

Trade balance

The trade balance is the difference between exports and imports or exports minus imports. When the value of exports is greater than the value of imports, the trade balance is in surplus. When the value of imports is greater than the value of exports, the trade balance is in deficit. The balance is sometimes referred to as "net exports".

A full [Glossary of economic terms](#) is available.

11 . Measuring the data

The UK leaving the EU and the subsequent transition period, along with the impact of the coronavirus (COVID-19) pandemic, supply chain disruption and global recession, have caused higher levels of volatility in trade statistics in recent years. The monthly analysis shows short-term trade movements, but it is important to note that monthly data can be erratic, and therefore movements should be treated with caution.

Data sources

Data from HM Revenue and Customs (HMRC) make up over 90% of trade in goods value and are the main source for this release. HMRC data collection changes following Brexit have affected statistics on UK trade in goods with the EU. For further details, see our [Impact of trade in goods data collection changes on UK trade statistics articles](#).

Data from the quarterly International Trade in Services (ITIS) Survey make up over 50% of trade in services data. For further details, see our [UK Trade Quality and Methodology Information \(QMI\)](#).

Data from the International Passenger Survey (IPS) are the main source for travel services, historically making up around 8% of total imports. Following suspension of the survey in 2020, the survey has now largely resumed, with a very small number of ports yet to have resumed interviewing. We advise continued caution when using these data until the IPS is fully operational. For further details, see our [UK Trade QMI](#).

Unless otherwise specified, data within this bulletin are in current prices and have not been adjusted to remove the effects of inflation. In line with international standards, our headline trade statistics contain the UK's exports and imports of non-monetary gold. For further information, see our [National Accounts articles: A brief explanation of non-monetary gold in national accounts](#).

Method

Trade is measured through both exports and imports of goods and services. Data are supplied by over 30 sources, including several administrative sources, with HMRC being the largest for trade in goods.

Office for National Statistics (ONS) UK trade figures are produced by looking at country of dispatch, which records imports as coming from the country dispatching the shipments. However, trade figures can also be produced by country of origin, as is used by the Department for Energy Security and Net Zero (DESNZ). Users should be aware of the different accounting methods used and the resulting differences across trade figures.

Monthly trade in services data are taken from quarterly trade in services data and split across the months within that quarter through estimation. In months where we have a full quarter's data, we revise previous estimates of monthly values within that quarter.

For more detailed information about the methods used to produce UK trade statistics, see our [UK Trade methodology](#).

12 . Strengths and limitations

The [UK Statistics Authority suspended the National Statistics designation of UK trade \(PDF, 72.9KB\)](#) on 14 November 2014. We have now responded to all of the specific requirements of the Office for Statistics Regulation's (OSR) [reassessment of UK trade](#). As part of our engagement with the OSR team, we are sharing our continuous improvement and development plans to support UK trade statistics regaining [National Statistics status](#). We welcome feedback on our new trade statistics, developments, and future plans by email to trade@ons.gov.uk.

Trade asymmetries

Asymmetries can be caused by a range of conceptual and measurement variations between the estimation practices of different countries. Statistical agencies are likely to have different source data, estimation methods, and methodological, geographical, and definitional differences. For more information, see [HM Revenue and Customs' \(HMRC's\) UK trade asymmetries](#). For Office for National Statistics (ONS) analysis on trade in services asymmetries, see our [Asymmetries in trade data articles](#).

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in our [UK Trade Quality and Methodology Information \(QMI\)](#).
