1 . Main points

- Retail sales volumes are estimated to have fallen by 0.3% in October 2023, following a fall of 1.1% in September 2023 (revised from a fall of 0.9%).
- Looking broader, sales volumes fell by 1.1% in the three months to October 2023 when compared with the previous three months.
- Automotive fuel sales volumes fell by 2.0% in October 2023; in the three months to October, sales volumes fell by 0.7% when compared with the previous three months, which may be affected by increasing fuel prices.
- Food stores sales volumes fell by 0.3% in October 2023, from being unchanged (0.0%) in September 2023.
- Non-food stores sales volumes fell by 0.2% in October 2023, following a 2.1% fall in September 2023; retailers suggested that cost of living, reduced footfall and the wet weather in the second half of the month contributed to the fall.
- Non-store retailing (predominantly online retailers) sales volumes rose by 0.8% in October 2023 following a fall of 2.4% in September 2023.

2 . Retail sales in October

Table 1: Main retail figures, volume and value sales, October 2023
Seasonally adjusted, percentage change, Great Britain

	Most recent month on a year earlier	Most recent 3 months on a year earlier	Most recent month on previous month	Most recent 3 months on previous 3 months	October 2023 compared with February 2020
Value (amount spent)	2.2	3.5	0.1	0.3	16.9
Volume (quantity bought)	-2.7	-1.8	-0.3	-1.1	-3.1
Value (excluding automotive fuel)	4.0	5.4	0.0	0.0	18.2
Volume (excluding automotive fuel)	-2.4	-1.7	-0.1	-1.1	-2.2

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Table 1 provides a snapshot of the retail sales industry in October 2023, with both volume and value growth rates.

The reporting period for this bulletin covers 1 October to 28 October 2023.

Figure 1: Divergence between retail sales volumes and values

Volume and value sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Figure 1: Divergence between retail sales volumes and values

Volume and value sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Figure 1 shows continued divergence between quantities bought (volume) and amount spent (value) in retail sales over time because of price increases.

When compared with their pre-coronavirus (COVID-19) pandemic level in February 2020, total retail sales were 16.9% higher in value terms, but volumes were 3.1% lower.

Retail sales volumes in October 2023 were at their lowest level since February 2021 when there were widespread and extensive restrictions to non-essential retail in England, Scotland and Wales.

Month-on-month contribution to growth by sector

Figure 2: Retail sales in October 2023 were predominately affected by a fall in automotive fuel sales volumes

Contribution to monthly growth, volume seasonally adjusted, Great Britain, October 2023

Figure 2: Retail sales in October 2023 were predominately affected by a fall in automotive fuel sales volumes

Contribution to monthly growth, volume seasonally adjusted, Great Britain, October 2023

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.

Figure 2 shows contributions to the 0.3% monthly fall in overall retail sales volumes (quantity bought) in October 2023. The fall over the month was predominately because of a fall in automotive fuel sales volumes, but also from both food and non-food stores. Non-store retailing was the only main sector to report growth in sales volumes over the month.

3 . Retail sales, selected sectors

Automotive fuel

Figure 3: Automotive fuel sales volumes at lowest level since March 2021

Volume sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Figure 3: Automotive fuel sales volumes at lowest level since March 2021

Volume sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Automotive fuel sales volumes fell by 2.0% in October 2023, as retailers reported that consumers were spending their money more cautiously, alongside the impact of bad weather.

Despite some recent volatility in the monthly data series, in the three months to October 2023, sales volumes fell by 0.7% when compared with the previous three months. This may be because of the increasing price of fuel since July 2023 as reported by the Department for Energy Security and Net Zero in their [Weekly road fuel prices](#) release.

Food stores

Figure 4: Food store sales volumes fall back into decline

Volume and value sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Figure 4: Food store sales volumes fall back into decline

Volume and value sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Food stores sales volumes fell by 0.3% in October 2023, from being unchanged (0.0%) in the previous month.

Supermarkets reported an increase in sales volumes of 0.2% over the month while both specialist food stores (such as butchers and bakers), and alcohol and tobacco stores reported falls of 4.2% and 10.4%, respectively. Feedback from these retailers suggested that consumers were buying cheaper products and prioritising important items.

Non-food stores

Figure 5: Non-food stores sales volumes at lowest level since March 2021

Volume sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Figure 5: Non-food stores sales volumes at lowest level since March 2021

Volume sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Total non-food stores sales volumes (the total of department, clothing, household and other non-food stores) fell by 0.2% in October 2023, from a fall of 2.1% in September 2023. Retailers suggested that cost of living, reduced footfall and the wet weather contributed to the fall.

Our [Economic activity and social change in the UK, real-time indicators](#) release reported a fall in national retail footfall (supplied by Springboard) towards the end of October. This is likely because of the unsettled and very wet weather in the second half of the month as detailed by the [Met Office's monthly climate summary for October \(PDF, 4.9MB\)](#).

Within non-food, most sub-sectors reported falls in sales volumes over the month. Clothing stores reported a 0.9% fall in October 2023 sales volumes. Retailers attributed this to the continued unseasonably warm weather, particularly at the beginning of the month, affecting the sale of autumn and winter wear.

Household goods stores sales volumes fell by 1.1% in October 2023, mainly because of a fall from furniture stores.

Department stores sales volumes fell by 0.1% in October 2023, with some retailers suggesting this was because of a drop in consumer confidence.

Other non-food stores was the only sub-sector to register positive growth, with sales volumes rising by 0.8% in October 2023. This was because of a partial rebound from watches and jewellery stores, following a strong fall in September 2023.

Non-store retailing

Figure 6: Non-store retailing sees tentative growth

Volume sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Figure 6: Non-store retailing sees tentative growth

Volume sales, seasonally adjusted, Great Britain, October 2019 to October 2023

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Non-store retailing sales volumes rose by 0.8% in October 2023 following a fall of 2.4% in September 2023.

When compared with their pre-coronavirus (COVID-19) pandemic level in February 2020, sales volumes for this sector were up by 16.2%.

4 . Online retail

Table 2: Summary of internet statistics: October 2023
Value, seasonally adjusted, percentage rates and percentage change, Great Britain

Category	Online sales as a proportion of retail in this sector	Online sales: Most recent month on a year earlier	Online sales: Most recent month on previous month	Index categories and their percentage weights
All retailing Footnote 1	26.6	5.1	-1.2	100.0
All food	9.1	4.9	-1.7	14.3
All non-food	22.9	2.6	-2.8	36.1
Department stores	22.2	-0.7	-0.6	7.0
Textile, clothing and footwear stores	27.7	8.8	-2.5	11.6
Household goods stores	26.6	16.7	-2.9	7.6
Other stores	17.2	-11.6	-4.8	9.9
Non-store retailing	90.1	7.1	0.2	49.6

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Notes

1. All retailing refers to sales as a proportion of total retail sales.
2. Percentage weights based on 2022 data.

Table 2 shows the month-on-month and month-on-year (annual) growth rates for the amount spent online by value, and the proportion of total retail sales value that was made online by sector. The percentage weights show where money is spent online. For example, seven pence in every pound spent online was spent in department stores in 2022.

Online spending values fell by 1.2% from September to October 2023, with falls across all sectors except non-store retailing.

As the monthly fall in the value of online retail was larger than the monthly fall in the value of total retail, the proportion of online sales also fell, from 26.9% in September 2023 to 26.6% in October 2023.

The proportion of online sales is broadly consistent with the average of the preceding 12 months (26.5%) and substantially above pre-coronavirus (COVID-19) pandemic levels (19.7% in February 2020).

5 . Retail sales data

[Retail Sales Index](#)

Dataset | Released 17 November 2023

Dataset | Released 17 November 2023

Internet sales in Great Britain by store type, month and year.

[Retail Sales Index categories and their percentage weights](#)

Dataset | Released 24 March 2023

Retail sales categories and descriptions, and their percentage of all retailing in Great Britain.

6 . Glossary

Value (amount spent)

The value estimates reflect the total turnover that businesses have collected over a standard period.

Volume (quantity bought)

The volume estimates are calculated by taking the value estimates and adjusting to remove the effect of price changes.

Seasonally adjusted

Seasonally adjusted estimates are derived by estimating and removing calendar effects (for example, Easter moving between April and May) and seasonal effects (such as increased spending in December because of Christmas) from the non-seasonally adjusted (NSA) estimates.

Non-seasonally adjusted

Non-seasonally adjusted estimates refer to raw data, where the effects of regular or seasonal patterns have not been removed.

Non-store retailing

Non-store retailing refers to retailers that do not have a store presence. While the majority is made up of online retailers, it also includes other retailers, such as stalls and markets.

7 . Measuring the data

Quality

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in our [Retail Sales Index Quality and Methodology Information \(QMI\)](#).

We have removed the [business analysis dataset](#) and the distribution analysis table, within the [summary tables dataset](#), from the data published alongside this release to allow further quality assurance. We are also considering discontinuing these tables in future. Please contact us at retail.sales.enquiries@ons.gov.uk if you make use of these tables.

Revisions

Revisions in this release are a result of:

- revisions to seasonal adjustment factors, which have been reviewed and re-estimated
- late responses to survey returns replacing imputations, or revisions to original returns

Revisions are allowed to occur naturally each month, along the full length of each data time series, following direct seasonal adjustment of the component time series.

For further information on the revisions profile, please see our [Retail sales revisions triangles dataset](#), published on a one-month growth basis, and our [Retail sales revisions triangles datasets](#), published on a three-month growth basis.

8 . Strengths and limitations

Uses and users

The Retail Sales Index (RSI) is an important economic indicator and one of the earliest short-term measures of economic activity. It is used in the creation of the national accounts and widely used by private and public sector institutions, particularly by the Bank of England and HM Treasury, to assist in informed decision and policymaking.

Comparability with international data

The most recent [international estimate of retail sales](#) available for October 2023 was published by the United States Census Bureau on 15 November 2023. In their [Advanced monthly sales for retail and food services October 2023 report](#), they included the amount spent in the United States retail industry, including motor vehicles and parts, and food services.

Data for Northern Ireland are published by the [Northern Ireland Statistics and Research Agency \(NISRA\)](#). Their [Retail Sales Index release for Quarter 2 \(Apr to June\) 2023](#) was published on 14 September 2023.

It should be noted that accurate comparisons cannot be made against these or other international statistics for a variety of reasons, including differences in methodology.

Eurostat also published their latest estimates of the [volume of retail trade \(PDF, 347KB\)](#) across the EU on 8 November 2023 for September 2023. This shows the seasonally adjusted volume of retail trade in both the euro area (EA19) and the European Union (EU27), when compared with August 2023.

Estimates in this table have been produced by combining a breakdown of commodity sales from 54 large retailers with total sales from other retailers.

The monthly periods consist of 4 weeks except for March, June, September and December which are 5 weeks. January 2020 is also a 5 week period.

The quarterly indices are the weighted averages of the monthly indices for the months within the quarter, the weights being the number of weeks in each monthly period.

¹ The Food, drink and tobacco category, Household goods category and Other non-food category include revisions to the commodity classifications provided by respondents.

In July 2018, we increased our sample for the commodity breakdown from 31 to 54 retailers to improve coverage and better represent the commodities sold. Growth rates may not be comparable as a result. This does not impact the main retail sales data.
