1 . Main points

The following information is for the latest survey period, 22 May to 2 June 2024, based on adults in Great Britain.

We continued to ask people what they thought were the important issues facing the UK today.

- The most commonly reported issues were the cost of living (87%), the NHS (85%), the economy (68%), crime (60%), housing (57%), and climate change and the environment (56%).
- Immigration (52%), international conflict (48%) and education (46%) were other commonly reported issues facing the UK today.

Among the 54% of adults who told us that their cost of living had increased over the last month:

- rises in the price of their food shopping (91%), fuel (58%) or their gas and electricity bills (50%) continue to be the most commonly reported reasons for an increase in their cost of living
- the proportion reporting that the price of their gas or electricity bills had increased was 50%, a fall from the height at the start of 2024 (85% in the period 4 to 14 January 2024)
- the proportion reporting that the price of their fuel had increased was 58%, this has been rising since the start of 2024 (41% in the period 4 to 14 January 2024)

2 . Public opinions and social trends data

[Public opinions and social trends, Great Britain: household finances](#)

Dataset | Released 7 June 2024

Indicators from the Opinions and Lifestyle Survey (OPN) of people's experiences of changes in their cost of living and household finances in Great Britain.

[Public opinions and social trends, Great Britain: personal well-being and loneliness](#)

Dataset | Released 7 June 2024

Indicators from the Opinions and Lifestyle Survey (OPN) reflecting the worries, personal well-being, and loneliness of adults in Great Britain.

[Public opinions and social trends, Great Britain: personal experiences of shortages of goods](#)

Dataset | Released 7 June 2024

Indicators from the Opinions and Lifestyle Survey (OPN) of whether people experienced shortages of food when shopping in Great Britain.

[Public opinions and social trends, Great Britain: GP practice access](#)

Dataset | Released 7 June 2024

Indicators from the Opinions and Lifestyle Survey (OPN) related to people's experiences of GP practice access in Great Britain.

[Public opinions and social trends, Great Britain: artificial intelligence \(AI\)](#)

Dataset | Released 7 June 2024

Indicators from the Opinions and Lifestyle Survey (OPN) on the public's awareness, opinions, and expectations about artificial intelligence (AI).

[Public opinions and social trends, Great Britain: working arrangements](#)

Dataset | Released 7 June 2024

Indicators from the Opinions and Lifestyle Survey (OPN) related to the working arrangements of people in Great Britain.

3 . Measuring the data

This release contains data and indicators from the Office for National Statistics' (ONS's) Opinions and Lifestyle Survey (OPN).

Breakdowns by age and sex have been provided for fortnightly estimates since our 27 March to 7 April 2024 edition of the [Public opinions and social trends, Great Britain datasets](#). Before this, breakdowns by age and sex were reported until the 17 to 29 May 2023 edition of all datasets. This is based on routine review of the relevance and usefulness of this release.

Estimates from the OPN by a variety of personal characteristics are provided on a regular basis in other ONS releases. For example, OPN estimates relating to the impact of the cost of living among different sub-groups of the population are provided within our regular [Impact of increased cost of living on adults across Great Britain article series](#).

For all estimates in the datasets, [confidence intervals](#) are provided. Where changes in results from previous weeks are presented in this release, or comparisons between estimates are made, associated confidence intervals should be used to assess the [statistical significance](#) of the differences.

Sampling and weighting

In the latest period (22 May to 2 June 2024), we sampled 4,999 households. This sample was randomly selected from people who had previously completed the Labour Market Survey (LMS) or OPN. The responding sample for the latest period contained 2,619 individuals, representing a 52% response rate.

Survey weights were applied to make estimates representative of the population (based on ONS population estimates). Because of sampling changes in July 2023, some groups in our unweighted sample may be overrepresented (for example, older adults).

Estimates for some groups of the population may be subject to greater uncertainty because of smaller sample sizes for these groups (for example, younger adults).

Further information on the survey design and quality can be found in our [Opinions and Lifestyle Survey Quality and Methodology Information \(QMI\)](#).
