The chart shows the quantity bought in retail sales over time, for both the rolling three-month-on-three-month and the month-on-month movement.

Sales volumes fell by 1.2% during June 2024, following a 2.9% rise in May 2024. Volumes fell by 0.2% over the year to June 2024, and were 1.3% below their pre-coronavirus (COVID-19) pandemic level in February 2020.

More broadly, there was a 0.1% fall in Quarter 2 (Apr to June) 2024 when compared with Quarter 1 (Jan to Mar) 2024. These data are available in our [Retail Sales Index datasets](#).

The reporting period for this bulletin covers 26 May 2024 to 29 June 2024.

#### Notes:

1. "Non-store retailing" refers to retailers that do not have a store presence. While the majority is made up of online retailers, it also includes other retailers, like stalls and markets.
2. More data are available in our [Retail Sales Index datasets](#).

Non-food stores sales volumes (the total of department, clothing, household, and other non-food stores) fell by 2.1% in June 2024. This follows a rise of 3.3% in May 2024. All sub-sectors fell over the month, with strong downward contributions from department stores, clothing and footwear retailers, and furniture stores. Retailers suggested election uncertainty, poor weather, and low footfall affected sales. When comparing Quarter 2 (Apr to June) 2024 with Quarter 1 (Jan to Mar) 2024, non-food stores sales volumes fell by 0.5%.

Food stores fell by 1.1% in June 2024, and by 1.3% in Quarter 2 2024, when compared with Quarter 1 2024. This was mainly due to supermarkets. Retailer commentary suggested that both poor weather and economic conditions had an effect, as consumers showed caution with their spending.

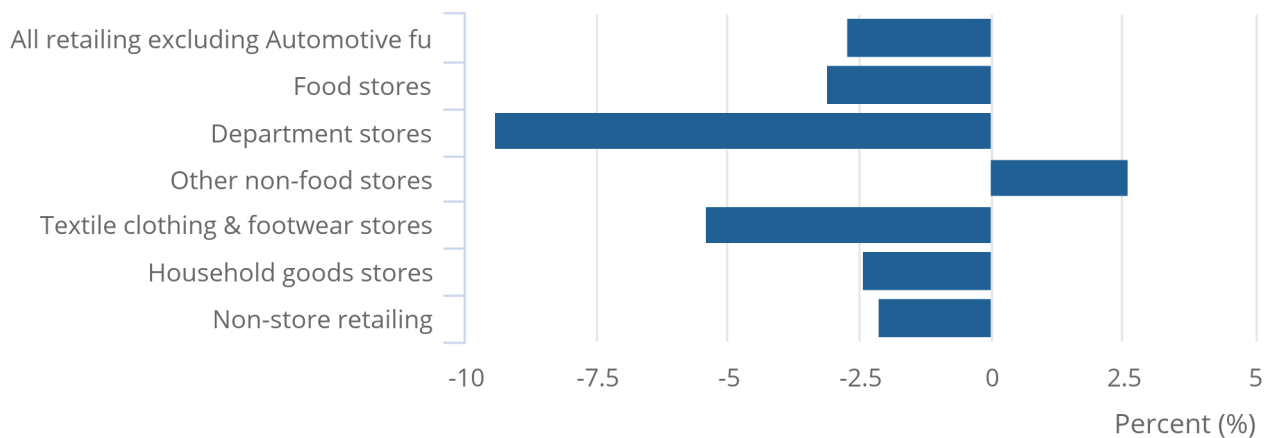

## 4 . Online retail

The amount spent online, known as "online spending values", fell by 2.7% during June 2024, but rose by 2.3%, compared with June 2023.

As total spend, the sum of in-store and online sales, fell by 1.3% over the month, the proportion of sales being made online decreased from 27.5% in May 2024 (revised from 27.2%) to 27.1% in June 2024.

Estimates in this table have been produced by combining a breakdown of commodity sales from 54 large retailers with total sales from other retailers.

The monthly periods consist of 4 weeks except for March, June, September and December which are 5 weeks. January 2020 is also a 5 week period.

The quarterly indices are the weighted averages of the monthly indices for the months within the quarter, the weights being the number of weeks in each monthly period.

<sup>1</sup> The Food, drink and tobacco category, Household goods category and Other non-food category include revisions to the commodity classifications provided by respondents.

In July 2018, we increased our sample for the commodity breakdown from 31 to 54 retailers to improve coverage and better represent the commodities sold. Growth rates may not be comparable as a result. This does not impact the main retail sales data.
