1 . Overview

Retail sales volumes (quantity bought) are estimated to have risen by 0.3% in September 2024, following a rise of 1.0% in August 2024 (unrevised from our last publication).

Computers and telecommunications retailers grew strongly but were partly offset by decreases in supermarkets.

Looking at the quarter, sales volumes rose by 1.9% in Quarter 3 (Jul to Sept) 2024, when compared with Quarter 2 (Apr to June) 2024.

2 . Retail sales in September

Sales volumes show sustained growth in September 2024

Volume sales, seasonally adjusted, Great Britain, September 2021 to September 2024

Sales volumes show sustained growth in September 2024

Volume sales, seasonally adjusted, Great Britain, September 2021 to September 2024

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

The chart shows the quantity bought in retail sales over time, for both the rolling three-month-on-three-month and the month-on-month movement.

Sales volumes rose by 0.3% during September 2024 following a 1.0% rise in August 2024. In September, sales volumes were at their highest index levels since July 2022. During the year to September 2024, sales volumes rose by 3.9%, the largest annual rise since February 2022.

When compared with their pre-coronavirus (COVID-19) pandemic level in February 2020, volumes were down by 0.2%.

More broadly, there was a 1.9% rise during the period from July to September 2024 (Quarter 3) when compared with the three months to June 2024 (Quarter 2), the joint largest, shared with March 2024, since July 2021. This quarterly rise was across all main sectors. When comparing with the same period last year, there was a 2.6% rise, the largest since March 2022. These data are available in our [Retail Sales Index datasets](#).

The reporting period for this bulletin covers 25 August 2024 to 28 September 2024.

3 . Retail sector volumes

Computer and telecommunications retailers boost non-food sales volumes, while food sales decreased

Volume sales, monthly percentage change, seasonally adjusted, Great Britain, September 2024

Computer and telecommunications retailers boost non-food sales volumes, while food sales decreased

Volume sales, monthly percentage change, seasonally adjusted, Great Britain, September 2024

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Notes:

1. Non-store retailing refers to retailers that do not have a store presence. While the majority is made up of online retailers, it also includes other retailers, such as stalls and markets.
2. More data are available in our [Retail Sales Index datasets](#)

Non-food stores sales volumes – the total of department, clothing, household and other non-food stores – rose by 2.5% in September 2024, following a rise of 0.6% in August.

The strongest sub-sector growth was from other non-food stores, which rose by 5.5% over the month to September 2024. Within “other non-food”, computer and telecommunications retailers had the strongest contribution to growth.

Partly offsetting this, supermarkets sales volumes fell by 2.4% during the month to September 2024, leading to the largest month-on-month fall for food stores this year. Comments from retailers pointed to unseasonably poor weather and consumers continuing to cut back on luxury food items.

4 . Online retail values

Online sales rose across most sectors, with only non-store retailers decreasing from the previous month

Value sales, monthly percentage change, seasonally adjusted, Great Britain, September 2024

Online sales rose across most sectors, with only non-store retailers decreasing from the previous month

Value sales, monthly percentage change, seasonally adjusted, Great Britain, September 2024

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Notes:

1. Non-store retailing refers to retailers that do not have a store presence. While the majority is made up of online retailers, it also includes other retailers, such as stalls and markets.
2. More data, such as the proportion of sales made online, are available in our [Retail Sales Index internet sales datasets](#).

The amount spent online, known as “online spending values”, rose by 1.3% during September 2024, and by 6.7% compared with September 2023.

Total spend – the sum of in-store and online sales – rose by 0.1% over the month. As a result, the proportion of sales made online increased from 27.5% in August 2024 (revised down from 27.6%) to 27.7% in September 2024.

5 . Data on retail sales

[Retail Sales Index](#)

Dataset | Released 18 October 2024

A series of retail sales data for Great Britain in value and volume terms, seasonally and non-seasonally adjusted.

[Retail sales pounds data](#)

Dataset | Released 18 October 2024

Total sales and average weekly spending estimates for each retail sector in Great Britain in the thousands (British pounds).

[Retail Sales Index internet sales](#)

Dataset | Released 18 October 2024

Internet sales in Great Britain by store type, month and year.

[Retail Sales Index categories and their percentage weights](#)

Dataset | Released 22 March 2024

Retail sales categories and descriptions and their percentage of all retailing in Great Britain.

6 . Data sources and quality

For September 2024, the Retail Sales Index (RSI) response rates were 59.3%, based on returned forms. This accounted for 87.8% of total turnover coverage of the sample population. For historical response information, see our [Retail sales quality tables dataset](#).

Information on how we calculated the data, including strengths and limitations, and a [glossary of relevant terms](#), is available in our [Retail Sales Index Quality and Methodology Information \(QMI\)](#).

Accredited official statistics

These accredited official statistics were independently reviewed by the Office for Statistics Regulation in March 2015. They comply with the standards of trustworthiness, quality and value in [the Code of Practice for Statistics](#) and should be labelled “accredited official statistics”.

Estimates in this table have been produced by combining a breakdown of commodity sales from 54 large retailers with total sales from other retailers.

The monthly periods consist of 4 weeks except for March, June, September and December which are 5 weeks. January 2020 is also a 5 week period.

The quarterly indices are the weighted averages of the monthly indices for the months within the quarter, the weights being the number of weeks in each monthly period.

¹ The Food, drink and tobacco category, Household goods category and Other non-food category include revisions to the commodity classifications provided by respondents.

In July 2018, we increased our sample for the commodity breakdown from 31 to 54 retailers to improve coverage and better represent the commodities sold. Growth rates may not be comparable as a result. This does not impact the main retail sales data.

5 VALUE OF RETAIL SALES BY COMMODITY AT CURRENT PRICES NON-SEASONALLY ADJUSTED
