6. [Cite this statistical bulletin](#)

# 1 . Main points

- Real households' disposable income per head is estimated to have shown no growth in Quarter 3 (July to Sept) 2024, following growth of 1.4% in Quarter 2 (Apr to June) 2024.
- The household saving ratio is estimated at 10.1% in Quarter 3 2024, down slightly from 10.3% in the previous quarter; the movement in the saving ratio was driven by an increase in household final consumption expenditure.
- The UK's borrowing position with the rest of the world as a percentage of gross domestic product (GDP) is estimated to have decreased to 2.8% in Quarter 3 2024 compared with 3.5% of GDP in Quarter 2 2024.
- Non-financial corporations decreased net borrowing to 2.4% of GDP in Quarter 3 2024, from 2.9% of GDP in the previous quarter; within non-financial corporations, private non-financial corporations decreased their net borrowing to £17.1 billion from net borrowing of £20.6 billion in the previous quarter.
- Financial corporations increased their net lending position to 1.8% of GDP in Quarter 3 2024, from 1.7% of GDP in Quarter 2 2024; this was driven by a fall in acquisitions less disposals of valuables of £8.0 billion, as non-monetary gold exports increased in the latest quarter.
- General government decreased net borrowing to 5.3% of GDP in Quarter 3 2024 from 5.9% of GDP in Quarter 2 2024; this decrease was driven by a rise in taxes on income of £4.7 billion and taxes on production and imports of £1.3 billion.

## 2 . Quarterly sector accounts data

### [Quarterly sector accounts](#)

Dataset | Released 23 December 2024

Quarterly aggregate economic indicators and summary estimates for the private non-financial corporations and households' sectors of the UK economy, and revisions.

### [UK Economic Accounts](#)

Dataset | Released 23 December 2024

Quarterly national accounts aggregates, per capita data, including gross domestic product by income and expenditure, gross value added, gross fixed capital formation, change in inventories, gross operating surplus and revisions.

### [UK Economic Accounts time series](#)

Dataset | Released 23 December 2024

Quarterly estimates of national product, income and expenditure, sector accounts revisions and balance of payments.

## 3 . Glossary

### Interactive glossary

[Economic Definitions Interactive Glossary \(ons.gov.uk\)](#)

## Gross disposable household income and real household disposable income

Gross disposable household income (GDHI) is the estimate of the total amount of income that households have available to either spend, save or invest including income received from wages (and the self-employed), social benefits, pensions and net property income (that is, earnings from interest on savings and dividends from shares) less taxes on income and wealth.

Adjusting GDHI to remove the effects of inflation gives real household disposable income (RHDI). This is a measure of the real purchasing power of households' income, in terms of the physical quantity of goods and services they would be able to purchase if prices remained constant over time.

## Household saving ratio

The saving ratio estimates the amount of money households have available to save as a percentage of their gross disposable income plus pension accumulations.

## Net lending or borrowing

The net lending of a sector represents the surplus resources that a sector makes available to other sectors. Net borrowing represents their financing of a deficit from other sectors.

Net lending means a sector has money left over after its spending and investment in a given period, whereas net borrowing means it has spent and invested more than it received and has a need for financing, which may be covered by borrowing, issuing shares or bonds, or by drawing on reserves.

# 4 . Measuring the data

## Revisions within this release

This bulletin includes new data for the latest available quarter, Quarter 3 (July to Sept) 2024 with revisions to data from Quarter 1 (Jan to Mar) 2023. This bulletin follows our [National Accounts Revisions Policy](#).

## Understanding the sector and financial accounts

This release presents analysis on UK aggregate data for the main economic indicators and summary estimates from the institutional sectors of the UK economy that are presented in our [UK Economic Accounts \(UKEA\) dataset](#):

- public corporations
- private non-financial corporations
- financial corporations
- households
- non-profit institutions serving households (NPISH)
- central government
- local government
- rest of the world

This release uses data from the UKEA and provides detailed estimates of national product, income and expenditure, UK sector, non-financial and financial accounts, and UK Balance of Payments. These accounts are the underlying data that produce a single estimate of gross domestic product (GDP) using income, production and expenditure data.

## Quality and Methodology Information report

The [Quarterly sector accounts QMI report](#) contains important information on:

- the strengths and limitations of the data and how they compare with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data

## System of National Accounts consultation

As part of an update to the System of National Accounts, the United Nations (UN) are in the process of consulting on several areas being considered for improvement. Previous and live consultations can be found on the [UN Statistics Division website](#). If you would like to discuss any of these consultations with the Office for National Statistics (ONS), please contact us at [sna.consultations@ons.gov.uk](mailto:sna.consultations@ons.gov.uk). Bodies outside the UK national statistical system are also free to respond to the consultations themselves.

## Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments and labour market statistics.

## 5 . Related links

### [GDP quarterly national accounts](#)

Bulletin | Released 23 December 2024

Revised quarterly estimate of gross domestic product (GDP) for the UK. Uses additional data to provide a more precise indication of economic growth than the first estimate.

### [GDP first quarterly estimate](#)

Bulletin | Released 15 November 2024

First quarterly estimate of gross domestic product (GDP). Contains current and constant price data on the value of goods and services to indicate the economic performance of the UK.

### [Balance of payments](#)

Bulletin | Released 23 December 2024

A measure of cross-border transactions between the UK and rest of the world. Includes trade, income, capital transfers and foreign assets and liabilities.

### [UK flow of funds accounts matrices: 2019](#)

Article | Released 7 November 2019

Annual update of the UK flow of funds matrices incorporating the latest available Blue Book data, as part of the Economic Statistics Transformation Programme.

### [Alternative measure of UK households' income and saving: April to June 2018](#)

Article | Released 8 October 2018

Experimental Statistics on the impact of removing "imputed" transactions from real household disposable income and the saving ratio to better represent the economic experience of UK households.

1 This data uses the latest population estimates with the exception of the latest year where populations projections are used. The quarterly data in this table does not sum to annuals

2 This data uses the UK resident population mid-year estimates published and the population projections available

3 The private non-financial corporations self-investment ratio is calculated by taking the sectors gross saving (RPKZ) and dividing it by their gross fixed capital formation (ROAW)

4 Quarterly Households debt to income ratio is calculated by taking the balance of Household debt (NIWK) and dividing it by the four quarter rolling sum of gross disposable income (HABN).
