Next release:
10 June 2025

Correction

13 May 2025 13:55

We have corrected an error in the downloadable PDF for this release. The previous version of this PDF had missing figures for unemployment and number of unemployed per vacancy in Table 20 – Vacancies and Unemployment. As a result, the figures for the change on quarter and change on year were incorrect, as they were comparing to a missing value. We have now included these figures and updated the relevant figures for the change on quarter and change on year.

2 . Main points

Latest data

Estimates for payrolled employees in the UK decreased by 47,000 (0.2%) between February and March 2025 and fell by 63,000 (0.2%) between March 2024 and March 2025.

Payrolled employees fell by 53,000 (0.2%) over the quarter and fell by 4,000 (0.0%) over the year, when looking at January to March 2025. This is the period comparable with our Labour Force Survey (LFS) estimates.

The early estimate of payrolled employees for April 2025 decreased by 33,000 (0.1%) on the month and decreased by 106,000 (0.3%) on the year to 30.3 million. The April 2025 estimate should be treated as a provisional estimate and is likely to be revised when more data are received next month.

LFS estimates from January to March 2025 include the full effect of recent improvements in LFS data collection and sampling methods introduced from January 2024, and are therefore more likely to be representative of labour market conditions. An increased amount of volatility will remain in the LFS estimates from mid-2023 and throughout 2024, so we would advise caution when interpreting change involving those periods. We recommend using LFS estimates as part of our suite of labour market indicators, alongside Workforce Jobs, Claimant Count and Pay As You Earn Real Time Information (PAYE RTI) estimates.

The UK employment rate for people aged 16 to 64 years was estimated at 75.0% in January to March 2025. This is above estimates of a year ago, but largely unchanged in the latest quarter.

The UK unemployment rate for people aged 16 years and over was estimated at 4.5% in January to March 2025. This is above estimates of a year ago, and up in the latest quarter.

The UK economic inactivity rate for people aged 16 to 64 years was estimated at 21.4% in January to March 2025. This is below estimates of a year ago, and down in the latest quarter.

The UK Claimant Count for April 2025 increased on the month and the year, to 1.726 million.

The estimated number of vacancies in the UK fell by 42,000 on the quarter, to 761,000 in February to April 2025. This was the 34th consecutive quarterly decline with quarterly falls seen in 13 out of the 18 industry sectors. Vacancies were 34,000 below their January to March 2020 level.

Annual growth in employees' average regular earnings excluding bonuses in Great Britain was 5.6% in January to March 2025, and annual growth in total earnings including bonuses was 5.5%. RTI pay data showed a similar annual growth rate when compared with Average weekly earnings total earnings, including arrear payments.

Annual growth in real terms, adjusted for inflation using the Consumer Prices Index including owner occupiers' housing costs (CPIH), was 1.8% for regular pay and 1.7% for total pay in January to March 2025.

Annual growth in real terms, adjusted for inflation using the Consumer Prices Index excluding owner occupiers' housing costs (CPI), was 2.6% for both regular pay and total pay in January to March 2025.

There were an estimated 55,000 working days lost because of labour disputes across the UK in March 2025.

Alongside the labour market publication this month we are publishing an [article on LFS quality](#), including coherence. The timing of this quality article coincides with the first period of data incorporating the full impact of some of the larger changes made from January 2024, now fully reflected in estimates for January to March 2025. The article provides information about current response rates, trends and known biases in LFS data and provides users with information to better understand the current quality of the data.

This bulletin includes data from business and social surveys, as well as data from administrative sources. It includes a combination of [accredited official statistics](#) and [official statistics in development](#), and therefore, we advise the consideration of this when using. Read more in [Section 6: Data sources and quality](#).

5 . Glossary

Average weekly earnings

Average weekly earnings (AWE) is calculated using information based on the Monthly Wages and Salaries Survey (MWSS).

AWE measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises, because they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force are not in employment but do not meet the internationally accepted definition of unemployment. This is because they have not been seeking work within the last four weeks or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and

64 years who are not in the labour force. The Labour Force Survey estimates are [official statistics in development](#).

Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. The Labour Force Survey estimates are [official statistics in development](#).

Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (people in work and those seeking and available to work) who are unemployed. The Labour Force Survey estimates are [official statistics in development](#).

Claimant Count

The Claimant Count is an [official statistic in development](#) that measures the number of people who are receiving a benefit principally for the reason of being unemployed. Currently, the Claimant Count consists of those receiving Jobseeker's Allowance and Universal Credit claimants in the "searching for work" conditionality group.

Vacancies

Vacancies are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

Pay As You Earn Real Time Information

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population, rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The PAYE RTI statistics are [official statistics in development](#) (previously called experimental statistics) because the methodologies used to produce the statistics are still in their development phase.

In June 2023, the Office for Statistics Regulation (OSR) published an assessment report of HMRC and Office for National Statistics (ONS) statistics on earnings and employment from PAYE RTI. HMRC and the ONS developed an action plan for focusing on the six requirements and [published an update on progress on 9 December 2024](#).

A more detailed glossary is available in our [Guide to labour market statistics methodology](#).

6 . Data sources and quality

The estimates presented in this bulletin contain uncertainty. For more information, see our [Uncertainty and how we measure it methodology](#).

Information on revisions is available in our [Labour market statistics revisions policy](#).

Information on the strengths and limitations of this bulletin is available in Section 13 of our [Labour market overview, UK: April 2021 bulletin](#).

Further information is available in our [Guide to labour market statistics methodology](#).

Accredited official statistics

On 7 June 2024, the Office for Statistics Regulation (OSR) introduced the new accredited official statistics badge, to denote official statistics that have been independently reviewed by the OSR. Accredited official statistics comply with the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#).

This UK labour market bulletin includes a combination of [accredited official statistics](#) and [official statistics in development](#) (until September 2023, these were called "experimental statistics"). Read more about the change in our [Guide to official statistics in development](#).

The following labour market outputs are accredited official statistics:

- Labour disputes (rapid review completed by the OSR in February 2023)
- Vacancy statistics (reviewed by the OSR in April 2022)
- Workforce Jobs (WFJ) (reviewed by the OSR in April 2022)

The following labour market outputs are [official statistics in development](#):

- Labour Force Survey (LFS) estimates Office for National Statistics (ONS)
- Claimant Count
- Earnings and employment from Pay As You Earn (PAYE) Real Time Information (RTI)

Labour Force Survey

We have been facing the challenge of falling response rates for household surveys, as have other comparable countries. This issue became more acute in the Labour Force Survey (LFS) data collected for August 2023. The LFS estimates due to be published in October 2023 were suspended because of quality concerns. We developed a comprehensive plan to address these concerns and reintroduce LFS, as described in our [Labour Force Survey: planned improvements and its reintroduction methodology](#). We reinstated reweighted LFS estimates into our monthly publication from February 2024, as described in our [Impact of reweighting on LFS key indicators: 2024 article](#). In December 2024, we carried out a [further LFS reweighting exercise, based on 2022 mid-year estimates](#).

Reweightings increased the levels of all labour market statuses but did not address issues surrounding increased LFS volatility, resulting from smaller achieved sample sizes. LFS estimates from January to March 2025 include the full effect of recent improvements in data collection and sampling methods introduced from January 2024 and are therefore more likely to be representative of labour market conditions. An increased amount of volatility will remain in the LFS estimates from mid-2023 and throughout 2024, so we would advise caution when interpreting change involving those periods. We recommend using LFS estimates as part of our suite of labour market indicators, alongside Workforce Jobs, Claimant Count and Pay As You Earn Real Time Information (PAYE RTI) estimates.

We are continuing to improve the quality of the LFS, building on our work to date. This has led to an increase in achieved dataset size, from 63,069 individuals in October to December 2024, to 69,847 individuals in January to March 2025, as shown in our [LFS performance and quality monitoring report: January to March 2025](#).

More information on LFS quality can also be found in our [LFS quality article](#).

Coherence of data sources

Understanding coherence challenges around our employment indicators continues to be a priority.

In April 2025, we published an update on our work on [reconciling estimates of employment from the LFS and WFJ](#). This work makes several adjustments to both LFS and WFJ estimates to try and account for known differences in concepts, coverage and measurement.

LFS reweighting has improved the coherence picture, as strong population growth in recent years is now incorporated into our estimates of all three labour market statuses.

We are also considering how best to consider coherence between HM Revenue and Customs's (HMRC's) PAYE RTI data and WFJ. As the former is essentially focused on employees, we recommend comparison with the employee jobs component of WFJ to align coverage of populations. One other important difference is that the RTI statistics published each month are a measure of people, rather than jobs, as in WFJ.

Our [Comparison of labour market data sources methodology](#) compares data sources and discusses some of the main differences.

More information on Coherence of our labour market data sources can also be found in our [LFS quality article](#).

Labour market transformation

We have provided an update on the transformation of labour market statistics in our [Labour market transformation - update on progress and plans: April 2025 article](#).

We welcome your feedback on this latest update and our plans. Please email us at labour.market.transformation@ons.gov.uk to tell us what you think.

Coronavirus

For more information on how labour market data sources were affected by the coronavirus pandemic, see our [Coronavirus and the effects on UK labour market statistics article](#).

Making our published spreadsheets accessible

Following the [Government Statistical Service \(GSS\) guidance on releasing statistics in spreadsheets](#), we will be amending our published tables over the coming months to improve the usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing [sample versions of a selection of our tables](#) and, where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email us at labour.market@ons.gov.uk.

Revisions

In line with international guidance, the Average Weekly Earnings (AWE) seasonal adjustment process has been reviewed this month, with all periods open to revision. This is an annual process, as outlined in our [Average weekly earnings quality and methodology information \(QMI\)](#). The review leads to revisions to the historical AWE time series, extending back throughout the entire time series. The impact of these revisions on the headline estimates can be found in our dataset [EARN09: Average Weekly Earnings revisions triangle](#).

In the May 2025 publication, Claimant Count levels have been revised back to January 2022 because of a seasonal adjustment review, with denominators revised back to 2013, which may cause revisions to rates.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The Labour Force Survey (LFS) is a survey of households in the UK.
2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.
3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.
4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.
5. Data from Jun-Aug 2011 to Jun-Aug 2022 have been modelled to make them consistent with the new populations introduced in Jul-Sep 2022.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

SUMMARY

2(1) Labour market status by age group

United Kingdom (thousands) seasonally adjusted

	Aged 16 and over						Aged 16-64

Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

1. The split between full-time and part-time employment is based on respondents' self-classification.
2. This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
3. These series cover Employees and Self-employed only. These series include some temporary employees.
4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Enquiries 01633 455400					Source: returns from public sector organisations					

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the public sector from March 1999.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

NatWest Group (formerly Royal Bank of Scotland Group) is included in the public sector from December 2008 to March 2024, but in the private sector for earlier and later time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

1. Estimated as the difference between LFS total employment and the data from public sector organisations.
2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
3. This series excludes locally engaged staff stationed outside the United Kingdom.
4. This series excludes the Northern Ireland Civil Service.
5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at:
<https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/publicsectorpersonnel/bulletins/publicsectoremployment/latest>

Workforce jobs enquiries 01633 456776

Sources: Employer surveys, Labour Force Survey and administrative sources

1. Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

2. This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

Employment by country of birth and nationality

The temporary RTI adjustment applied from January to March 2020 to June to August 2022 was removed from the LFS weighting methodology as part of the reweighting exercise in December 2024, as described in our [Impact of reweighting on LFS key indicators: December 2024](#) article. Due to quality concerns during the pandemic period (as explained in more detail in our [A12 dataset](#)), we have removed the labour market status by country of birth and nationality from our A01 dataset and from tables accompanying our Labour market overview and Employment in the UK bulletins. The country of birth and nationality labour market data will also be withdrawn from our time series data.

Our EMP06 and A12 dataset will continue to be made available on our website, with additional guidance for users. From our February 2025 publication, EMP06 and A12 will be published using the reweighted LFS data. We will continue to review and update users accordingly.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Discouraged workers are those who are not looking for work because they believe no jobs are available.
2. Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:
<https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortr>

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Earnings enquiries: 01633 456120

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period. Email: earnings@ons.gov.uk

3. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

1. The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period. Email: earnings@ons.gov.uk

2. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

Earnings enquiries: 01633 456120

Email: earnings@ons.gov.uk

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

3. Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

17 International Comparisons of Employment and Unemployment rates

Seasonally adjusted											
		Latest period	Employment rate (%) ²	Change on quarter (percentage points)	Change on year (percentage points)			Latest Period	Unemployment rate (%) ³	Change on quarter (percentage points)	Change on year (percentage points)

Source: OECD											
Labour market statistics enquiries: labour.market@ons.gov.uk											

1. As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
2. Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
3. Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.
4. Estimated values are highlighted with shaded cells.

Data source: ONS Labour Disputes Survey			
Labour disputes enquiries 01633 455400			

1. In April 2020, collection and publication of labour disputes data were temporarily suspended to protect and prioritise our outputs in response to the coronavirus (COVID-19) pandemic. In June 2022, collection of the Labour Disputes Inquiry restarted, but only for the period from January 2022 onwards.
2 As a result of difficulties in consistently defining a stoppage over time, the number of working days lost is considered to be a better indicator of the impact of labour disputes than the number of recorded stoppages.
3 A stoppage is defined as a dispute between a single trade union and a single employer. Where a union co-ordinates disputes with several employers, or several unions co-ordinate action with a single employer, this would be counted as multiple stoppages.
[p] - provisional, [r] - revised, [x] - not available

Data source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

2. The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

The Labour Force Survey is tabulated by region of residence.

1. Economically active = Employment plus Unemployment.

2. Denominator = all persons aged 16 to 64.

3. Denominator = total economically active

4. Data from January to March 2019 onwards has been reweighted, causing a step change discontinuity.

N92000002	Northern Ireland	952	5

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.
HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The
UK workforce jobs estimates therefore do not equal the sum of the regional estimates.
Workforce Jobs data for March 2019 onwards has been affected by the reweighting of the LFS, causing a step change discontinuity.
