# 1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 4.1% in the 12 months to June 2025, up from 4.0% in the 12 months to May.
- On a monthly basis, CPIH rose by 0.3% in June 2025, compared with a rise of 0.2% in June 2024.
- The Consumer Prices Index (CPI) rose by 3.6% in the 12 months to June 2025, up from 3.4% in the 12 months to May.
- On a monthly basis, CPI rose by 0.3% in June 2025, compared with a rise of 0.1% in June 2024.
- Transport, particularly motor fuels, made the largest upward contribution to the monthly change in both CPIH and CPI annual rates; housing and household services, particularly owner occupiers' housing costs, made a large, partially offsetting, downward contribution in CPIH.
- Core CPIH (CPIH excluding energy, food, alcohol, and tobacco) rose by 4.3% in the 12 months to June 2025, up slightly from 4.2% in the 12 months to May; the CPIH goods annual rate rose from 2.0% to 2.4%, while the CPIH services annual rate eased slightly from 5.3% to 5.2%.
- Core CPI (CPI excluding energy, food, alcohol, and tobacco) rose by 3.7% in the 12 months to June 2025, up from 3.5% in the 12 months to May; the CPI goods annual rate rose from 2.0% to 2.4%, while the CPI services annual rate was unchanged at 4.7%.

## 2 . Consumer price inflation rates

Table 1: CPIH, OOH component and CPI index values, and annual and monthly rates  
UK, June 2024 to June 2025

## Figure 1: CPI annual inflation rate highest since January 2024

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, June 2015 to June 2025

### Figure 1: CPI annual inflation rate highest since January 2024

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, June 2015 to June 2025

Source: Consumer price inflation from the Office for National Statistics

The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 4.1% in the 12 months to June 2025, up from 4.0% in the 12 months to May (Figure 1).

On a monthly basis, CPIH rose by 0.3% in June 2025, compared with a rise of 0.2% in June 2024.

The owner occupiers' housing (OOH) costs component of CPIH rose by 6.4% in the 12 months to June 2025. This is down from 6.7% in the 12 months to May, returning to the levels seen in spring 2024. OOH costs rose by 0.3% on the month, compared with a 0.6% increase a year earlier.

The Consumer Prices Index (CPI) rose by 3.6% in the 12 months to June 2025, up from 3.4% in the 12 months to May. The June 2025 figure was the highest recorded since January 2024, when the rate was 4.0%.

On a monthly basis, CPI rose by 0.3% in June 2025, compared with a rise of 0.1% in June 2024.

The main drivers of the annual inflation rate for CPIH and CPI are the same where they are common to both measures. However, the OOH costs component accounts for approximately 17% of the CPIH and is the main driver for differences between the CPIH and CPI inflation rates. This makes CPIH our most comprehensive measure of inflation. We cover this in more detail in [Section 4: Latest movements in CPIH inflation](#) and provide a commentary on the CPI in [Section 5: Latest movements in CPI inflation](#). We also cover both CPIH and CPI in [Section 3: Notable movements in prices](#), though the figures reflect CPIH.

### 3 . Notable movements in prices

Table 2: CPIH annual and monthly inflation rates by division  
UK, June 2024, May 2025, and June 2025

	CPIH 12-month rate (%)		CPIH 1-month rate (%)	
	May 2025	June 2025	June 2024	June 2025
<b>CPIH All items</b>	4.0	4.1	0.2	0.3
<b>Food and non-alcoholic beverages</b>	4.4	4.5	0.2	0.3

**Figure 2: The large upward contribution to change in CPIH annual inflation from transport was partially offset by housing and household services**

Contributions to change in the CPIH annual inflation rate, UK, between May and June 2025

Figure 2: The large upward contribution to change in CPIH annual inflation from transport was partially offset by housing and household services

Contributions to change in the CPIH annual inflation rate, UK, between May and June 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 in our accompanying [Consumer price inflation dataset](#).

Figure 2 shows the contributions from the 12 divisions to the change in the annual Consumer Prices Index including owner occupiers' housing costs (CPIH) inflation rate between May and June 2025. These sum to the change in the annual rate between the latest two months, that is, the rise from 4.0% to 4.1%.

The slight increase in the rate into June 2025 reflected upward contributions from seven divisions, partially offset by downward contributions from three divisions. The largest upward contribution came from transport, particularly motor fuels. This was partially offset by a large downward contribution from housing and household services, particularly owner occupiers' housing costs.

# Transport

Prices in the transport division rose overall by 1.7% in the 12 months to June 2025, up from 0.7% in the 12 months to May (Figure 3). On a monthly basis, prices rose by 0.7% in June 2025, compared with a fall of 0.2% a year ago.

The rise in the annual rate reflected a large upward effect from motor fuels. The average price of petrol fell by 0.5 pence per litre between May and June 2025, compared with a larger fall of 3.0 pence per litre between May and June 2024. The average price stood at 131.9 pence per litre in June 2025, down from 145.8 pence per litre a year earlier.

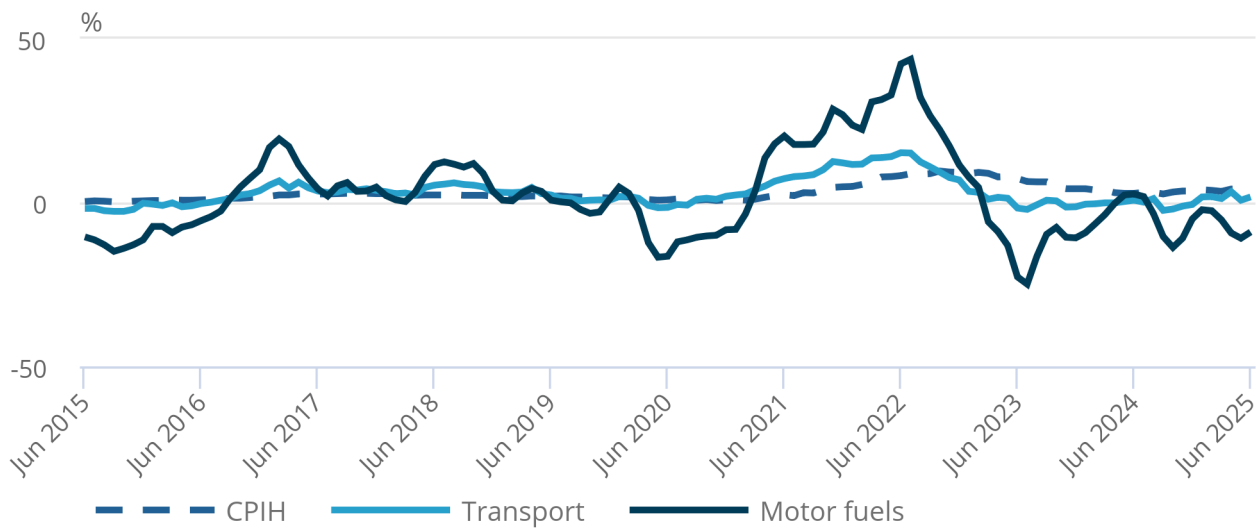

Similarly, diesel prices fell by 0.6 pence per litre in June 2025, compared with a fall of 4.8 pence per litre in June 2024. The average price stood at 138.5 pence per litre in June 2025, down from 151.5 pence per litre a year earlier. These movements resulted in overall motor fuel prices falling by 9.0% in the 12 months to June 2025, compared with a larger fall of 10.9% in the 12 months to May.

Figure 3: Rise in annual transport inflation driven mainly by motor fuels

CPIH, transport and motor fuels 12-month inflation rates, UK, June 2015 to June 2025

Figure 3: Rise in annual transport inflation driven mainly by motor fuels

CPIH, transport and motor fuels 12-month inflation rates, UK, June 2015 to June 2025

Source: Consumer price inflation from the Office for National Statistics

There were also upward effects from air fares, rail fares, and maintenance and repair of personal transport equipment.

Air fares rose by 7.9% between May and June 2025, compared with a rise of 3.2% between May and June 2024. Fares usually rise in June, but the increase this year was the largest June rise since 2018. This resulted in a 12-month rate of 0.5% in June 2025. The upward effect came from long-haul and European routes.

Rail fares rose between May and June 2025 but fell a year ago, particularly for international routes. Maintenance and repair prices rose this year by more than a year ago, with the upward effect coming from roadside recovery services.

## Clothing and footwear

Clothing and footwear prices rose by 0.5% in the 12 months to June 2025, compared with a fall of 0.3% in the 12 months to May. The 12-month rate has fluctuated between positive and negative during 2025 and has turned positive again following two consecutive negative readings.

On a monthly basis, prices fell by 0.4% between May and June 2025, compared with a larger fall of 1.2% a year ago. These price movements reflected changes in the proportion of discounted prices in the datasets. This proportion rose between May and June 2025, but by less than between May and June 2024.

The rise in the 12-month rate was the result of small upward effects across a wide range of clothing and footwear.

## Food and non-alcoholic beverages

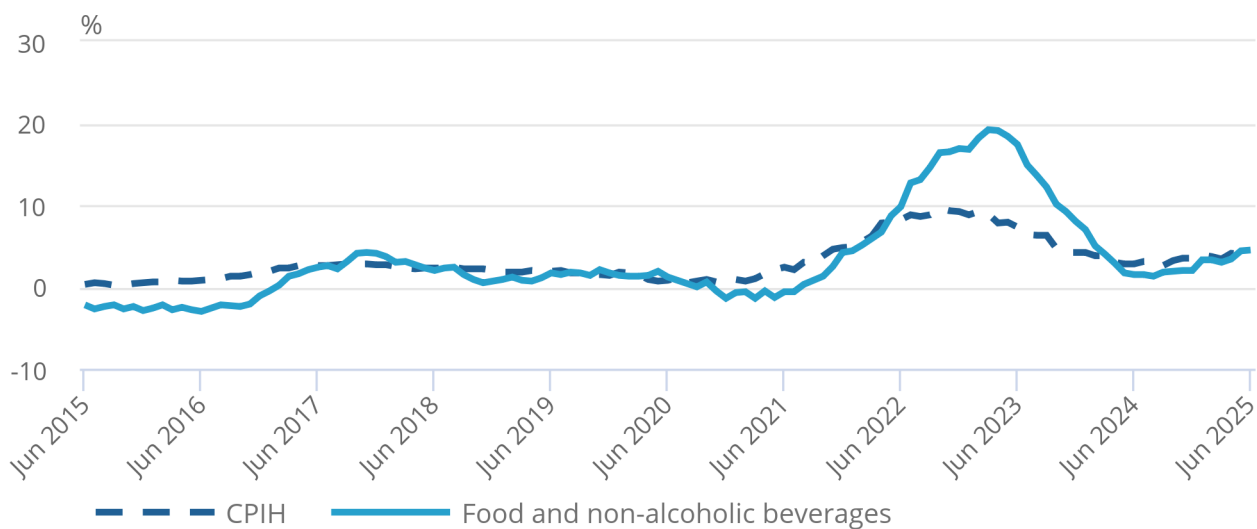

The 12-month inflation rate for food and non-alcoholic beverages was 4.5% in June 2025. This was the third consecutive increase in the rate. It is the highest recorded since February 2024, but is well below the peak seen in early 2023 (Figure 4). On a monthly basis, food and non-alcoholic beverages prices rose by 0.3% in June 2025, compared with a rise of 0.2% a year ago.

**Figure 4: Food and non-alcoholic beverages had its highest 12-month rate since February 2024**

CPIH, and food and non-alcoholic beverages 12-month inflation rates, UK, June 2015 to June 2025

Figure 4: Food and non-alcoholic beverages had its highest 12-month rate since February 2024

CPIH, and food and non-alcoholic beverages 12-month inflation rates, UK, June 2015 to June 2025

Source: Consumer price inflation from the Office for National Statistics

There were small upward effects to the change in the rate from 3 of the 11 food and non-alcoholic beverages classes, namely bread and cereals (particularly cakes), meat, and milk, cheese and eggs (mainly cheddar cheese). These were partially offset by small downward effects from the sugar, jam, syrups, chocolate and confectionery class (from chocolate products), and mineral waters, soft drinks and juices (from fruit juice).

## Housing and household services

The 12-month inflation rate for housing and household services was 6.7% in June 2025, down from 6.9% in May. On a monthly basis, prices rose by 0.2% in June 2025, compared with a rise of 0.4% a year ago.

The easing in the 12-month rate between May and June 2025 mainly reflected a downward effect from owner occupiers' housing (OOH) costs, which rose by 6.4% in the year to June 2025. This was down from 6.7% in the year to May 2025. The June figure was the lowest recorded since March 2024, when the rate was 6.3%.

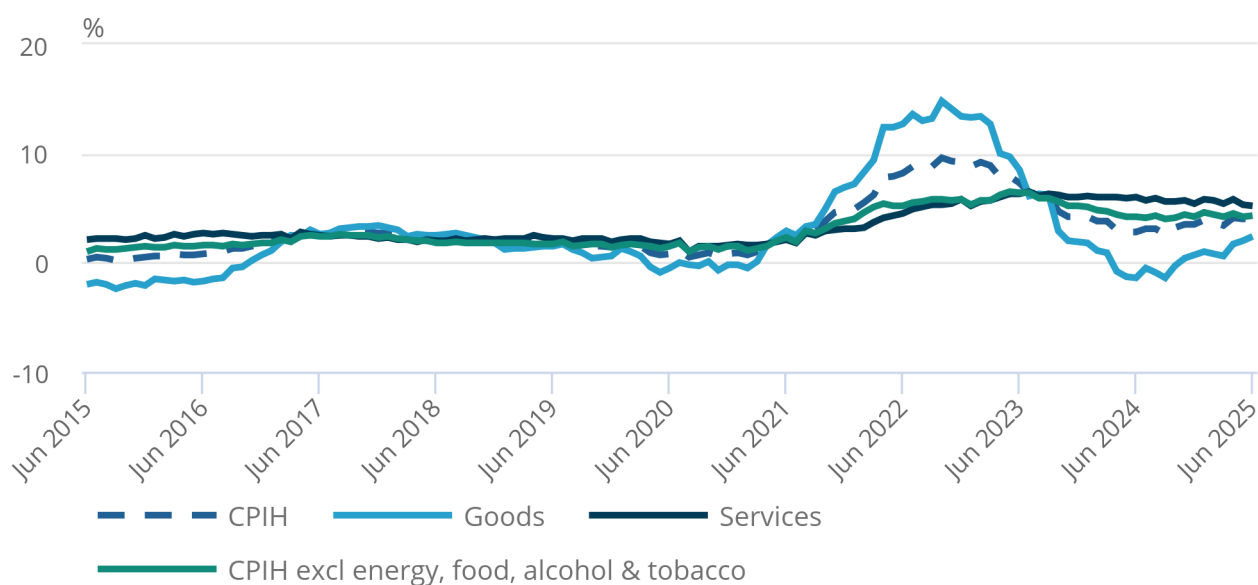

## 4 . Latest movements in CPIH inflation

**Figure 5: CPIH goods annual inflation rate is at its highest since October 2023 and services inflation is at its lowest since January 2023**

CPIH goods, services and core annual inflation rates, UK, June 2015 to June 2025

Figure 5: CPIH goods annual inflation rate is at its highest since October 2023 and services inflation is at its lowest since January 2023

CPIH goods, services and core annual inflation rates, UK, June 2015 to June 2025

**Source: Consumer price inflation from the Office for National Statistics**

Figure 5 shows the 12-month inflation rates for the Consumer Prices Index including owner occupiers' housing costs (CPIH) series for all goods and all services, together with CPIH excluding energy, food, alcohol and tobacco (often referred to as core CPIH). The CPIH inflation rate is added for comparison.

The CPIH all goods index rose by 2.4% in the 12 months to June 2025, up from 2.0% in the 12 months to May. This is the highest rate since October 2023, when it was 2.9%. The largest upward contributions to the change in the annual rate came from energy (mainly motor fuels) and non-energy industrial goods (particularly clothing and footwear goods, and recreational goods).

The CPIH all services index rose by 5.2% in the 12 months to June 2025, down from 5.3% in the 12 months to May. This is the lowest rate seen since January 2023. The largest downward contribution to the change in the annual rate came from housing services, particularly owner occupiers' housing costs. This was partially offset by an upward contribution from travel and transport services.

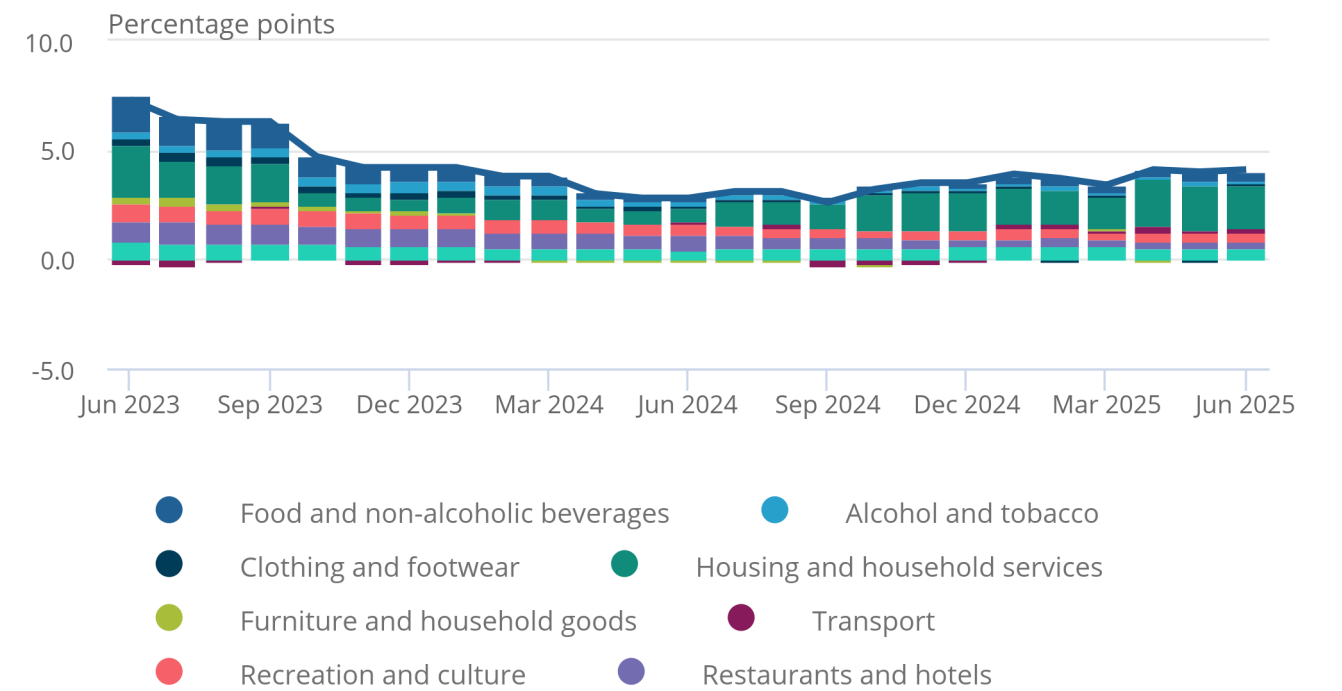

The core CPIH annual inflation rate was 4.3% in June 2025, up from 4.2% in May.

Figure 6: Housing and household services led the positive contributions to the CPIH annual inflation rate

Contributions to the CPIH annual inflation rate, UK, June 2023 to June 2025

Figure 6: Housing and household services led the positive contributions to the CPIH annual inflation rate

Contributions to the CPIH annual inflation rate, UK, June 2023 to June 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding
2. More information on the contents of each division can be found in Table 3 in our accompanying [Consumer price inflation dataset](#).

Figure 6 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPIH inflation rate over the latest two years. The contribution of each category to the annual rate depends on the price movement in that category and its weight, which is updated annually.

The contributions from all divisions to the annual CPIH inflation rate were positive in June 2025. The largest positive contribution came from housing and household services. This contributed 1.97 percentage points, down from 2.04 percentage points in May.

The contribution from food and non-alcoholic beverages rose from 0.40 to 0.41 percentage points between May and June 2025. This was the largest contribution from this division since February 2024. The 0.05 percentage point contribution from furniture and household goods was the largest upward contribution since December 2023, when it was 0.14 percentage points.

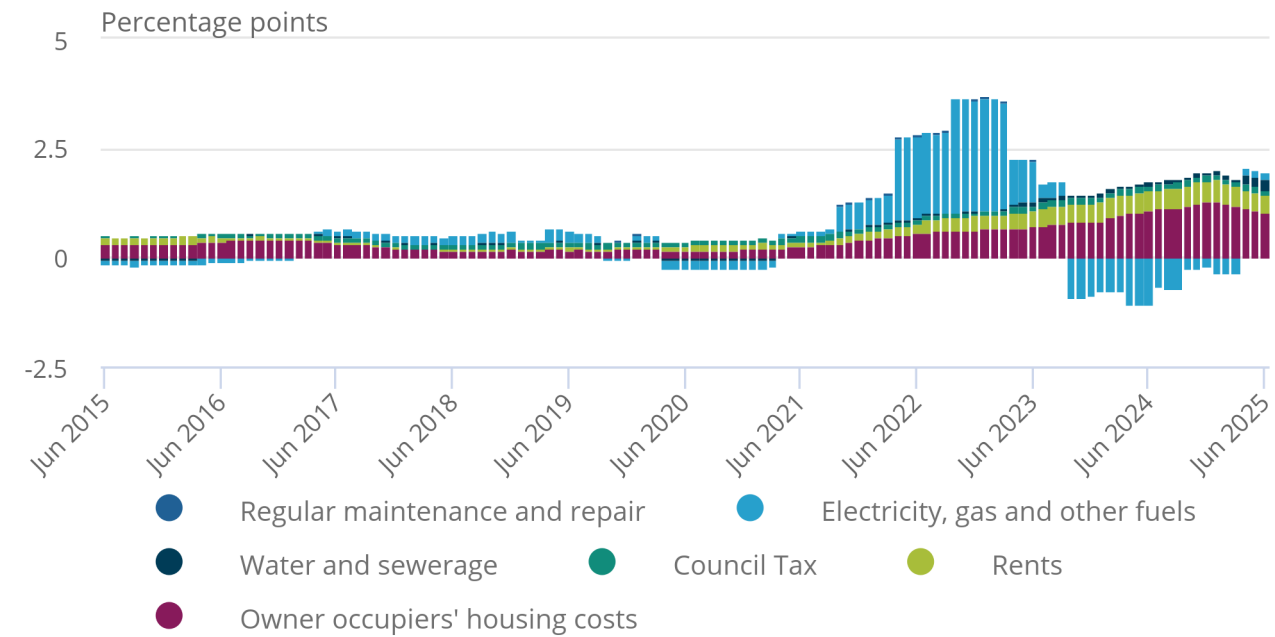

The contribution of 0.29 percentage points from restaurants and hotels was the smallest since July 2021, when it was 0.10 percentage points.

**Figure 7: Contribution from owner occupiers' housing costs eased for a fifth consecutive month after a high in January 2025**

Contributions of housing components to the CPIH annual inflation rate, UK, June 2015 to June 2025

Figure 7: Contribution from owner occupiers' housing costs eased for a fifth consecutive month after a high in January 2025

Contributions of housing components to the CPIH annual inflation rate, UK, June 2015 to June 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.

Figure 7 shows the contributions from owner occupiers' housing (OOH) costs and Council Tax to the annual CPIH inflation rate in the context of wider housing-related costs. The Consumer Prices Index (CPI) differs from the CPIH because it does not include these two components.

The annual contribution from OOH costs continued to slow, to 1.06 percentage points in June 2025. This follows a recent high of 1.31 percentage points in January 2025.

There was a small reduction in the contribution from actual rentals for housing, while other components' contributions changed little in June.

## 5 . Latest movements in CPI inflation

While the Consumer Prices Index including owner occupiers' housing costs (CPIH) is our lead and most comprehensive measure of consumer price inflation, the Consumer Prices Index (CPI) is based on a harmonised methodology developed by Eurostat. This enables international comparisons to be drawn. More information on the use cases for our consumer price inflation statistics can be found in our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

Figure 8 shows annual CPI inflation for the UK, compared with the EU average and selected G7 countries. While the UK CPI is produced on a comparable basis with EU countries, the US Harmonised Index of Consumer Prices (HICP) differs in some respects (see Note 1 to Figure 8).

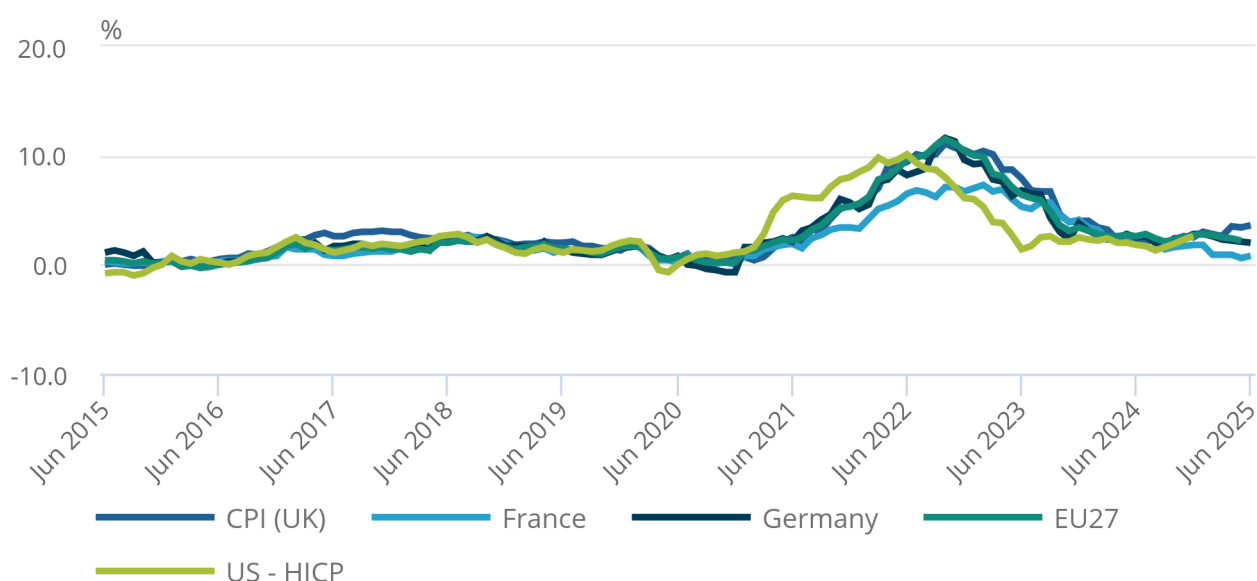

The UK CPI inflation rate of 3.6% was above the first (or "flash") estimate of inflation for France (0.8%) and Germany (2.0%) in June 2025.

### Figure 8: UK inflation continues above that of France and Germany

CPI compared with selected G7 and EU annual inflation rates, June 2015 to June 2025

#### Figure 8: UK inflation continues above that of France and Germany

CPI compared with selected G7 and EU annual inflation rates, June 2015 to June 2025

Source: Consumer price inflation from the Office for National Statistics, Eurostat, and the US Bureau of Labor Statistics

#### Notes:

1. There are some differences in the definition of the US HICP that may limit comparison; more information is available on the [US Bureau of Labor Statistics R-HICP homepage](#). The latest available figure is for December 2024.
2. June 2025 data for France and Germany are flash estimates and are not final; the final HICP dataset, including the EU27 aggregate, for June 2025 is published on Thursday, 17 July 2025. The latest Euro area inflation estimates can be found on the [Eurostat website](#).
3. The international data in this figure are sometimes revised.

Table 3: CPI annual and monthly inflation rates by division  
UK, June 2024, May 2025, and June 2025

	<b>CPI 12-month rate (%)</b>		<b>CPI 1-month rate (%)</b>

<b>CPI exc food, energy, alcohol and tobacco (core CPI)</b>	3.5	3.7	0.2	0.4

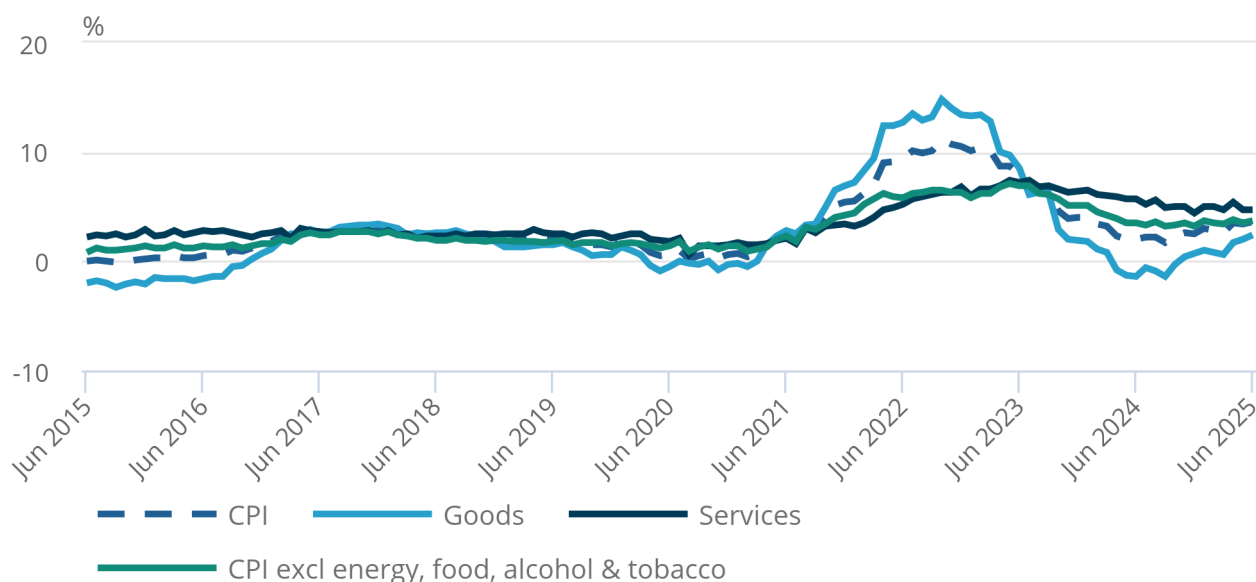

Source: Consumer price inflation from the Office for National Statistics

**Figure 9: CPI goods annual inflation rate at its highest since October 2023**

CPI goods, services and core annual inflation rates, UK, June 2015 to June 2025

## Figure 9: CPI goods annual inflation rate at its highest since October 2023

CPI goods, services and core annual inflation rates, UK, June 2015 to June 2025

**Source: Consumer price inflation from the Office for National Statistics**

Figure 9 shows the 12-month inflation rates for the CPI all goods and all services series, together with CPI excluding energy, food, alcohol and tobacco (often referred to as core CPI). The headline CPI inflation rate is added for comparison.

The CPI all goods index rose by 2.4% in the 12 months to June 2025, up from 2.0% in the 12 months to May. This is the highest rate since October 2023, when it was 2.9%.

The CPI all services index rose by 4.7% in the 12 months to June 2025, unchanged from May.

Core CPI rose by 3.7% in the 12 months to June 2025, up from 3.5% in the 12 months to May.

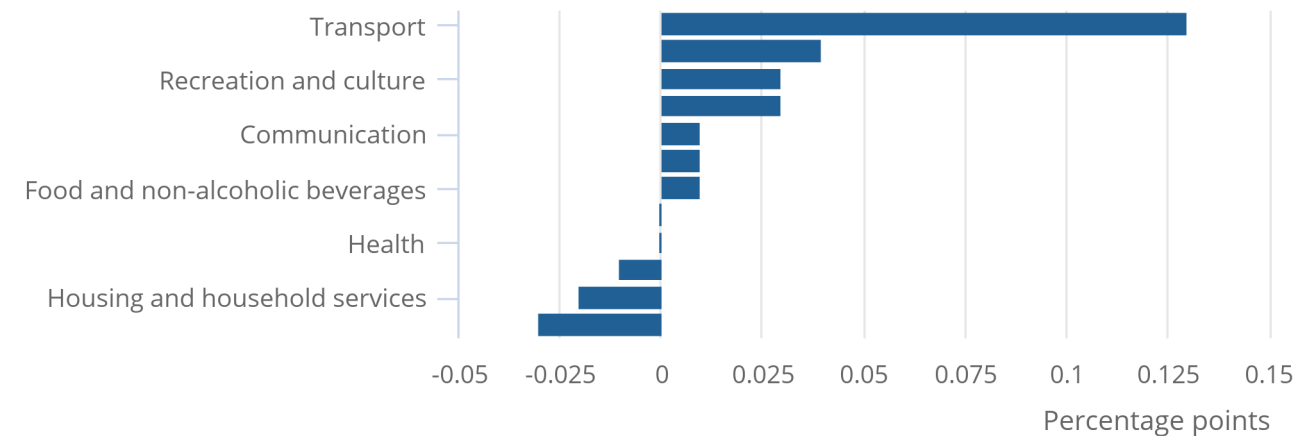

As with the all-items annual inflation rates, the drivers of CPIH and CPI goods and services inflation are the same (except for owner occupiers' housing (OOH) costs and Council Tax, which are excluded from CPI). The drivers are discussed in more detail in [Section 4: Latest movements in CPIH inflation](#).

**Figure 10: Transport led the upward contributions to change in CPI annual inflation**

Contributions to change in the CPI annual inflation rate, UK, between May and June 2025

Figure 10: Transport led the upward contributions to change in CPI annual inflation

Contributions to change in the CPI annual inflation rate, UK, between May and June 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 in our accompanying [Consumer price inflation dataset](#).

Figure 10 shows how each of the main groups of goods and services contributed to the change in the annual CPI inflation rate between May and June 2025.

The increase in the rate into June 2025 reflected upward contributions from seven divisions, partially offset by downward contributions from three divisions. The largest upward contribution came from transport. There were no large, offsetting downward contributions.

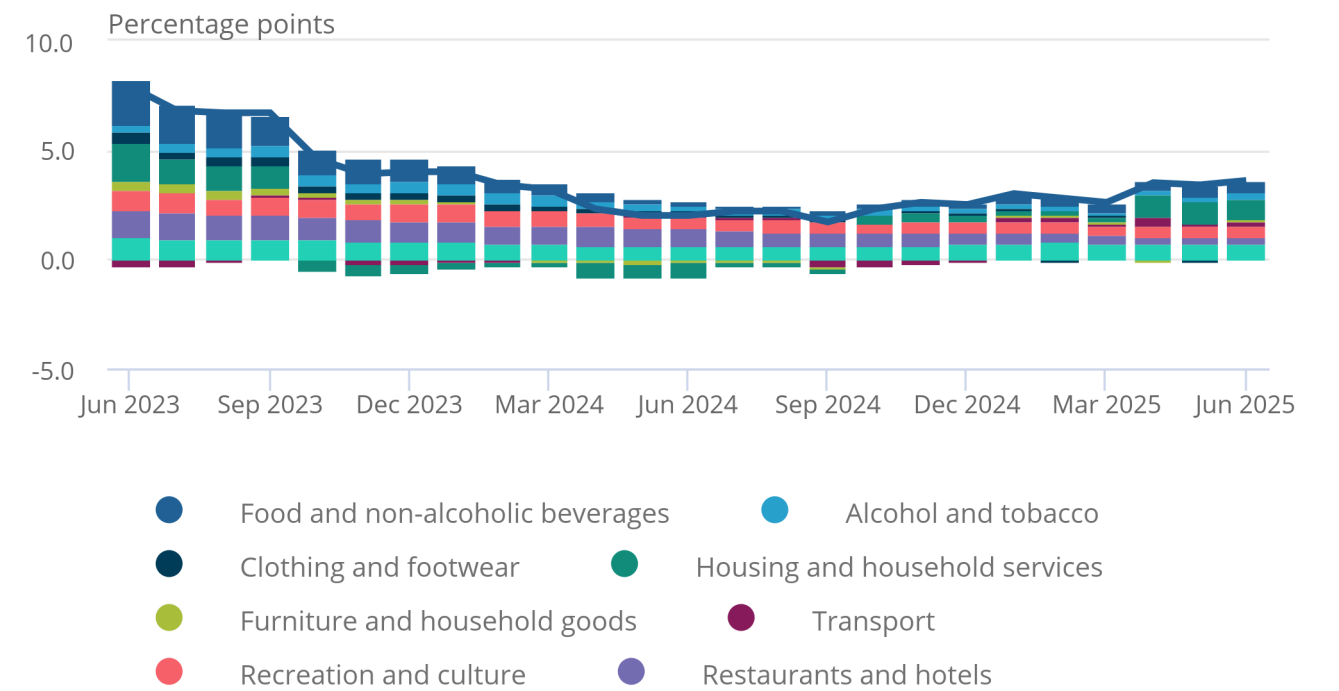

Though the sizes of the contributions differ from CPIH, the main drivers to the change are the same where they are common to both measures.

Figure 11: Housing and household services led the positive contributions to the CPI annual inflation rate

Contributions to the CPI annual inflation rate, UK, June 2023 to June 2025

Figure 11: Housing and household services led the positive contributions to the CPI annual inflation rate

Contributions to the CPI annual inflation rate, UK, June 2023 to June 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 in our accompanying [Consumer price inflation dataset](#).

Figure 11 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPI inflation rate over the last two years.

The CPIH includes extra housing components not included in the CPI. This can sometimes result in the largest contributions to the annual CPI and CPIH inflation rates coming from different divisions. However, in June 2025, the housing and household services division made the largest contribution to both measures, with a 0.95 percentage point contribution to the CPI rate and 1.97 percentage points to the CPIH rate. OOH costs made a large upward contribution to housing and household services in the CPIH, but are excluded from the CPI.

## 6 . Data on consumer price inflation

### [Consumer price inflation tables](#)

Dataset | Released 16 July 2025

Measures of monthly UK inflation data including the Consumer Prices Index including owner occupiers' housing costs (CPIH), Consumer Prices Index (CPI) and Retail Prices Index (RPI). These tables complement the consumer price inflation time series dataset. Please note that from publication on 26 March 2025, we have published fewer tables to avoid duplication and to remove discontinued series. Tables 39 and 40 detail which tables are no longer published and provide alternative sources for where the content in those tables can be found, if available.

### [Consumer price inflation time series](#)

Dataset MM23 | Released 16 July 2025

Comprehensive database of time series covering measures of inflation data for the UK including the CPIH, CPI and RPI.

### [Consumer price inflation detailed briefing note](#)

Dataset | Released 16 July 2025

The consumer price inflation detailed briefing note contains details of the items contributing to the changes in the CPIH, details of any notable movements, a summary of the reconciliation of CPIH and RPI, and the outlook, which looks ahead to next month's release.

### [Consumer price inflation consumption segment indices and price quotes](#)

Dataset | Released 16 July 2025

Price quote data (for locally collected data only) and consumption segment indices (that underpin consumer price inflation statistics) are published, giving users access to the detailed data that are used in the construction of the UK's inflation figures. This dataset was previously called the Consumer price inflation item indices and price quotes dataset.

### [Contributions to the 12-month rate of CPI\(H\) by import intensity](#)

Dataset | Released 16 July 2025

A time series of the contributions to the CPIH and CPI annual rates broken down by the import intensity of household purchases.

### [Consumer price inflation, historical data, UK, 1950 to 1988](#)

Dataset | Released 18 May 2022

Data tables of historical estimates modelled for the CPIH and CPI over the period 1950 to 1988. Data in these tables are not accredited official statistics and are provided for indicative purposes only.

## 7 . Glossary

### Annual inflation rate

The most common approach to measuring inflation is the 12-month or annual inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the annual rate is determined by the balance between upward and downward price movements across the range of goods and services included in the index.

### Consumer price inflation

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. For an overview of the range of indices available and their uses, please see our [Consumer price indices, a brief guide: 2017](#) and our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

## CPIH

The Consumer Prices Index including owner occupiers' housing costs (CPIH) is the most comprehensive measure of inflation. It extends the Consumer Prices Index (CPI) to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing (OOH) costs, along with Council Tax. Both are significant expenses for many households and are not included in the CPI.

## CPI

The CPI is a measure of consumer price inflation produced to international standards, and is based on European regulations for the [Harmonised Index of Consumer Prices](#). The CPI is the inflation measure used in the government's target for inflation.

The CPI is produced at the same level of detail as the CPIH in our [accompanying dataset](#) and [accompanying data time series](#).

## Owner occupiers' housing costs

OOH costs are the costs of housing services associated with owning, maintaining and living in one's own home.

## RPI

The Retail Prices Index (RPI) does not meet the required standard for designation as an [accredited official statistic](#). In recognition that it continues to be widely used in contracts, we continue to publish the RPI, its subcomponents, and RPI excluding mortgage interest payments (RPIX). To view the all-items RPI, please see the [data time series section of the Inflation and price indices area of our website](#). The annual RPI inflation rate was 4.4% in June 2025.

The UK Statistics Authority (The Authority) and HM Treasury launched a consultation in 2020 on The Authority's proposal to address the shortcomings of the RPI. From 2030 (at the earliest), as outlined in [The Authority's response to the consultation](#), the CPIH methods and data sources will be introduced into the RPI. Additionally, the supplementary and lower-level indices of the RPI will be discontinued.

# 8 . Data sources and quality

## Alternative data sources

We are undertaking a programme of transformation across our consumer price statistics, including identifying new sources, improving methods and developing systems. Our [Transformation of consumer price statistics: August 2024 article](#), published on 6 August 2024, contains more information about the project and our ongoing transformation plans. We also published our [Consumer prices development plan: updated August 2024](#) to outline the rationale for our priorities and their potential impact.

The next planned improvement is the introduction of grocery scanner data into our consumer price statistics from February 2026, with the first publication scheduled for March 2026. We outlined this change in our series of research articles, published on 29 April 2025, including our [Research and developments in the transformation of UK consumer price statistics: April 2025 article](#).

As usual, we welcome your feedback on our work. To contact us, please email [cpi@ons.gov.uk](mailto:cpi@ons.gov.uk).

## Moving from sample items to broader consumption segments

The "All items" Consumer Prices Index (CPI) and Consumer Prices Index including owner occupiers' housing costs (CPIH) series incorporate price information from a wide range of goods and services. From March 2025, the process for aggregating this detailed information has changed, as a necessary step towards incorporating larger and more granular datasets into the consumer price indices.

Goods and services are allocated into "consumption segments" for different categories of expenditure. In some cases, we have currently defined these consumption segments to correspond to one "item" for which we track prices over time. However, in cases where more comprehensive source data are available, or are expected to be available in the future, a consumption segment typically includes much more than just one item. For simplicity, we continue to refer to "items" in the statistical bulletin and detailed briefing note. More detailed methodological information on the new aggregation process and consumption segments is available in [Introducing alternative data into consumer price statistics: aggregation and weights article](#).

Please note that the move from sample items to broader consumption segments means there is an impact on the individual price quotes and lower-level indices published from March 2025 in our [Consumer price inflation consumption segment indices and price quotes dataset](#). These outputs have been updated and presented in an improved format to help users transition to the use of consumption segments and other methodological changes.

We have published an [updated glossary \(XLSX, 25KB\)](#), which sets out the changes made from March 2025.

## Households and the cost of living

To assist individuals in understanding how the rise in inflation affects their expenditure, we have produced a [personal inflation calculator](#). The calculator allows users to enter the amount they spend across either a reduced or a wide range of categories, to produce an estimate of their personal inflation based on those spending patterns.

Our [Shopping prices comparison tool](#) shows how the average prices of items have changed over time. Please note that the newly introduced consumption segments for food, drinks and tobacco will not have data before 2025 in the tool. However, the historical average prices for food, drinks and tobacco items, that were on the tool before the update in 2025, can be found in our [Shopping prices comparison tool data download before the 2025 update](#).

Please also note that Table 55 in our [Consumer price inflation tables dataset](#), which provided time series of prices for petrol and diesel, has not been published from 26 March and the two series have been discontinued. Historical average prices are still available from the time series explorer function on our website using the four-character identifiers CZMK for petrol and CZML for diesel.

On 29 May 2025, we published our quarterly [Household Costs Indices \(HCIs\) for UK household groups bulletin](#). The HCIs reflect how different types of households experience changing prices, and differ from CPIH and CPI. The CPIH and CPI are based on recognised economic principles, and provide an aggregate measure of inflation for household spending in the UK.

The HCIs are [official statistics in development](#) and this release included new estimates for January to March 2025. The data in this release have been updated using 2024 weights leading to some minor revisions in previously published comparisons. It was not possible for this latest release to update the weights for 2025 in line with the standard methodology for consumer prices. This is because of delays in processing the underlying survey data and the need for further ongoing quality assurance. Instead, the most recent estimates have been compiled using the weights for February to December 2024. We aim to update the weights in due course.

## Passenger transport by air

We previously published a monthly index for passenger transport by air. We are also publishing [domestic, European and long-haul airfares consumer prices sub-indices and weights](#) on an annual basis from 26 March 2025. These are being released in [the user requested data section of our website](#).

## Classification of Individual Consumption According to Purpose (COICOP)

The Classification of Individual Consumption According to Purpose (COICOP) is the classification that underpins some of the main statistics that we produce. The [classification has seen a substantial update \(PDF, 2.51MB\)](#) in recent years, to reflect changes in household expenditure patterns since its inception in the late 1990s. The UK currently uses the version of COICOP introduced in 1999.

We will ensure that the new classification is implemented in a comprehensive and reliable manner that considers other Office for National Statistics (ONS) priorities around the transformation of our main statistics. To meet this objective, we will aim to introduce the new classification (COICOP 2018) as soon as possible, as part of our wider plans to implement the updated System of National Accounts (SNA25). However, this is likely to be later than the date for implementation in some other countries. We will share our implementation plan as soon as we can.

For further information, please email [cpi@ons.gov.uk](mailto:cpi@ons.gov.uk).

## Weights for 2025 consumer price inflation statistics

In line with usual practice at the start of each year, the expenditure weights used in compiling the CPIH and CPI were calculated using updated spending information. The first update of weights was implemented with the January indices. The second update was introduced, along with the usual basket update, with the February indices released in March. We published our [Consumer price inflation, updating weights: 2025 article](#) and our [Consumer price inflation basket of goods and services: 2025 article](#) on 18 March 2025.

The 2025 weights for CPIH and CPI were calculated using national accounts household final consumption expenditure (HHFCE) data for 2023. This is in line with our standard methodology of using data lagged by two years. It differs from the approach used in 2021, 2022 and 2023, when there were large changes seen in spending patterns because of the coronavirus (COVID-19) pandemic. Over those years, we adjusted the spending data so that, for example, the resulting weights for 2023 were more reflective of spending in 2022. More information is available in our [Consumer price inflation, updating weights articles](#).

The weights for the RPI were also updated for 2025 in line with the practice followed both before and during the pandemic period. This was with no additional adjustment to the spending data because of any coronavirus effects.

In line with the improvements introduced last year, we now use unrounded weights in compiling CPIH and CPI. The weights before 2024 for the CPI and CPIH were rounded to integers as parts per thousand of the all-items indices at the class level (4-digit COICOP). The RPI continues to be based on integer weights.

## Consumer price inflation historical estimates, UK, 1950 to 1988

On 18 May 2022, we published our [Consumer price inflation, historical estimates, UK, 1950 to 1988 – methodology](#) and our [Consumer price inflation, historical estimates and recent trends, UK: 1950 to 2022 article](#). These include new estimates of CPIH and improved estimates of CPI for 1950 to 1988. These estimates (published in response to user need for a longer series) are indicative and are for analytical purposes only. They are not intended for official use and do not constitute part of the [accredited official statistics](#) series.

Previously, in December 2018, we published our [Consumer Prices Index including owner occupiers' housing costs \(CPIH\) historical series: 1988 to 2004 article](#). This series is also not an accredited official statistic, reflecting the historical uncertainty around the backcasts.

## Methodology information

The consumer price indices are normally based on prices collected from outlets around the country, supplemented by information collected centrally over the internet and by phone. The figures in this publication use data collected on or around 10 June 2025.

An overview of consumer price statistics is given in our [Consumer price indices, a brief guide: 2017](#). The concepts and methodologies underpinning the indices in more detail are covered in our [Consumer Prices Indices Technical Manual, 2019](#).

A comprehensive source of information on the CPIH, focusing on the approach to measuring owner occupiers' housing costs, is provided in our [CPIH Compendium](#).

Information on the users and uses of these statistics, and the characteristics of the different measures of inflation related to potential use, is included in our [Users and uses of consumer price inflation statistics: July 2018 update methodology](#).

## Strengths and limitations

We illustrated our approach to [Measuring changing prices and costs for consumers and households](#) most recently in December 2023 using three "use cases", and described how they relate to the measures published and under development.

The three cases refer firstly to the CPIH as our lead measure of inflation based on economic principles. They also refer to the HCIs as a set of measures that reflect the change in costs and prices experienced by different households, and the RPI as a legacy measure that is required to meet existing user needs. The issues with the RPI are described in our [Shortcomings of the RPI as a measure of inflation article](#).

## Accredited official statistics

These accredited official statistics were independently reviewed by the Office for Statistics Regulation in July 2017. They comply with the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact [cpi@ons.gsi.gov.uk](mailto:cpi@ons.gsi.gov.uk).

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

3 The series CPIY, CPI-CT and CPIHY were discontinued in January 2022, with the final estimates referring to price change in the period December 2021.

<sup>1</sup> As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected please consult

the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

<sup>1</sup> As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal'

collection). To identify which series are affected, please consult the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact [cpi@ons.gsi.gov.uk](mailto:cpi@ons.gsi.gov.uk).

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

<sup>1</sup> From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact [cpi@ons.gov.uk](mailto:cpi@ons.gov.uk).

<sup>2</sup> More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

<sup>1</sup> For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

<sup>2</sup> The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001.

<sup>3</sup> Energy includes electricity, gas and other fuels, and fuels and lubricants.

**Key:** - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 Aggregate for European Union with 27 Member States.

Following user requests, on 10 April 2018 Eurostat began to publish in its database an aggregate for the EU with 27 Member States for around 50 most in-demand indicators, such as population, GDP growth rate and unemployment.

3 Data for the former EU28 aggregate.

For reference periods February 2020 or later, Eurostat no longer calculates or publishes the former EU 28 aggregate. This means that the final time periods for which the EU28 aggregate is published are January 2020, fourth quarter 2019 or the year 2019 depending on the frequency of the dataset. Eurostat will maintain historic data for EU28 in the database and will update as revisions are received.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.

5 Following the end of the transition period, we have ceased to publish the Harmonised Index of Consumer Prices (HICP) international comparisons for EU countries in this table. The international comparisons will continue to be available on the Eurostat website. <https://ec.europa.eu/eurostat/web/main/data/database>

Key: - zero or negligible

1 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk>.

3 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of price quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected, please the latest Consumer price inflation tables which can be found here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

4 Index date for May: 10 June 2025

**Key:** - zero or negligible

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

7 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at: <http://www.statisticsauthority.gov.uk/>.
