2. Main points

Latest data

Estimates for payrolled employees in the UK fell by 93,000 (0.3%) between August 2024 and August 2025 but increased by 10,000 (0.0%) between July 2025 and August 2025.

When looking at June to August 2025, the period comparable with our Labour Force Survey (LFS) estimates, payrolled employees fell by 115,000 (0.4%) over the year, and by 31,000 (0.1%) over the quarter.

The early estimate of payrolled employees for September 2025 decreased by 100,000 (0.3%) on the year, and by 10,000 (0.0%) on the month, to 30.3 million. The September 2025 estimate should be treated as a provisional estimate and is likely to be revised when more data are received next month.

Estimates from January to March 2025 include the full effect of the improvements in LFS data collection and sampling methods introduced from January 2024. However, we are continuing our efforts to further improve the response to the survey. Consequently, estimates may be subject to the effect of these further improvements, which may have an ongoing impact on the survey. An increased volatility will remain in the LFS estimates for mid-2023 and throughout 2024, so we would advise additional caution when interpreting survey change measures. We recommend using LFS estimates as part of our suite of labour market indicators, alongside workforce jobs, Claimant Count and Pay As You Earn (PAYE) Real Time Information (RTI) estimates.

The UK employment rate for people aged 16 to 64 years was estimated at 75.1% in June to August 2025. This is down in the latest quarter but above estimates of a year ago.

The UK unemployment rate for people aged 16 years and over was estimated at 4.8% in June to August 2025. This is up in the latest quarter and above estimates of a year ago.

The UK economic inactivity rate for people aged 16 to 64 years was estimated at 21.0% in June to August 2025. This is largely unchanged in the latest quarter but below estimates of a year ago.

The UK Claimant Count for September 2025 increased on the month but decreased on the year to 1.692 million.

The estimated number of vacancies in the UK fell by 9,000 (1.3%) on the quarter, to 717,000, in July to September 2025. This is the 39th consecutive period where vacancy numbers have dropped compared with the previous three months, with vacancies decreasing in 9 of the 18 industry sectors.

Annual growth in employees' average earnings in Great Britain for regular earnings (excluding bonuses) was 4.7%, and for total earnings (including bonuses) was 5.0% in June to August 2025. Annual average regular earnings growth was 4.4% for the private sector and 6.0% for the public sector. However, the public sector annual growth rate is affected by some public sector pay rises being paid earlier in 2025 than in 2024. RTI pay data are also published and provide a provisional, timelier estimate of median pay. The two data sources generally trend well for mean total pay.

Annual growth in real terms, adjusted for inflation using the Consumer Prices Index including owner occupiers' housing costs (CPIH), was 0.6% for regular pay and 0.8% for total pay, in June to August 2025.

Annual growth in real terms, adjusted for inflation using the Consumer Prices Index excluding owner occupiers' housing costs (CPI), was 0.9% for regular pay and 1.2% for total pay, in June to August 2025.

There were an estimated 15,000 working days lost because of labour disputes across the UK in August 2025.

This bulletin includes data from business and social surveys, as well as data from administrative sources. It includes a combination of <u>accredited official statistics</u> and <u>official statistics in development</u>, and therefore, we advise the consideration of this when using. Read more in <u>Section 7: Data sources and quality</u>

3. Trends and considerations around comparisons

In this section, we supply additional commentary to help users assess the different sources of data we publish on employment and related indicators.

The Labour Force Survey (LFS) is our survey of households, while workforce jobs (WFJ) is based mainly on business surveys for employee jobs, andthe LFS covers self-employed jobs. HM Revenue and Customs Pay As You Earn (PAYE) Real Time Indicators (RTI) data are derived from administrative tax records, and only cover payrolled employees.

Each of these three sources are collected and processed in different ways, so we do expect differences in levels (for example, jobs versus people, differing reference periods). It is not unusual to see divergence in our indicators for more than one period.

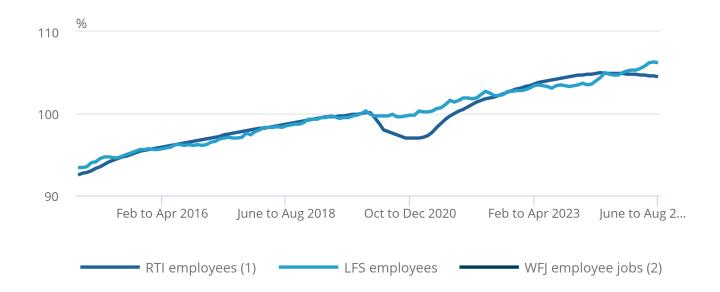

Our view continues to be that RTI gives a more reliable read on employees and is showing a fall in 9 of the last 12 months.

Figure 1: The number of payrolled employees has been generally falling over the last year

Indices (November 2019 to January 2020 = 100), employment indicators, seasonally adjusted, UK, June to August 2014 to June to August 2025

Figure 1: The number of payrolled employees has been generally falling over the last year

Indices (November 2019 to January 2020 = 100), employment indicators, seasonally adjusted, UK, June to August 2014 to June to August 2025

Source: Labour Force Survey (LFS) and workforce jobs (WFJ) from the Office for National Statistics, and Pay As You Earn Real Time Information (RTI) from HM Revenue and Customs (HMRC)

Notes:

- 1. Three-month averages of RTI payrolled employees have been used here for comparability.
- 2. Workforce jobs are published for the months of March, June, September and December. For presentational purposes, they have been plotted against the middle month of the time period shown. For example, March is plotted against February to April.

Figure 1 shows the three indicators over a longer time series, including the coronavirus (COVID-19) pandemic period. RTI and WFJ employee jobs tend to follow similar trends, although they diverged in some recent periods, a pattern that has also occurred previously.

The volatility in the LFS series since the pandemic period is also shown. RTI data generally show a decline in employees over the last 12 months but a recent levelling off, while the LFS shows increases. Caution is still advised when comparing the current LFS results with previous periods.

Over the last year, level estimates of the number of employees from the LFS have converged with those from the RTI. This is likely at least in part because of the improvements we made to the LFS since January 2024.

However, the steady improvement in the quality of levels estimates means that our measures of change have seen lower coherence with RTI, as change estimates include both "real" change in the labour market and change caused by improvements to the operation of the LFS.

Despite these coherence challenges, the LFS continues to be the sole source of data for unemployment, economic inactivity, and self-employment. The survey provides a range of breakdowns that are only possible from LFS data.

We are continuing to improve the quality of the LFS, building on our work to date. The achieved sample, including imputed cases (the dataset size), has increased from 69,847 individuals in January to March 2025, to 74,186 individuals in April to June 2025, as shown in our LFS performance and quality monitoring report: April to June 2025.

Alongside the labour market publication in September 2025, we published an article on <u>Labour Market quality</u>. The article provides information about current response rates, trends, and known biases in LFS data and provides users with information to better understand the current quality of the data.

6. Glossary

Average weekly earnings

Average weekly earnings (AWE) are calculated using information based on the Monthly Wages and Salaries Survey (MWSS).

AWE measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises, because they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force who are not in employment but do not meet the internationally accepted definition of unemployment. This is because they have not been seeking work within the last four weeks or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force. The Labour Force Survey (LFS) estimates are official statistics in development.

Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. The LFS estimates are official statistics in development.

Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks, and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (people in work and those seeking and available to work) who are unemployed. The LFS estimates are official statistics in development.

Claimant Count

The Claimant Count is an official statistic in development that measures the number of people who are receiving a benefit principally for the reason of being unemployed. Currently, the Claimant Count consists of those receiving Jobseeker's Allowance, and Universal Credit claimants in the "searching for work" conditionality group.

Vacancies

Vacancies are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

Pay As You Earn Real Time Information

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population, rather than a sample of people or companies, and they will allow for more detailed estimates of the population.

In July 2025, the Office for Statistics Regulation (OSR) published a letter <u>confirming the accreditation</u> of HMRC and the Office for National Statistics (ONS) statistics on earnings and employment from PAYE RTI.

A more detailed glossary is available in our <u>Guide to labour market statistics methodology</u>.

7. Data sources and quality

The estimates presented in this bulletin contain uncertainty. For more information, see our <u>Uncertainty and how we measure it methodology</u>.

Information on revisions is available in our Labour market statistics revisions policy.

Information on the strengths and limitations of this bulletin is available in Section 13 of our <u>Labour market overview</u>, <u>UK: April 2021 bulletin</u>.

Further information is available in our <u>Guide to labour market statistics methodology</u>.

Accredited official statistics

On 7 June 2024, the Office for Statistics Regulation (OSR) introduced the new accredited official statistics badge, to denote official statistics that have been independently reviewed by the OSR. Accredited official statistics comply with the standards of trustworthiness, quality and value in the <u>Code of Practice for Statistics</u>.

This UK labour market bulletin includes a combination of <u>accredited official statistics</u> and <u>official statistics in development</u> (until September 2023, these were called "experimental statistics"). Read more about the change in our <u>Guide to official statistics in development</u>.

The following labour market outputs are accredited official statistics:

- Earnings and employment from Pay As You Earn (PAYE) Real Time Information (RTI) (accredited by the OSR in <u>July 2025</u>)
- Labour disputes (rapid review completed by the OSR in February 2023)
- Vacancy statistics (reviewed by the OSR in April 2022)
- Workforce jobs (WFJ) (reviewed by the OSR in April 2022)

The following labour market outputs are official statistics in development:

• Labour Force Survey (LFS) estimates from the Office for National Statistics (ONS) Claimant Count

Labour Force Survey

We have been facing the challenge of falling response rates for household surveys, as have other comparable countries. This issue became more acute in the Labour Force Survey (LFS) data collected for August 2023. The LFS estimates due to be published in October 2023 were suspended because of quality concerns. We developed a comprehensive plan to address these concerns and reintroduce LFS, as described in our <u>Labour Force Survey: planned improvements and its reintroduction methodology</u>. We reinstated reweighted LFS estimates into our monthly publication from February 2024, as described in our <u>Impact of reweighting on LFS key indicators: 2024 article</u>. In December 2024, we carried out a <u>further LFS reweighting exercise</u>, based on 2022 mid-year estimates.

Estimates from January to March 2025 include the full effect of the improvements in LFS data collection and sampling methods introduced from January 2024. However, we are continuing our efforts to further improve the response to the survey. Consequently, estimates may be subject to the effect of these further improvements, which may have an ongoing impact on the survey. An increased volatility will remain in the LFS estimates for mid- 2023 and throughout 2024, so we would advise additional caution when interpreting survey change measures. We recommend using LFS estimates as part of our suite of labour market indicators, alongside workforce jobs, Claimant Count and Pay As You Earn Real Time Information (PAYE RTI) estimates.

We are continuing to improve the quality of the LFS, building on our work to date. The achieved sample, including imputed cases (the dataset size), has increased from 69,847 individuals in January to March 2025, to 74,186 individuals in April to June 2025, as shown in our LFS performance and quality monitoring report: April to June 2025

More information on LFS quality can also be found in our LFS quality article.

Coherence of data sources

Understanding coherence challenges around our employment indicators continues to be a priority.

LFS reweighting has improved the coherence picture, as strong population growth in recent years is now incorporated into our estimates of all three labour market statuses.

We are also considering how best to consider coherence between HM Revenue and Customs's (HMRC's) PAYE RTI data and WFJ. As the former is essentially focused on employees, we recommend comparison with the employee jobs component of WFJ to align coverage of populations. One other important difference is that the RTI statistics published each month are a measure of people, rather than jobs, as in WFJ.

Our <u>Comparison of labour market data sources methodology</u> compares data sources and discusses some of the main differences.

More information on Coherence of our labour market data sources can also be found in our LFS quality article.

Labour market transformation

We have provided an update on the transformation of labour market statistics in our <u>Labour market transformation</u> <u>update on progress and plans: July 2025 article.</u>

We welcome your feedback on this latest update and our plans. Please email us at labour.market.transformation@ons.gov.uk to tell us what you think.

Coronavirus

For more information on how labour market data sources were affected by the coronavirus (COVID-19) pandemic, see our Coronavirus and the effects on UK labour market statistics article.

Making our published spreadsheets accessible

Following the <u>Government Statistical Service (GSS) guidance on releasing statistics in spreadsheets</u>, we will be amending our published tables over the coming months to improve the usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing <u>sample versions of a selection of our tables</u> and, where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email us at <u>labour.market@ons.gov.uk</u>.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

- The Labour Force Survey (LFS) is a survey of households in the UK.
- 2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.
- 3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.
- 4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.
- 5. Data from Jun-Aug 2011 to Jun-Aug 2022 have been modelled to make them consistent with the new populations introduced in Jul-Sep 2022

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

The split between full-time and part-time employment is based on respondents' self-classification.
 This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
 These series cover Employees and Self-employed only. These series include some temporary employees.
 The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Source: returns from public sector organisations

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the public sector from March 1999.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

NatWest Group (formerly Royal Bank of Scotland Group) is included in the public sector from December 2008 to March 2024, but in the private sector for earlier and later time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications

- 1. Estimated as the difference between LFS total employment and the data from public sector organisations.
- 2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
- 3. This series excludes locally engaged staff stationed outside the United Kingdom.
- This series excludes the Northern Ireland Civil Service.
- This series may not exactly equal the sum of the components because each component is independently seasonally adjusted

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at:

Workforce jobs enquiries 01633 456776

Sources: Employer surveys, Labour Force Survey and administrative sources

^{1.} Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

^{2.} This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

¹ Total usual weekly hours worked by people aged 16 and over in main job including paid and unpaid overtime.

Employment by country of birth and nationality

The temporary RTI adjustment applied from January to March 2020 to June to August 2022 was removed from the LFS weighting methodology as part of the reweighting exercise in December 2024, as described in our Impact of reweighting on LFS key indicators: December 2024 article.

Due to quality concerns during the pandemic period (as explained in more detail in our A12 dataset), we have removed the labour market status by country of birth and nationality from our A01 dataset and from tables accompanying our Labour market overview and Employment in the UK bulletins. The country of birth and nationality labour market data will also be withdrawn from our time series data.

Our EMP06 and A12 dataset will continue to be made available on our website, with additional guidance for users. From our February 2025 publication, EMP06 and A12 will be published using the reweighted LFS data.

We will continue to review and update users accordingly.

EMP06 Dataset

Employment by country of birth and nationality

The temporary RTI adjustment applied from January to March 2020 to June to August 2022 was removed from the LFS weighting methodology as part of the reweighting exercise in December 2024, as described in our Impact of reweighting on LFS key indicators: December 2024 article.

Due to quality concerns during the pandemic period (as explained in more detail in our A12 dataset), we have removed the labour market status by country of birth and nationality from our A01 dataset and from tables accompanying our Labour market overview and Employment in the UK bulletins. The country of birth and nationality labour market data will also be withdrawn from our time series data.

Our EMP06 and A12 dataset will continue to be made available on our website, with additional guidance for users. From our February 2025 publication, EMP06 and A12 will be published using the reweighted LFS data.

Data Source: Labour Force Survey

Discouraged workers are those who are not looking for work because they believe no jobs are available.
 Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

Labour market statistics enquiries: labour.market@ons.gov.uk

^{1.} Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

 $[\]underline{\text{https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainirg}$

^{2.} People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

^{3.} Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Earnings enquiries: 01633 456120 Email: earnings@ons.gov.uk

This error will have a minimal impact on the real measures of earnings for April 2025.

^{1.} Estimates of total pay include bonuses but exclude arrears of pay.

^{2.} The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

^{3.} Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

 $^{4. \} An error \ has \ been \ identified \ in \ the \ inflation \ measures \ for \ April \ 2025, \ this \ \underline{note} \ provides \ more \ detail.$

Labour market statistics enquiries: labour.market@ons.gov.uk

- 1. As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
 2. Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
- 3. Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.
- 4. Estimated values are highlighted with shaded cells.

[p] - provisional, [r] - revised, [x] - not available

^{1.} In April 2020, collection and publication of labour disputes data were temporarily suspended to protect and prioritise our outputs in response to the coronavirus (COVID-19) pandemic. In June 2022, collection of the Labour Disputes Inquiry restarted, but only for the period from January 2022

² As a result of difficulties in consistently defining a stoppage over time, the number of working days lost is considered to be a better indicator of the impact of labour disputes than the number of

³ A stoppage is defined as a dispute between a single trade union and a single employer. Where a union co-ordinates disputes with several employers, or several unions co-ordinate action with a single employer, this would be counted as multiple stoppages.

^{1.} The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

^{2.} The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

The Labour Force Survey is tabulated by region of residence.

3. Denominator = total economically active

Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk

^{1.} Economically active = Employment plus Unemployment.

^{2.} Denominator = all persons aged 16 to 64.

REGIONAL SUMMARY

23(2) Regional summary of Workforce Jobs

Thousands, seasonally adjusted

			Change on March
Area Codes	Area Names	June 2025	2025
K02000001	United Kingdom	36,848	-182
K03000001	Great Britain	35,883	-180
E92000001	England	31,567	-176

S92000003	Scotland	2,840	-15
N92000002	Northern Ireland	958	-2

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.

Workforce Jobs data for March 2019 onwards has been affected by the reweighting of the LFS, causing a step change discontinuity.
