1 . Main points

- Borrowing – the difference between total public sector spending and income – was £17.4 billion in October 2025; this was £1.8 billion (or 9.6%) less than October 2024 but the third-highest October borrowing (not adjusted for inflation) since monthly records began in 1993, after those of 2024 and 2020.
- Borrowing in the financial year to October 2025 was £116.8 billion; this was £9.0 billion (or 8.4%) more than in the same seven-month period of 2024 and the second-highest April to October borrowing (not adjusted for inflation) on record, after that of 2020.
- Borrowing in the financial year to October 2025 was provisionally estimated at 3.9% of gross domestic product (GDP); this was 0.1 percentage points more than in the same seven-month period of 2024.
- The current budget deficit – borrowing to fund day-to-day public sector activities – was £12.6 billion in October 2025; this brings the total current budget deficit in the financial year to October 2025 to £83.9 billion, which is £7.4 billion (or 9.7%) more than in the same seven-month period of 2024.
- Public sector net debt excluding public sector banks was provisionally estimated at 94.5% of GDP at the end of October 2025; this was 0.2 percentage points less than at the end of October 2024 and remains at levels last seen in the early 1960s.
- Public sector net financial liabilities excluding public sector banks were provisionally estimated at 84.0% of GDP at the end of October 2025; this was 2.5 percentage points more than at the end of October 2024, but 10.5 percentage points less than for public sector net debt.
- Central government net cash requirement (excluding UK Asset Resolution Ltd and Network Rail) was £21.7 billion in October 2025; this was £1.9 billion (or 9.8%) more than in October 2024.

2 . October 2025 indicators at a glance

3 . Borrowing in October 2025

Initial estimates show that the public sector spent more than it received in taxes and other income in October 2025, requiring it to borrow £17.4 billion.

This was £1.8 billion (or 9.6%) less than in October 2024 but £3.0 billion (or 21.4%) more than the £14.4 billion forecast in March 2025 by the Office for Budget Responsibility.

Figure 1: Borrowing this month was the second-highest in any October since 2020 and the third-highest October since monthly records began

Public sector net borrowing excluding public sector banks, £ billion, UK, October 2021 to October 2025

Figure 1: Borrowing this month was the second-highest in any October since 2020 and the third-highest October since monthly records began

Source: Public sector finances from the Office for National Statistics

Notes:

1. Dataset identifier code: -J5II.
2. Positive numbers indicate a deficit; negative numbers a surplus.

Public sector net borrowing is the sum of its current budget deficit and its net investment.

The current budget, which is usually in deficit, can be considered as borrowing to fund day-to-day public sector activities. This is the difference between its current receipts from taxes and other sources and its current expenditure on running public services, grants and administration.

The current budget deficit was £12.6 billion in October 2025; this was £2.4 billion (or 16.1%) less than in October 2024.

Public sector net investment comprises acquisitions, less disposals of capital assets (gross fixed capital formation), less the depreciation of capital assets, plus capital grants to the private sector, less capital grants from the private sector.

Net investment was £4.8 billion in October 2025, which was £0.6 billion (or 13.5%) more than in October 2024.

2. Public sector excluding the public sector-controlled banks.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. The data in this table correspond to those published in Table PSA2 of our Public sector finances tables 1 to 10: Appendix A dataset.
5. Extremely large percentage changes are not included in this table.
6. With effect from June 2024, there are no institutions classified as public sector banks.
7. Figures may not sum because of rounding

A breakdown of net borrowing by subsector and a summary of central government receipts and expenditure data are presented in Tables 1 to 3 in our [Public sector finances summary tables: Appendix M dataset](#).

Our [Public sector finances borrowing by subsector: Appendix R dataset](#) provides further detail on data presented in Table 1, including transactions related to borrowing by each subsector and their contribution to total public sector borrowing in a matrix table format. The time period presented in the matrix table can be changed using the dropdown box feature.

Central government borrowing

Central government forms the largest part of the public sector and includes government departments such as HM Revenue and Customs, the Department of Health and Social Care, the Department for Work and Pensions, the Department for Education, the Ministry of Defence and other government agencies.

The relationship between central government's receipts and expenditure is an important determinant of public sector net borrowing. Of the £17.4 billion borrowed by the public sector in October 2025, central government borrowed £22.0 billion, with some other subsectors showing a surplus.

Central government current receipts

Central government's current receipts were £86.4 billion in October 2025, £5.8 billion (or 7.3%) more than in October 2024. Of this £5.8 billion increase in income:

- central government tax receipts increased by £3.0 billion to £63.6 billion; this included increases of £1.2 billion in Income Tax, £0.9 billion in Value Added Tax (VAT) and £0.6 billion in Corporation Tax receipts
- compulsory social contributions increased by £2.8 billion to £16.9 billion; on 6 April 2025, as [changes to the rate of National Insurance contributions](#) paid by employers came into effect

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

Central government current expenditure

Central government spending data for October 2025 are provisional. There is uncertainty around these estimates until more detailed departmental information becomes available over time.

Central government's current expenditure was provisionally estimated as £92.6 billion in October 2025, £3.7 billion (or 4.2%) more than in October 2024. Of this £3.7 billion increase in spending:

- net social benefits paid by central government increased by £2.1 billion to £27.7 billion; this was largely caused by inflation-linked increases in many benefits, and earnings-linked increases to state pension payments
- central government departmental spending on goods and services increased by £2.0 billion to £39.0 billion, as pay rises and inflation increased running costs
- payments to support the day-to-day running of local government increased by £0.3 billion to £12.5 billion; these intra-government transfers are both central government spending and a local government receipt, so they have no effect on overall public sector borrowing
- central government debt interest payable decreased by £0.9 billion to £8.4 billion, with movements in the Retail Prices Index (RPI) adding volatility to the monthly debt interest costs

Central government debt interest costs

Borrowing is largely financed by the issuance of central government gilts by the Debt Management Office, on which interest is paid to investors.

The interest payable on index-linked gilts rises and falls with the RPI, adding volatility to central government debt interest costs. This additional RPI inflation-linked component of interest is described as "capital uplift" and affects the value of the gilt principal.

The £8.4 billion interest payable on central government debt in October 2025 includes £2.6 billion of capital uplift. This largely reflects the 0.4% increase in the RPI between July and August 2025.

Capital uplift is accrued throughout the life of each index-linked gilt but is paid to gilt holders as interest at redemption. Accrued capital uplift is shown as the light blue portion of each stacked bar in Figure 2.

Figure 2: Recent movements in the Retail Prices Index added £2.6 billion to central government debt interest payable in October 2025

Central government debt interest payable, £ billion, UK, October 2023 to October 2025

Figure 2: Recent movements in the Retail Prices Index added £2.6 billion to central government debt interest payable in October 2025

Source: Public sector finances from the Office for National Statistics

Notes:

1. Net of redemption proceeds.
2. Dataset identifier codes: NMFX, JNYY and JNYX.

Central government net investment

Central government net investment was £12.1 billion in October 2025, £0.3 billion less than in October 2024.

In October 2025, central government made a £6.7 billion quarterly payment to the Bank of England (BoE) Asset Purchase Facility (APF) Fund. This recent payment was £0.5 billion smaller than the equivalent payment in October 2024. These payments are recorded as both central government net investment expenditure and BoE receipts, so have no impact on overall public sector borrowing (PSNB ex).

4 . Borrowing in the financial year to October 2025

The public sector spent more than it received in taxes and other income in the financial year (FY) to October 2025. Provisional estimates show it borrowed £116.8 billion over the seven-month period, £9.9 billion (or 9.2%) more than the £106.9 billion forecast by the Office for Budget Responsibility in March 2025.

Figure 3: Moving into the second half of the financial year, borrowing was higher than in the same seven-month period in 2024 and higher than the official forecast

Cumulative public sector net borrowing excluding public sector banks, £ billion, UK, financial year (FY) to March 2025 and FY to March 2026

Figure 3: Moving into the second half of the financial year, borrowing was higher than in the same seven-month period in 2024 and higher than the official forecast

Source: Public sector finances from the Office for Budget Responsibility and Office for National Statistics

Notes:

1. Dataset identifier code: -J5II.
2. This chart uses forecast data published in the [Economic and fiscal outlook – March 2025 and monthly profiles published in May 2025](#).

Borrowing in the FY to October 2025 was £9.0 billion (or 8.4%) more than in the FY to October 2024. This is the second-highest FY to October borrowing since monthly records began in 1993, after that of April to October 2020, during the coronavirus (COVID-19) pandemic period.

Of the £116.8 billion borrowed by the public sector in the FY to October 2025, the current budget deficit was £83.9 billion. This was £7.4 billion (or 9.7%) more than in the same seven-month period a year ago. Public sector net investment increased by £1.6 billion (or 5.1%) to £32.9 billion over the same seven-month period.

4. The data in this table correspond to those published in Table PSA2 of our Public sector finances tables 1 to 10: Appendix A dataset.
5. Extremely large percentage changes are not included in this table.
6. With effect from June 2024, there are no institutions classified as public sector banks.
7. Figures may not sum because of rounding

Central government net borrowing

The relationship between central government's receipts and expenditure is an important determinant of public sector net borrowing. Of the £116.8 billion borrowed by the public sector in the FY to October 2025, central government borrowed £121.9 billion, with some other subsectors showing a surplus.

Tables 1 to 3 in our [Public sector finances summary tables: Appendix M dataset](#) provide an extended presentation of Table 2 and a summary of central government receipts and expenditure data.

Central government current receipts

Central government's current receipts were £609.6 billion in the FY to October 2025, £42.5 billion (or 7.5%) more than in the same seven-month period a year ago. Of this £42.5 billion increase in income:

- central government tax receipts increased by £24.3 billion to £454.5 billion; this included increases of £12.8 billion in Income Tax, £4.9 billion in Value Added Tax (VAT) and £3.6 billion in Corporation Tax receipts
- compulsory social contributions increased by £18.5 billion to £114.4 billion, as on 6 April 2025, [changes to the rate of National Insurance contributions](#) paid by employers came into effect

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

Central government current expenditure

Central government's current expenditure was provisionally estimated at £649.9 billion in the FY to October 2025, £51.2 billion (or 8.5%) more than in the same seven-month period a year ago. Of this £51.2 billion increase in spending:

- central government departmental spending on goods and services increased by £21.4 billion to £267.8 billion, as pay rises and inflation increased running costs
- interest payable on central government debt increased by £13.3 billion to £67.7 billion, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI)
- net social benefits paid by central government increased by £11.5 billion to £190.4 billion, largely caused by inflation-linked increases in many benefits (including Universal Credit) and earnings-linked increases to state pension payments
- payments to support the day-to-day running of local government increased by £1.7 billion to £89.6 billion; these intra-government transfers have no impact on overall public sector borrowing (PSNB ex)

Central government net investment

Central government net investment was £56.2 billion in the FY to October 2025, £12.2 billion less than in the same seven-month period a year ago. Over this period, central government made payments totalling £14.1 billion to the Bank of England (BoE) Asset Purchase Facility Fund, £16.7 billion less than in the same seven-month period of 2024. These payments are recorded as both central government net investment expenditure and BoE receipts, so have no impact on overall public sector borrowing (PSNB ex).

Local government

Initial estimates suggest that local government borrowing was £3.5 billion in the FY to October 2025. This was £1.1 billion (or 43.7%) more than in the same period a year earlier. Our local government estimates for the FY to October 2025 are currently based on budget data for England, Scotland, and Wales, with estimates included for Northern Ireland. Local government estimates for FYE March 2025 are also provisional and will be updated next month to reflect some recently published data for local authorities in England. More information is available in [Section 10: Data sources and quality](#).

5 . Borrowing in earlier financial years

Provisional estimates show the public sector borrowed £149.7 billion in the financial year ending (FYE) March 2025. This was the third-highest amount borrowed in any financial year since comparable records began in the FYE March 1947.

The highest amount borrowed in any financial year was £310.9 billion in the FYE March 2021 during the coronavirus (COVID-19) pandemic, and the second highest was £159.6 billion in the FYE March 2010 following the global financial downturn. However, these estimates have not been adjusted for inflation.

Expressing borrowing as a ratio of gross domestic product (GDP) – the value of everything produced in the UK economy in a 12-month period – gives an estimate of its affordability and provides a more thorough and reliable measure for comparison of the UK's fiscal position over time.

We currently estimate that the total borrowed in the FYE March 2025 was equivalent to 5.1% of GDP, 0.3 percentage points higher than in the FYE March 2024.

Figure 4: Financial year borrowing as a percentage of GDP has been stable at around 5% since the coronavirus (COVID-19) pandemic period

Public sector net borrowing excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to FYE March 2025

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: -J5IJ.
2. This chart uses historical data published in the [Public finances databank 2025 to 2026](#).

Borrowing in the first seven months of the current financial year was provisionally estimated at 3.9% of GDP. This was 0.1 percentage points more than during the same period in 2024, and was the eighth-highest borrowing ratio in any April to October period since monthly records began in 1993.

We describe the methodology used for the presentation of our GDP ratios in our [The use of GDP in public sector fiscal ratio statistics methodology](#).

6 . The public sector balance sheet

The public sector balance sheet describes its financial position at a point in time. It shows its liabilities (amounts owed) and its assets (amounts owned).

There are several measures of the public sector balance sheet that we discuss in our [What the UK government owns and what it owes blog post](#).

Table 3 presents the narrowest balance sheet measure, which is the redemption value of central government gilts. It then builds on this measure, widening coverage by both the subsector and the range of asset and liability types included, to reach the far wider measure of public sector net worth. We explain this measure in our [Wider measures of the public sector balance sheet: public sector net worth methodology](#).

Table 3: The public sector balance sheet
Balance sheet measures as at the end of October 2025, £ billion, UK

Classification of assets and liabilities [note 1] [note 2] [note 10]	Central government gilts	General government gross debt	PSND excluding both BoE and public sector banks (PSND ex BoE)	PSND excluding public sector banks (PSND ex)	PSNFL excluding public sector banks	Public sector net worth excluding public sector banks
Total [note 3]	2,601.8	3,067.9	2,768.6	2,904.9	2,583.5	-926.2
Assets:						1,657.3
Non-financial [note 4]						
Assets: Illiquid financial [note 5]					1,036.2	1,036.2
Assets: Liquid financial [note 5]			267.9	447.3	447.3	447.3

Liabilities: Other debt securities and loans		195.1	198.5	216.4	216.4	216.4
Liabilities: Other financial liabilities [note 7]					714.7	714.7

Source: Public sector finances from the Office for National Statistics and Debt Management Office

Notes

1. All aggregates are presented on a 2010 European system of national and regional accounts (ESA 2010) (PDF, 6.4MB) basis unless indicated.
2. Consolidation between subsectors means that the size of assets and liabilities (such as gilts) affecting the measure can change as the coverage increases.
3. Total equals liabilities less assets, except public sector net worth, where total equals assets less liabilities.
4. Non-financial account data are based on the UK national balance sheet.
5. "Liquid financial assets" mainly consists of foreign exchange reserves and cash deposits. "Illiquid financial assets" includes assets such as loans, financial derivatives, and other accounts receivable.
6. Gilt liabilities have been adjusted to remove those held by Pool Re which is classified as a central government body.
7. "Other financial liabilities" includes monetary gold and special drawing rights, standardised guarantees, financial derivatives, funded pension liabilities and other accounts payable.
8. Figures may not sum because of rounding.
9. We publish an additional presentation of the UK public sector balance sheet following the International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E.
10. "PSND" means Public sector net debt and "PSNFL" means public sector net financial liabilities.

Our [Public sector balance sheet tables: Appendix N dataset](#) presents a detailed reconciliation between the balance sheet measures summarised in Table 3.

Public sector net debt

Public sector net debt excluding public sector banks (PSND ex) is a widely used balance sheet measure that describes the UK public sector's financial position at a point in time. Expressing net debt as a ratio of gross domestic product (GDP) gives an estimate of its affordability and provides a more thorough and reliable measure for comparison of the UK's fiscal position over time.

The net debt-to-GDP ratio at the end of October 2025 was provisionally estimated at 94.5%, 0.2 percentage points less than a year ago. However, this is a highly provisional estimate. It is likely to be revised in future publications because it relies partly on GDP forecasts based on the Office for Budget Responsibility's [Economic and fiscal outlook – March 2025 report](#).

Figure 5: Net debt as a percentage of GDP remains at levels last seen in the early 1960s

Public sector net debt excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to October 2025

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: HF6X.
2. This chart uses historical data published in the [Public finances databank 2025 to 2026](#).

Public sector net debt excluding the Bank of England (BoE) was £2,768.6 billion at the end of October 2025, or around 90.0% of GDP. This was £136.4 billion, or 4.5 percentage points of GDP, less than the wider measure of net debt (including the BoE). This difference was largely a result of the BoE's quantitative easing activities, including the gilt-purchasing activities of the Asset Purchase Facility (APF) Fund.

The APF Fund's gilt holding is not recorded directly as a component of public sector net debt. Instead, in October 2025, we recorded the £86.3 billion difference between the £556.0 billion of reserves created to purchase its gilts (at market value at the time of purchase) and their £469.7 billion redemption value. For details of the BoE's contribution to public sector net debt, see Table PSA9A of our [Public sector finances tables 1 to 10: Appendix A dataset](#).

Public sector net financial liabilities

Public sector net financial liabilities excluding public sector banks (PSNFL ex) were £2,583.5 billion at the end of October 2025 and equivalent to an estimated 84.0% of GDP. This was £187.3 billion, or 2.5 percentage points, more than at the end of October 2024.

PSNFL ex adds further assets and liabilities to those recorded in debt (PSND ex). These extra assets are currently valued at more than the extra liabilities. This means that PSNFL ex was 10.5 percentage points of GDP less than PSND ex, which stood at 94.5% of GDP at the end of October 2025.

We explain the financial assets and liabilities captured in PSNFL ex in our [Public sector net financial liabilities \(PSNFL\) methodology](#).

Additionally, we published [a blog post explaining the PSNFL measure](#), because it has been selected by the UK government as the reference for a balance sheet fiscal rule.

Figure 6: The upward trend in public sector net financial liabilities is largely because of increases in net debt

Public sector net financial liabilities, £ billion, UK, month end October 2004 to October 2025

Figure 6: The upward trend in public sector net financial liabilities is largely because of increases in net debt

Public sector net financial liabilities, £ billion, UK, month end October 2004 to October 2025

Source: Public sector finances from Office for National Statistics

Notes:

1. Dataset identifier codes: KSE6, JMET, JMEU and CPNF.
2. PSND ex abbreviates public sector net debt excluding public sector banks.
3. PSNFL ex abbreviates public sector net financial liabilities excluding public sector banks.

The additional financial assets and liabilities included in PSNFL ex that fall outside of the PSND ex boundary are not updated monthly. Instead, they are updated quarterly, or when data become available. These data were updated on 19 September 2025 and will next be updated on 19 December 2025.

A more detailed presentation of the public sector balance sheet is available in our [Public sector net worth: Appendix O dataset](#), released on 19 September 2025.

7 . Revisions

The data for the latest months of every release contain a degree of forecasts. These are then replaced by improved estimates, as further data are made available, and finally by outturn data.

Our initial estimates of borrowing for the most recent months are prone to revisions in later months. This is because some tax receipts contain a degree of Office for Budget Responsibility-based forecast data. Both central government and local government spending profiles are provisional.

Table 4: Revisions to public sector net borrowing by subsector

1. Public Sector excluding Bank of England and the public sector-controlled banks.
2. Public Sector excluding the public sector-controlled banks.
3. The data in this table correspond to that published in Table PSA2 of Public sector finances tables 1 to 10: Appendix A dataset.
4. With effect from June 2024 there are no institutions classified as public sector banks.

Tables 4 to 6 of our [Public sector finances summary tables: Appendix M dataset](#) compare our latest public sector finances data with those in our [Public sector finances, UK: September 2025 bulletin](#), published on 21 October 2025. They highlight the revisions to borrowing by subsector, with additional detail for central government receipts and expenditure.

Our [Public sector finance revisions analysis: Appendix P dataset](#) records monthly borrowing data, as at first and at subsequent publications, graphically illustrating any potential bias to our early estimates.

Revisions to public sector net borrowing in the financial year to September 2025

We have reduced our provisional estimate of public sector net borrowing (PSNB ex) in the FY to September 2025 by £0.4 billion to £99.4 billion since publishing our [Public sector finances, UK: September 2025 bulletin](#).

Table 4 of our [Public sector finances summary tables: Appendix M dataset](#) presents the revisions to our previously published estimates of public sector net borrowing by subsector.

We have increased our previous estimate of central government net borrowing for the seven months to September 2025 by £0.5 billion. This increase was offset by a reduction in our previous estimate of local government net borrowing of £1.0 billion over the same period.

Regular monthly updates to our central government data have reduced our previous estimate of central government receipts by £0.4 billion and increased our previous estimate of spending by £0.1 billion.

Within this increase to our spending estimate, small reductions spread across several categories were offset by a £1.0 billion increase to our estimate of current transfers to local government. Such transfers are public sector borrowing neutral, increasing central government borrowing and reducing local government borrowing by equal and offsetting amounts.

Tables 5 to 6 of our [Appendix M dataset](#) present the revisions to our previously published estimates of central government receipts and spending by component.

Revisions to public sector net borrowing in earlier financial years

We have increased our provisional estimates of public sector net borrowing in both the FY to March 2024 and FY to March 2025, by £0.1 billion and £0.3 billion, respectively, since publishing our [Public sector finances, UK: September 2025 bulletin](#). These increases were both because of regular updates to our corporation tax data.

Revisions to public sector net debt at the end of September 2025

We have increased our estimate of public sector net debt (PSND ex) at the end of September 2025 by £0.7 billion to £2,916.9 billion, since publishing our [Public sector finances, UK: September 2025 bulletin](#).

This increase was largely because of updates to data used to estimate the Bank of England's contribution to debt, which are published one month in arrears.

Revisions to gross domestic product

This month, we have updated our previous estimates of nominal gross domestic product (GDP) with those published in our [GDP first quarterly estimate, UK: July to September 2025 release](#) on 13 November 2025.

Published GDP in the latest quarter was higher than previously estimated, meaning that our headline balance sheet figures expressed as a ratio of GDP reduced in recent periods.

Our estimate of public sector net debt as a ratio of GDP at the end of September 2025 reduced by 0.2 percentage points from 95.3% to 95.1%. This was largely because of this update to GDP.

Our [How the Office for National Statistics \(ONS\) estimates UK debt to GDP figures blog post](#) explains why our estimates of the debt-to-GDP ratio are susceptible to revision.

8 . Data on public sector finances

[Public sector finances tables 1 to 10: Appendix A](#)

Dataset | Released 21 November 2025

The data underlying the public sector finances statistical bulletin are presented in the tables PSA 1 to 10.

[Public sector current receipts: Appendix D](#)

Dataset | Released 21 November 2025

A breakdown of UK public sector income by latest month, financial year-to-date and full financial year, with comparisons with the same period in the previous financial year.

[Public sector finances summary tables: Appendix M](#)

Dataset | Released 21 November 2025

The latest public sector net borrowing by subsector and a summary of central government receipts and expenditure data.

[Public sector balances sheet tables: Appendix N](#)

Dataset | Released 21 November 2025

A reconciliation of the latest public sector balance sheet measures.

[Public sector finances borrowing by subsector: Appendix R](#)

Dataset | Released 21 November 2025

Public sector finances analytical tables (PSAT) showing transactions related to borrowing by subsector. Total Managed Expenditure (TME) is also provided.

[International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E](#)

Dataset | Released 19 September 2025

Presents the balance sheet, statement of operations and statement of other economic flows for the public sector, compliant with the Government Finance Statistics Manual 2014: GFSM 2014 presentation. Updated quarterly, depending on the availability of data.

[Public sector net worth: Appendix O](#)

Dataset | Released 19 September 2025

Presents the balance sheet for the public sector, consistent with the 2010 European system of national and regional accounts (ESA 2010) and Eurostat's Manual on Government Deficit and Debt (MGDD). Updated quarterly, depending on the availability of data.

9 . Glossary

Public sector

In the UK, the public sector consists of six subsectors: central government, local government, public non-financial corporations, public-sector-funded pensions, the Bank of England (BoE), and public financial corporations (including public sector banks). The figures presented in this release exclude public sector banks unless otherwise noted.

The NatWest Group, the last remaining public sector bank, was reclassified to the private sector as of June 2024.

Public sector current budget deficit

Public sector current budget deficit (PSCBD) is the gap between current expenditure and current receipts on an accruals basis, having taken account of depreciation. PSCBD is effectively an estimate of borrowing to fund day-to-day public sector activities and is the reference statistic used for a UK government fiscal rule.

The current budget is in surplus when receipts are greater than expenditure and is indicated with a negative sign.

Public sector net borrowing

Public sector net borrowing (PSNB) is the gap between total expenditure and current receipts on an accruals basis. If receipts exceed expenditure, this is referred to as a surplus and is indicated with a negative sign. Borrowing is often referred to by commentators as "the deficit".

Public sector current budget deficit and net borrowing are measured on an accruals basis, where transactions for income are recorded when earned and expenses are recorded when incurred, rather than when the bills are paid (on a cash basis).

Central government net cash requirement

The central government net cash requirement (CGNCR) represents the cash needed to be raised from the financial markets over a period to finance its activities. The amount of cash required will be affected by changes in the timing of payments to and from the public sector, rather than when these liabilities were incurred.

Public sector net debt

Public sector net debt (PSND), often referred to by commentators as "the national debt", represents the amount of money the public sector owes to the private sector and overseas (in the form of loans, debt securities, deposit holdings and currency), net of liquid financial assets held.

Public sector net financial liabilities

Public sector net financial liabilities (PSNFL) is a wider measure of the balance sheet than public sector net debt and includes all financial assets and liabilities recognised in the national accounts. PSNFL is the reference statistic used for a UK government fiscal rule and is sometimes referred to as "net financial debt".

Broadening the PSNFL measure to include the public sector's non-financial assets provides public sector net worth (PSNW), our widest balance sheet measure.

10 . Data sources and quality

Methodology guides

To supplement this release, we publish our accompanying [Monthly statistics on the public sector finances: a methodological guide](#) and [Public sector finances quality and methodology information \(QMI\)](#) outlining the strengths, limitations, and appropriate uses of government finance statistics.

We also explain the recording of interest payable to holders of UK government gilts in the UK public sector finances in our [Calculation of interest payable on government gilts methodology](#) and our [Use of gross domestic product \(GDP\) in public sector fiscal ratio statistics methodology](#).

Accredited official statistics

Public sector net borrowing, cash requirement and debt are [accredited official statistics](#). These accredited official statistics were independently reviewed by the Office for Statistics Regulation in June 2017. They comply with the standards of trustworthiness, quality, and value in [the Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Official statistics

Public sector net financial liabilities and public sector net financial worth are both official statistics. These measures were introduced after June 2017, so have not yet been reviewed by the Office for Statistics Regulation.

Official statistics in development

Public sector net worth is labelled as "official statistics in development". Until October 2023, these were called "experimental statistics". Read more about the change in our [Guide to official statistics in development](#).

Central government tax receipts and social contributions

In the most recent months, tax receipts recorded on an accrued basis are subject to some uncertainty. This is because many taxes such as Value Added Tax (VAT), Corporation Tax, and Pay As You Earn (PAYE) Income Tax contain some forecast cash receipts data and are liable to revision when actual cash receipts data are received.

The forecasts underlying our current tax estimates largely reflect the expectations published in the [Economic and fiscal outlook – March 2025 report](#) from Office for Budget Responsibility.

Value Added Tax data

On 8 October 2025, [HM Revenue and Customs \(HMRC\) reported an under-estimation in its VAT cash receipts data for the period April to August 2025](#).

HMRC has implemented immediate improvements to quality assurance processes, including comparisons with independent data sources, working with HM Treasury and the Office for National Statistics (ONS). HMRC will also carry out a robust review across all receipts to consider the underlying issue, and to identify actions to minimise the risk of similar incidents in future.

The ONS and HM Treasury are engaging with this process to lend their support to it. The Office for Statistics Regulation will provide an independent perspective on HMRC's review to ensure compliance with the Code of Practice for Statistics.

The ONS will report on progress with work to improve the quality of public sector finance statistics as part of the first quarterly update on the Economic Statistics Plan, scheduled for December 2025.

Local government

Local government data for the financial year ending (FYE) March 2026 are provisional estimates for the UK. They are largely based on budget data for England, Scotland and Wales, and with estimates included for Northern Ireland.

Local government data for the FYE March 2025 also remain provisional estimates for the UK. For local authorities in England, estimates for current expenditure are based on published first release data, while capital expenditure and receipts are based on published provisional data. England estimates will be updated to reflect final outturn data for capital expenditure and receipts in our next release, publishing on 19 December 2025.

Estimates for the devolved governments for the FYE March 2025 are based on published budget data for Wales, published provisional outturn data for Scotland, and estimates for Northern Ireland.

In recent years, planned local government expenditure initially reported in local authority budgets has been systematically lower than final outturn current expenditure reported in the audited accounts, and generally higher than that reported in final outturn capital expenditure. Therefore, we may include adjustments to increase or decrease the amounts reported at the budget stage.

For the FYE March 2025, these adjustments include:

- a £2.4 billion upward adjustment to Scotland's current expenditure
- a £0.5 billion downward adjustment to Wales's capital expenditure

For the FYE March 2026, these adjustments include:

- a £2.0 billion upward adjustment to England's current expenditure
- a £2.4 billion upward adjustment to Scotland's current expenditure
- a £0.4 billion downward adjustment to Scotland's capital expenditure

To reflect the most recently available data for housing benefits, we have applied a further £3.1 billion downward adjustment to current expenditure in the FYE March 2026.

Public corporations

Data for public corporations in the financial year ending (FYE) March 2026 are highly provisional initial estimates for the UK. They are largely based on the Office for Budget Responsibility's (OBR's) [Economic and fiscal outlook – March 2025 report](#).

Data for public corporations in FYE March 2024 and FYE March 2025 remain largely based on the OBR's [Economic and fiscal outlook – October 2024 report](#), and are supplemented by in-year estimates for train operating companies, the Housing Revenue Account, and surveyed public corporations.

Comparing our data with official forecasts

The independent OBR is responsible for the production of official forecasts for the UK government. These forecasts are usually produced twice a year, in spring and autumn. The latest forecast was published in the OBR's [Economic and fiscal outlook – March 2025 report](#). The Autumn Budget 2025 will take place on 26 November 2025 and will be accompanied by updated forecasts presented in the [Economic and fiscal outlook – November 2025 report](#).

Table 5: Latest public sector finances estimates compared with the corresponding Office for Budget Responsibility forecast, UK
£ billion unless otherwise stated

	October 2025: Provisional estimate	October 2025: Forecast [note 1]	Difference	FYE March 2026: Forecast [note 1]
Current budget deficit	12.6	10.0	2.6	36.1
Net Borrowing	17.4	14.4	3.0	117.7
Net Debt	2,904.9	2,887.9	17.0	2,897.2
Net Debt % of GDP	94.5	96.2	-1.7	95.1
Net Financial Liabilities	2,583.5	-	-	2,525.5
Net Financial Liabilities % of GDP	84.0	-	-	82.9

Source: Public sector finances from the Office for Budget Responsibility and Office for National Statistics

Notes

1. This table uses the Economic and fiscal outlook – March 2025 and monthly profiles published in May 2025.
2. All public sector measures in this table exclude public sector banks.
3. Figures may not sum because of rounding.
4. Dashes represent estimates not available monthly.

The UK's fiscal targets

The [UK government has legislated for targets](#) to constrain its management of the public finances. The Autumn Budget 2024 announced that, from January 2025, these fiscal targets focus on the public sector current budget deficit and public sector net financial liabilities.

The current budget deficit

The UK government has set a target to bring the current budget into surplus by the end of the FYE March 2030 – in other words, that the public sector's day-to-day spending should be met by its revenues. The public sector would, therefore, be forecast to be only borrowing for investment (capital) spending.

Our latest figures show that the public sector current budget deficit was £76.1 billion in the FYE March 2025; this was £9.7 billion more than in the FYE March 2024.

Public sector net financial liabilities

The present UK government target is that, by the end of March 2030, public sector net financial liabilities (PSNFL) should be falling relative to the size of the economy (or GDP) compared with the previous year.

Our latest figures show that PSNFL was provisionally estimated at 81.2% of GDP at the end of March 2025; this was 1.5 percentage points more than at the end of March 2024.

1 GDP denominator 12 month moving total to period

2 GDP denominator 12 month centred moving total around period

3 BoE abbreviates Bank of England

4 Time series only available back to 2000 Q1 with "-" denoting no data

5 "-" denotes zero value for that period

Worksheet PS6A: Net borrowing summary, UK, not seasonally adjusted

This worksheet contains one table. Some cells refer to notes which can be found on the notes worksheet tab.

This table contains monthly and financial year to date data

Relationship between columns 11=1+3+6+7+8+10 ; 15=12+13+14

1 Includes capital gains tax paid by households. Includes income tax and capital gains tax paid by corporations.

2 Mainly comprises corporation tax and petroleum revenue tax.

Relationship between columns 18=(15-11)+17 ; 20=18+19 ; 21=15+17+19

3 Mainly national insurance contributions (NICs).

4 Consists largely of gross operating surplus, equates to depreciation for government. Also includes rent receipts.

5 Includes investment income attributable to insurance policy holders

Relationships between columns 1+3+4=5 ; 2+3+4=6 ; 6+7+8=5

1 NRAM = Northern Rock Asset Management, B&B = Bradford and Bingley.

2 NCR = Net Cash Requirement

3 Does not include Net Cash Requirement to Central Government

4 Negative NCR reflects change in financing as from 2014/15 new financing requirements of Network Rail were met through core central government borrowing and are therefore included in main CGNCR.

PSA7D Central Government Net Cash Requirement on own account (receipts and outlays on a cash basis)

Relationships between columns 1+6+7=8; 9+10+11=12; 12-8=13

1 Comprises payments into the Consolidated Fund and all payovers of NICs excluding those for Northern Ireland.

2 Income tax includes capital gains tax and is gross of any tax credits treated by HM Revenue and Customs (HMRC) as tax deductions.

3 UK receipts net of personal pension rebates; gross of Statutory Maternity Pay and Statutory Sick Pay.

4 Payments into Consolidated Fund.

5 Including some elements of expenditure not separately identified.

6 Mainly comprises privatisation proceeds.

7 Net of certain receipts, and excluding on-lending to local authorities and public corporations.

8 A much more detailed breakdown of tax receipts is available from HMRC at www.gov.uk/government/organisations/hm-revenue-customs

9 NCR = Net Cash Requirement. Without Northern Rock Asset Management & Bradford and Bingley.

10 Gross of tax credits. Includes diverted profit tax.

REC3 Reconciliation of Central Government Net Cash Requirement and Changes in Net Debt

£ million

Relationship between columns 14=1+2+3+4+5+6+7+8+9+10+11+12+13

1 Excluding Northern Rock Asset Management (NRAM), Bradford & Bingley (B&B) and Network Rail (NR) - although cash flows relating to NRAM and B&B are included from October 2014 and for NR from April 2015

2 All adjustments reflect differences between when, and at what value, liabilities and assets are scored in net debt and their related cash flows

3 Includes gilts that are transferred to central government (such as those previously held by the Royal Mail Pension Plan) as well as timing differences where cash flows and debt movements were recorded in adjacent months

4 Includes the impact of imputed finance leases as well as the reclassifications of London Continental Railway and the reorganisation of the Housing Revenue Account

5 When an index-linked gilt is redeemed, the impact will always be negative which can cause MW7L to be negative.

Column relationships 1+2+3+4+5+6+7-8-9=10

1 Bank of England comprises Banking Department and Issue Department. Banking Department plus Issue Department assets and liabilities measured after consolidation of Issue Department deposit held at Banking Department.

2 From September 2021 this is calculated using APF purchase of gilts (YWWB9T9) plus APF purchase of corporate bonds (YWWZJ5J).

3 From September 2021 APF gilt purchases are sourced directly from BoE website (YWWB9T9).

4 Includes BoE's temporary purchases of long-dated UK government conducted between 28 September and 14 October 2022.

5 Up to the 19th January 2019, Term Funding Scheme was within the APF. From 19th January 2019, TFS was transferred to the BoE balance sheet.

6 These series can be derived from the BoE Annual Report and Accounts covering both the Banking and Issue Department liabilities and assets.

7 Includes: insurance, pension, standardised guarantee schemes and other accounts receivable/payable.

8 Gilts are recorded at face (or redemption) value in this presentation.

9 Consolidation of gilts issued by central government but held by Banking & Issue Department of BoE.

10 Consolidation of the loan to the BoE Asset Purchase Facility Fund (BEAPFF).

11 Comprised of Ways and Means advance to the National Loans Fund and the loan to the CCFE granted in April 2020 and fully repaid in March 2022.

12 HM Treasury estimates based on management information. Estimates for February 2015 to February 2016 based on annual report data only.

13 Term Funding Scheme (SME) is the TFS with additional incentives for small and medium-sized enterprises which started 15th April 2020.

1 ONS estimates of the interest received by APF from central government, largely on its gilt holdings.

2 ONS estimates of the interest paid by APF to Bank of England on the loan. Calculated using the Bank of England base rate. From August 2025 the base rate has been set at 4.0 percent.

3 Dividends paid to HM Treasury consolidate between the central government and Bank of England and so are public sector borrowing neutral.

4 The full cash transfers (series MT6A and MF7A) will impact the net cash requirement measure by the total amounts.

Worksheet PSA10: Public sector transactions by sub-sector and economic category, UK, not seasonally adjusted

This worksheet contains one table.

Some cells in this table are black indicating that some transactions do not exist in all subsectors

Time period covered by this presentation April 2024 to March 2025

Transactions	Central government (£ million)	Local government (£ million)	General government (£ million)	Public corporations (£ million)	Public sector funded pension schemes (£ million)	Bank of England (£ million) [note 6]	Public sector excluding public sector banks (£ million)	Public sector banks (£ million) [note 129]	Public sector including public sector banks (£ million)
